REPORT OF THE DIRECTORS

OF THE

BENGAL BONDED WAREHOUSE ASSOCIATION

FOR THE HALF-YEAR ENDED 31ST OCTOBER 1863.

1. Your Directors submit for approval the Accounts for the half-year ended 31st October 1863.

2. In their last Report your Directors referred to the gradual clearance of goods from Bond as the chief cause of a falling off in the receipts during the half-year, and as that gradual clearance has been maintained during the past six months the rent account exhibits a further diminution.

3. The results are satisfactory nevertheless, for, added to the last declared dividend, the surplus available on this occasion will make the Return on the par value of your Stock upwards of eleven per cent. per annum.

4. The amount of rent collected during the past half-year is Rupees 66,631-14-6 (including the sum of Rupees 3,410-14-3 rent due and brought forward from the last account); the amount of rent outstanding is Rupees 6,661-1-6; the total amount of rent earned during the half year being Rupees 69,882-1-9.

5. The divisible surplus amounts to Rupees 49,442-7-2, which will admit of a dividend of 23 Rupees per share, free of income tax, after allowing your Establishment a bonus of Rupees 1,300, which the Directors recommend, and carrying, as usual, Rupees 2,000 to the Repair and Building Fund.

6. The departure for Europe of the Hon'ble David Cowie creates a vacancy in the Board of Directors, which you are now requested to fill up.

Government of Bengal.

Fall of an Ærolite.

From F. B. Simson, Esq., Officiating Commissioner of Dacca, to the Secretary to the Government of Bengal,—(No. 190, dated the 20th September 1863.)

I have the honor to forward herewith a number of papers connected with the fall of an Ærolite in Pergunnah Bhowal, the Zemindarry of Baboo Kalinarain Chowdry, and with reference to his letter (Translation No. 3) I beg to request that the Baboo may be favored with a letter of thanks from His Honor the Lieutenant-Governor. He is a highly respectable Zemindar, and much esteemed by Messrs. Buckland and Carnac and by myself.

2. The stone itself, which is weighty, shall be sent to your Office by the first opportunity.

From Dr. A. Simpson, Civil Surgeon of Dacca, to F. B. Simson, Esq., Officiating Commissioner of Dacca,—(No. 67, dated the 24th September 1863.)

I beg to forward to you an Ærolite, weight 6 lbs. 1 oz., which fell near the Village of Shytal,* forty miles north of Dacca, on the 11th August last.

* Latitude 24 19'. Longitude 90 19'.

The stone was sent to me by Baboo Kalinarain Roy Chowdry, Zemindar of Bhowal, for inspection, and with a subsequent request that it should be forwarded to Government.

The stone has been analysed by Mr. W. Brennand, Principal of the Dacca College, and pronounced by him to be an Ærolite.

I enclose copies of the correspondence which contains all the information obtained regarding it.

I have no doubt it will be a valuable addition to the collection in the British Museum.

I have little doubt that the thanks of Government will be sent to Baboo Kalinarain Roy Chowdry, for his promptitude in sending the Ærolite, and his forwarding it, for the acceptance of Government.

No. 1.

Translation of a Bengalee letter from Baboo Kalinarain Roy Chowdry, Zemindar of Bhowal, Zillah Dacca, to Dr. A. Simpson, Civil Surgeon.

On the 11th August, about noon, we heard three or four times the sound of something in the sky like that caused by cannon shot. The sound proceeded towards the north. A few days after I was informed by the people of *Shytal* that similar sounds were heard there, and that something like fire fell near the house of a subject of mine named Ram Doyal Bungshee. The place was examined by my subjects and a hole was seen in a cultivated piece of ground. When this hole was dug they found about three-fourth cubit below the surface a piece of stone which was immediately sent to me, but I could not make out the cause of the formation of this stone, I am therefore sending the stone to you, hoping that you will not fail to oblige by informing me the conclusion you come to after strict and proper examination. All the particulars you will be able to know from Baboo Brindabun Chunder Mozoomdar.

Memorandum from Dr. A. Simpson, Civil Surgeon of Dacca,—(dated the 2nd September 1863.)

Wrote to Kalinarain Roy to send the man who saw the stone fall, and to order search to be made for any fragments of the stone, and to measure exactly the hole in which the stone was found.

No. 2.

Letter from W. Brennand, Esq., dated the 2nd September 1863, containing the analysis of the Ærolite.

I have examined the stone which you sent to me yesterday, and I believe it to be a real Ærolite. It possesses all the characteristics of one. I subjected a portion of it to a rough analysis. A quantity was pulverized and digested in Nitric Acid. The filterate contained iron manganees and cobalt, the insoluble part was then boiled in Hydrochloric Acid, in the filterate I found nickel: there may be other metals in small quantity, but the bulk of the residue I suspect to be silica.

Another portion of the stone was pulverized, and on applying the magnet I separated the magnetic from the non-magnetic particles.

In the non-magnetic I found the iron, this makes me think that the iron is in the form of a sulphide and a proto-sulphide, for on the first application of the Nitric Acid to the powder large quantities of Hydrosulpheric Acid were given off.

The magnetic part of the powder contained nickel, but not much iron. I suspect this to be merely in a state of aggregation with the magnetic nickel.

The stone does not contain silver, lead, or mercury at least I can find none.

I have had a translation made of the Baboo's letter, and this I enclose. It has every appearance of a faithful record.

It might be well to put a few questions on the subject, for it is seldom that an opportunity occurs where trustworthy evidence regarding Ærolites can be had. If the Baboo could send the person who was an eye-evidence of the phœnomenon suitable questions might be put to him and useful information might be elicited. The following might be proposed to the Baboo himself:—

Was the stone warm when it was dug up?

How far, by *actual measurement*, had the stone penetrated?

Was the sound accompanied by a great light?

Was it a clear day?

He might be asked to look for more fragments in the same hole.

How long after the fall was it that the stone was dug up?

The Government have recently been asking for information regarding meteoric stones. It might be useful if you send the stone with the account of the Baboo, to the Secretary to Government.

Additional Statement of Doyal Bungshee continued.

It did not leave a train in its course like that of a rocket. There was no light in its track. He saw it immediately after hearing the sound. He was at first afraid of going to the place where it had fallen, but he gained courage after consulting sometime with his friends. He was accompanied by about four others who were with him when the stone was dug up. The sky was cloudy. The sound was a sudden sound like a clap of

thunder, and not a continuous rumbling sound. There were several detonations. There was no appearance of cloudiness round the body when it was in motion. It was a round mass of fire. The color was like red-hot iron.

The distance of Shytal is forty-eight miles from Dacca.

No. 3.

Translation of a letter from BABOO KALINARAIN ROY CHOWDRY, sending the man who saw the Ærolite fall, and requesting that the stone be sent to Government.

I HAVE the honor to acknowledge the receipt of your letter, and beg to inform you that, according to your desire, I am sending the man, named Doyal Bunghsee, who saw the Ærolite fall. He is an inhabitant of Shytal, and a subject of mine. If, from knowing the particulars from him, you come to the conclusion that it is in reality an Ærolite, I request your favor of kindly sending it to the Government, and inform the Government that it was sent to you by me. I examined the place where the stone fell, and I send you the depth and breadth of the hole made by the stone. I could not find near the hole any fragment of the stone.

No. 4.

The Statement of DOYAL BUNGSHEE, Ryot of BABOO KALINARAIN ROY, of Shytal, who saw the Ærolite fall.

ON a day in Srabun (said to be the 11th August) between the hours of 11 and 12 in the forenoon he heard a noise like thunder. He then saw a round body coming from the east towards the west; it fell at a distance of about half a mile from where he stood. As the body was moving there was a strong smell like that of burning gunpowder. He went to the spot about an hour afterwards. There was a hole in the ground of more than nine inches in diameter. He was curious to know what it was that had fallen. On digging down to a depth of about seventeen inches he found a stone, the one now sent. It was not warmer than the ordinary soil of the place. The earth in which it was imbedded was sandy and moist. The stone when dug up had no smell of sulphur or gun-powder.

As directed by his Zemindar, Baboo Kalinarain Roy, he searched the place for other fragments of the stone, but could find none. There was no report of any other fragment having fallen in the neighbourhood. Its color when in motion was red, something of the appearance of the sun at rising. It was not accompanied by sparks.

The people of the place were very much frightened; he was not himself frightened.

When the stone was dug up the villagers supposed it to be a supernatural being, they bathed it, and anointed it with oil; they did not, however, make poojah to it.

Notification.—The following extract (paragraphs 8 and 9) from a Financial Despatch from the Right Hon'ble the Secretary of State for India, No. 174 of 1863, dated the 30th September, is published for general information:—

Para. 8.—I take this opportunity of calling your attention to the practice of recommending Uncovenanted Servants for special Pensions. The Code of Rules which was published on the 4th of January 1831 prescribed "that the rates of Pensions "shall be fixed on a graduated scale within the "prescribed limitations, with reference to the "responsibility and arduousness of the employ-"ment, the degree of merit of the individual, and "the nature and length of his service;" and, in my Financial Despatch of the 8th of December 1862, No. 205, I observed (paragraph 9) that "Pensions of the full amount stated are to be "granted only as the reward of approved service." It appears, however, to be the custom for Heads of Departments in India to recommend, in nearly every case, the full amount of Pension which the Rules permit; and, whenever the service rendered has been at all above the average character, a special Pension is recommended in excess of that which the Rules authorize.

9. It cannot be too strongly insisted upon, and made known to the whole body of Uncovenanted Officers, that the full Pension authorized under the Rules is not to be given as a matter of course, but only where the service performed has been really such as to merit the approval of Government, and this should be invariably kept in view in considering recommendations for Pension.

The Board, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so.

The following are the Conditions of Sale :—

1. The Opium will be sold for exportation by Sea only, and no Certificate will be granted except to cover such export.

2. The Opium will be ordinarily offered for sale at an upset price of Rupees 400 per Chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by Clause 12 of these Conditions of Sale.

3. The Sale shall commence at the hour of 11 A. M. of the day fixed by previous Notification, and shall not be continued after the hour of 5 P. M., but if at that hour any of the lots advertised for sale shall remain unsold, the Sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a Public Holiday) at the hour of 11 A. M., and so on, until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board may dispose of the lots which remain on hand at a future Sale.

4. Each lot shall contain five Chests.

5. A Promissory Note for a sum calculated according to the scale noted in the margin shall be taken as a deposit on each lot from the Purchaser in the Sale Room, and before the lot is registered in the Sale Book, and all such Promissory Notes shall be redeemed on the part of the Purchasers at this Office by Bank of Bengal Receipts, or by substitution of other Public Securities of the Bengal Government, on or before 4 o'clock in the afternoon of the fifth day after the Sale, or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts, or deposit of other Public Securities as aforesaid shall have been delivered in, shall be re-sold at such time or times, and under such conditions of re-sale, as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

And so on, Rs. 100 being added to the Deposit for every additional Rs. 400 bid.	

6. The Promissory Notes taken on the day of sale under the last mentioned condition, if remaining unredeemed at 4 o'clock of the fifth day following the day of Sale, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

7. No tender of Money, Bank of Bengal Receipts, or Public Securities, on account of Opium, upon which the prescribed Deposit may not have been made before 4 o'clock of the fifth day following the day of Sale, will be afterwards accepted.

8. The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order ; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

10. No deposit of Public Securities under the fifth of the present Conditions will be received in this Office, except from the party recorded as the Purchaser in the Sale Book, or his authorized Agent. The Receipt for deposit of Public Securities will be granted only in the name of such Purchaser, and the Securities so deposited will be returned when payment in full has been made by the said Purchaser or his Order.

11. The Officer superintending the Sale on the part of the Board of Revenue is empowered to reject, at his discretion, the bid of any individual, unless such individual shall, on demand, tender at the time a Deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these Conditions.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained, and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 100 Rupees specified in the second of these Conditions.

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

15. The following papers, together with samples of the Opium for sale, will be exhibited for inspection on the day of sale, or may be seen previously to that date by application at the Office of the Junior Secretary to the Board of Revenue:—

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1862-63 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1864, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantitiy of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

PROSPECTUS

OF

THE VICTORIA BANK OF CALCUTTA,

"Limited."

The undersigned believe that there is ample room for a Loan and Discount Bank in Calcutta, which, if administered on true principles, will doubtless prove a source of profit to the Shareholders.

The enormous resources of the country are being rapidly developed by the introduction of European capital, skill and enterprise, and as new undertakings are daily brought forward, the demand for money increases. Among the numerous Companies that have lately started into existence, it is certain that there are many connected with the development of the agricultural and industrial resources of the country, which, if properly carried out, will be found well deserving of encouragement and support. To afford such support will be the primary object of the Victoria Bank, and with this view the following project for forming a Joint Stock Bank, on the principle of Limited Liability, is submitted to the Public.

The Capital of the Victoria Bank of Calcutta "Limited" is to be Rs. 50,00,000 with power to increase.

The Capital to be divided into 10,000 Shares of Rs. 500 each.

The Projectors reserve the privilege of appropriating among themselves 1,000 Shares; the remaining 9,000 Shares are offered to the Public.

The Bank of Bengal will commence receiving applications for Shares at noon, on Monday, the 23rd November 1863, each application to be accompanied by a deposit of 20 Rs. per Share.

Applications for more than 200 Shares will not be received from any one individual or Firm.

The First Call of Rs. 80 must be paid also to the Bank of Bengal within 10 days after allotment, failing which the Deposit will be liable to forfeiture at the discretion of the Board of Directors.

It is proposed that within one week after the First Call has been paid, a Meeting of the Shareholders be convened (of which three days notice will be given) for the purpose of nominating a Board of Directors. No Shareholder who has not paid the First Call shall be entitled to vote at such Meeting. Voting Cards will be supplied by the Projectors to all Shareholders who shall have duly paid the First Call; such Cards shall be signed by Shareholders intending to vote, and delivered to the Chairman at the Meeting. No votes tendered in any other manner will be received.

The Directors shall appoint all Office Bearers, and do everything needful to carry on the operations of the Bank.

The Call for the remaining Rs. 400 per Share shall be made by the Directors in instalments of Rs. 100 each, at intervals of not less than two months.

The Board of Directors shall consist of six Shareholders, who shall be *bond fide* holders of not less than 20 Shares.

The Meeting on being convened shall elect a Chairman for that Meeting, who shall immediately appoint two Scrutineers, whose report of election of Directors shall be final. The principle of election shall be the same as in the Bank of Bengal, namely—

The Holder of	1 to 4	Shares to be entitled to	1	vote.
„	of 5 „ 9	„	„	2	votes.
„	of 10 „ 14	„	„	3	„
„	of 15 „ 19	„	„	4	„
„	of 20 „ 29	„	„	5	„
„	of 30 „ 39	„	„	6	„
„	of 40 or upwards	„	„	7	„

It having been necessary to obtain legal advice, Messrs. Sandes, Stack and Co., have been engaged as Solicitors, subject to the approval of the Directors.

No applications for allotment of Shares will be received at the Bank of Bengal except those issued by the Projectors, which will bear their *M. S.* attestation.

To defray contingent expenses of advertisements, printing, &c, a fee of one Rupee will be charged for each application.

The account of this little fund will be rendered by the Projectors to the Board of Directors.

Government of India, Foreign Department.

Sericulture in Oudh, by Dr E. Bonavia, Secretary, A. H. S, O.

Showing what progress has been made in the Province of Oudh with regard to the introduction of the Silkworm.

The 1st September 1863.

ABOUT the beginning of 1847* Captain Hollings, who had charge of the Charbagh in Lucknow, introduced the large-leaved China Mulberry plant into that garden. He had formed a small plantation. He had also commenced making experiments with Silkworms, and had actually reared some, but as he quitted the station, and no one undertook to continue the experiments, Captain Hollings' successes did not result in anything. The Mulberry plantation was eventually dug up, and the land used for other purposes.

In 1861, when the Agri-Horticultural Society of Oudh was instituted, I undertook† the propagation of all the kinds of Mulberry trees that were found useful by all those who had tried the rearing of Silkworms.

I discovered that some of the trees of the large-leaved China Mulberry, originally introduced by Captain Hollings, were still in existence in the Charbagh. I procured some cuttings of them and commenced a plantation in the Badshahbagh, consisting of about one hundred plants or so. From these, in 1862, I distributed two hundred cuttings to each District Officer in Oudh, and planted a good number for my own experiments. When the Agri-Horticultural Society's Garden was first commenced at the Secunderbagh, I procured a supply of Mulberry cuttings of the small-leaved and of the cut-leaved‡ China Mulberry from Saharunpore, subsequently. I procured a second supply from the same place, and smaller packets from Mr. Turnbull, of Bengal, and Captain Hutton, of Mussoorie.

This year (1863) I have distributed from the Saharunpore stock, planted in the Agri-Horticultural Society's Garden, as follows:—

Deputy Commissioner of	Oonao ...	400	of two sorts.
"	Seetapore ...	1,000	"
"	Baraitch ...	400	"

A Villager in the Gondah District	...	400	"
Lieutenant Marsh, Lucknow	...	300	of three sorts.
Maharajah Maun Sing	...	600	"
Raja of Oel	...	600	"
		8,600	

In addition to these, I distributed many more of which no account was kept.

Further, the Deputy Commissioner of Fyzabad reports that he has requested the Talookdars of that District to plant each five thousand cuttings of native Mulberry, and has planted himself a large number; and the Deputy Commissioner of Durriabad has to my knowledge been distributing from the Government Garden cuttings of the large-leaved China Mulberry to the Talookdars of his District at the rate of several hundred cuttings each. I also understand that the Deputy Commissioners of Baraitch, Luckimpore, and Sultanpore

* *Vide* Pamphlet "On the Introduction of the Silkworm into the Punjab" by Mr. H. Cope

† *Vide* First Annual Report of Agri-Horticultural Society of Oudh for 1861.

‡ I don't designate the kinds of Mulberries by the Botanical names because I don't think those we are acquainted with have yet been referred to their proper species, possibly they are mere varieties.

have already a large number of plants and are continuing to multiply them.

Mr. Foy, of Fuzlnuggur, reports that he has planted 65,000 cuttings of the native Mulberry.

Major Orr, of Roy Bareilly, is also forming a plantation of Mulberries.

If, as I hope, in other Districts an equal interest is being taken in the multiplication and propagation of this valuable plant, we shall have in the course of a few years the commencement of a large number of Mulberry plantations.

Of course, in the Seetapore District, extensive experiments with Silk-worms are being made on Government account, and Mulberry plants are being rapidly multiplied.

All kinds of Mulberry trees thrive wonderfully in the Oudh soil, and provided we bear in mind the motto on the cover of this pamphlet, I have little doubt that we shall be successful in grafting a branch of industry on this Province, which will require time only to benefit its inhabitants considerably.

The following is an extract from a little work entitled the "International Exhibition of 1862," by John Timbs, p. 263. It refers to a sample of Silk produced from worms of the Cashmere Stock, reared experimentally by Mr. P. J. Carnegy, of Seetapore, in 1862:—

"A small but important display was some "samples of the first Silk attempted to be raised "in Oudh under the auspices of the Indian Go- "vernment. The Silk thus produced is not only "greater in quantity but infinitely finer in "quality than any raised in Bengal; in fact, it is "in every respect equal to the best China Silk."

I need scarcely say that the encouragement contained in the above ought to be sufficient to stimulate us in our undertaking. Be it also observed that I understand the above sample was produced by worms fed solely on the *native* Mulberry leaf, cuttings of which plant are procurable in most of the Districts of Oudh.

The following are Reports to the Chief Commissioner of Oudh on the progress of Government Silk-worm experiments, which he has kindly permitted me to publish.

Report of an Experiment with the Cashmere Silk-worm in the Hurdui District, by C. Lindsay, Esq., Deputy Commissioner.

"During the course of last cold weather I "received a small quantity of eggs from Mr. "Cope, of Umritsur. Owing to various causes the "box containing the eggs was not opened till the "end of February 1863. I found many of the "eggs hatched, but from want of air and food "most of these worms had died. The remaining "eggs were speedily hatched; the last egg was "hatched about the end of March. The worms "were fed four times daily on the common native "Mulberry leaf. (The worms were not fed during "the night). The eggs were hatched in large "wooden boxes, and the worms kept in similar "boxes till they were about an inch long, when "they were transferred to large shallow baskets. "The worms began to spin in the first week in "April; and the first Cocoon was formed about "the 7th. Mr. Carnegy, of Seetapore, kindly gave "me the pattern for the spinning baskets. I "believe they are similar to those used in Bengal. "During the whole period the worms remained "remarkably healthy. I forgot to mention that "the worms were kept in an empty room in my "house. Specimens of the Cocoons have been "forwarded to Mr. Cope, Mr. Turnbull, Mr. Car- "negy, and Dr. Bonavia."

Hurdui, 3rd *May* 1863. } (Sd.) C. Lindsay, *Deputy Commissioner.*

The following is Mr. Turnbull's reply regarding the sample of Cocoons produced at Hurdui:—

"If from the Cashmere stock they have deterio- "rated much. This is not only the case with "yours (Mr. Lindsay's), but with those I receive "from Messrs. Carnegy and Cope. On the whole "I consider your Cocoons very passable, and send "you the Silk reeled from them, which I am sure "you need be pleased with, as it is as good in "every way as what was sent to the Exhibition. "The sixty-nine Cocoons weighed two tolas and "the Silk from them weighs four annas."

The sample of Cocoons sent to me from Hurdui appeared to me good, but they were smaller than my own.

The opinion of the other gentlemen I did not receive from Mr. Lindsay.

The following is from Mr. P. Carnegy, Deputy Commissioner, concerning an experiment made at Fyzabad with the Cashmere Silk-worm:—

Memo. No. 128.

"Dr. Bonavia having asked me for the par- "ticulars of the Silk-worm experiment in this Jail, "I beg to send him abstract of my Administration "Report, in which all my observations are record- "ed. In doing so I have one or two remarks to "make:—

"1st.—The Mulberry plants received from "Lucknow are thriving famously. I am doing "my best to promulgate the species which has "been pointed out to me as the *Morus Multicaulis*, "as it is believed to be the very best.

"2nd.—I do not know whether it has been "brought to notice that the *Phalæna paphia*, "otherwise the *Bombyx mylitta* or *Tussch* Silk- "worm is well known all over Oudh, and is called "by the natives "*Kosswarree*." It feeds upon "the *Byer*, and it has been said also on the leaf "of the *Saul*. It cannot be domesticated, and "takes wing on reaching the moth stage. As far "as I can learn the only use made of the Tussch "fibre in Oudh is as a band for tying the barrels "on to the stocks of matchlocks, but in the neigh- "bouring Districts of Azimgurh Tussch Cloth is "made, and so far back as 1837 there were over "3,000 Silk-looms. The band which fastens the "*Tussch* Cocoon to the tree is as hard as leather.

"Before concluding, I may mention that the "report on my Cocoons by the Agri-Horticultural "Society of the Punjab was as follows:—*Hurdui* "*Cocoons* fair, but somewhat thin. *Fyzabad* "*Cocoons* of a slightly better quality than the "above."

"These Cocoons were taken at random; had I "sent picked ones, the report would of course "have been more favorable, but the estimate "formed would not have been so just a one."

Fyzabad, *The 9th June* 1863. } (Sd.) P. Carnegy, *Deputy Commissioner.*

SILK.

"On receiving the Chief Commissioner's Circular $\frac{12}{1179}$ of 22nd February 1862, I at once "made its contents known to the Talookdars of "the District and indented on Mr. Cope for Silk-"worm seed.

"It had occurred to me that the care of this "experiment might with great advantage be con-"fided to the female Prisoners in the Jail, as being "in every way calculated to suit their strength, "sedentary habits, &c., consequently on the 21st "January, when the seed was received, it was "made over to the women.

"The eggs at once began hatching, but so ignor-"rant were we all of the process that it was not "till the 25th February that the worms lived "and prospered. Many had died before these, "some from the effects of being put on Jail-made "paper, in the preparation of which a solution of "blue stone had been used. On that day a man "returned from Seetapore, to which place I had "sent him to be instructed by my cousin, Mr. P. J. "Carnegy, and from that time all has gone on "well, and few worms subsequently died.

"On the 15th March the first Silk was produced, "and the hatching went on till the 15th "April, when it in a great measure stopped. The "worms remain a month or so in the feeding "state, changing their skin more than once. "Then about two days giving out silk; then in "seven or eight days they are moths, when they "give about thirty-seven eggs each and die.

"Three thousand Cocoons are the result of the "experiment. Of these 600 have been sent to "Mr. P. J. Carnegy to be reeled, and he pro-"nounces them to be "very good ones, about as "good as my own, and better than some sent from "Hurdui." Of the remainder, fifty have been sent "to Mr. Cope, and the rest have been kept for "seed for next year's operations.

"The worms have been fed with the common "country Mulberry, (the fruit of which is dark, "purple and pale green). They had fresh leaves "four times a day, and the refuse leaves were re-"moved every fourth day. I may mention that "while I write (4th May) eggs still go on hatch-"ing, and the feeding and spinning processes are "still in progress, but of course on a limited scale. "I have Cocoons made since the 1st instant, "which seem good, only somewhat smaller than "our best ones, our operations are carried on in "an airy room with glass windows.

"Maharaja Maun Sing and another Talookdar "applied through me to Mr. Cope for seed, but "they were too late in the field. Next year I "hope to supply the Maharajah, who seems to be "much interested in the matter, myself and he "will have the benefit of our experience.

"I think in the introduction of a new product "it is much the surest way of ensuring success to "try it first in the Government Garden and find "out the whole art of producing. This prevents "natives who may be public spirited enough to "move out of the old groove to try experiments "from suffering disappointments, which act very "much as a check on progress.

"We have now arranged for three acres of "Mulberry plantation in connexion with the new "Station Garden, and have got from Dr. Bonavia "a supply of the better sorts of Mulberry in addi-"tion to the native variety, so that in two or three "years I hope to see this important product fully "established in this District.

"Just as I concluded this Report, I received the "following from my cousin on the Silk sent to "him to reel off.

"It is a very good specimen and as good as "any I have seen. The reelers particularly praise "the color. A maund of these Cocoons would "yield about two seers, ten chittacks of Silk, "which would be a very high rate of produce, "the common average in Bengal being about two "seers."

Deputy Commissioner.

FYZABAD,
The 16th May 1863.

Report of an experiment with the Cashmere Silk-worms made on account of Government by Dr. Bonavia, in the Badshabagh, Lucknow, during the year 1862-63. *Also Memo. on small experiments with other Silk-worms.*

Lucknow, 15th June 1863.

On the 17th January 1863 I received five ounces of eggs of the Cashmere Silk-worm from Mr. Cope, of Umritsur and I had brought down from Captain Hutton, of Mussoorie, a small quantity of eggs also of the Cashmere Silk-worm, but reared at Mussoorie.

About the 20th January they began to hatch. I had great difficulty in procuring Mulberry leaves for them, as the trees had not yet begun to bud, and the leaves of the *Morus Multicaulis*, (small entire-leaved China Mulberry) the only one in leaf at that time had been injured by frost. But fortunately in Makkagnuge, a village near Lucknow, a tree more forward than the rest was discovered. It was of a kind which the natives call *Bedana*. From this I procured food for the first worms until the regular crop of leaves came out. I took the precaution to cover the worms at night, as the difference of temperature between the day and night was still very great. I don't know how far this was necessary, but I thought that in making a first experiment it was advisable to take every possible care of them. A large number of the eggs continued to hatch every day. For the first month I had them fed four times a day, and afterwards, when the days became hotter, I had them fed seven times in the twenty-four hours, twice of which were after sun-set. The dry leaves and excrements were cleared away once every day. I don't think it is quite necessary to clean their trays so often, but as I had on the establishment a sufficient number of mens to do it, I was desirous of giving the worm every advantage.

They thrived very well, and were all extremely healthy. The deaths were rare, and the small number that died did so during their first stage when the weather became hotter. I attributed the death of these to the leaves drying up rapidly from the heat of the day.

The place in which they were reared was the Baradaree in the Badshabagh. The archways were closed by *jhamps* and *chicks* to prevent the wind from blowing through the building, and to keep out birds, bats, and insects, especially wasps, which are very inimical to the worms. The *jhamps* and *chicks* kept these animals out very effectually.

The worms were kept on trays, consisting of common *narkool* mats, with a split bamboo frame. The trays were supported in layers on stands made of thin bamboos, tied together with common string. The stands and trays could have been

made more elaborate, but my object in making them of simple construction and of cheap and easily procured material was to shew the natives employed on the Establishment that the whole arrangements for rearing the Cashmere Silk-worm might be easily made up by themselves from materials procurable in all the villages.

The worms went through their usual changes of skin regularly, and began to spin about the 7th March. At this time their condition was very good, so much so that Lieutenant Marsh, of the 18th Bengal Cavalry, who takes an interest in Silk-worms, and who was at the time also making some experiments with them, was so struck with the size and healthy appearance of the worms in the Badshahagh that he asked me to take some of his own under my care until they had spun, which I did. He undertook to send a man to look after them. I attributed the healthiness of mine entirely to plenty of air and plenty of food.

The arrangements I made for the worms to spin upon were of the simplest kind. When the Worms approached their spinning time, dried twigs of *mehndee (Lawsonia Inermis)* were stuck all round the trays between the meshes of the mat, and bits of paper stuck in here and there among the twigs to afford nooks for the worms to creep into. And as soon as the worms which were in the middle part of the tray left off feeding, they crept upon the twigs and spun their Cocoons. In Bengal coils of Bamboo are prepared for the worms. But the advantage * of my method is that it can be used by any villager in Oude. The *arhar* plants, which villagers sow in their fields, will supply the twigs, and any largish dry leaves of any sort will supply the place of the paper.

The best Cocoons were put aside for a supply of eggs for future operations, and the rest were sun-dried for reeling.

In about twenty days after the worms had begun to spin, the moths were emerging from their Cocoons. The moths were kept in shallow boxes covered with netting to prevent their wandering away, but a *chick*, as a cover, would have done just as well.

One of the moths was kept separately, and the eggs it gave were counted. They were 575 in number. The total amount of eggs produced by the moths of the Cocoons kept for the purpose was 11¼ oz.

I apprehend I shall have some difficulty in preserving these eggs in a good condition for next season on account of the excessive heat during the summer months. I have divided them into three portions, and have kept each in a different place and in a different way. I shall be able to say next season which, if any, of these different methods I adopted is the best for preserving the eggs through the summer.

With regard to the quality of the Cocoons, the best were those which were spun before April, as their worms having hatched early had the advantage of the cold weather to grow in. Consequently they grew slowly, their leaves kept fresh for a longer time, and they were vigorous at the time of spinning. Those that spun later, for opposite reasons, produced smaller Cocoons, and the aggregate amount of Silk produced by these Cocoons was comparatively less. It appears that want of vigor in the worm does not so much affect the *quality* as the *quantity* of silk produced.

In order to try how the Cashmere Worms would fare in the hands of the villagers, I constructed a small hut of grass with a common thatch against a wall with northern aspect, having only a chick to close the door. I placed, as soon as they hatched, several thousands of worms in it on trays, as before, and fed them in the hut till they were ready to spin. None of them died. They produced smaller Cocoons than those reared in the building, (which I attribute to the hut being hotter) but their Silk appears to be just as good. To test further the possibility of villagers rearing Silk-worms at their own homes, I gave a small quantity of eggs to a man named Sooklal, son of Lukeer, of Gungrowlee, in the District of Gonda, to whom I had the previous year given about 200 cuttings of the Mulberry plant. I told him to put the eggs in a small bottle, and wrap it in a piece of rag to be kept wet until he got to his village. This arrangement was intended to keep the temperature of the bottle low, in order to prevent the eggs from hatching on the road. It appears to have answered admirably.

His Mulberries, on arrival, had not begun to bud yet, as it was early in the season. With difficulty and perseverance he hunted about for Mulberry trees, and found some about two *kos* from his village. From these he fed his worms until his own Mulberries bore leaves. He stuck long pegs into the wall of his hut, and placed on them trays made of *Sirkee*, on which he fed his worms. At the time I gave him the eggs I never thought he would be successful in rearing them, but to my astonishment he one day brought me a lot of Cocoons, the majority of which were in every respect as good as mine. Another lot which he brought me later on account of the heat were not so good.

There can be no doubt as to his having actually reared them, as he possesses certificates to that effect from several *Lumberdars* who saw them, and Captain Ross one day saw some of the worms in his *Cutcherry* at Gonda, which the villager had taken to shew him. This man was with me for about a month during the time I was carrying on a small experiment with the China Silk-worms. He took great interest in the business, and I was therefore induced to let him try his hand at the Cashmere Worm unassisted. For his successfully rearing these Silk-worms under difficulties, the Chief Commissioner has been pleased to grant him a reward of Rupees 20. I consider this villager's success the most interesting portion of my experiments, and it is certain to do a great deal in spreading the culture of Silk-worms among natives.

Lastly, I made a totally different experiment with the Cashmere Worms. I placed about 1,000 of them about a week old on Mulberry plants in the open air, but after a few days not one of them was left. The worms having been for many generations fed upon trays appear to have lost, to a great extent, the use of their muscles, as the shaking of the trees by the wind knocked them

* In later experiments with the China Worm I had by the assistance of a Bengalee reeler made up some spinning trays, Bengal fashion, and I have no doubt that they will be found the best.

off quite easily. They had not the power to hold on, and very few of them attempted to creep under the leaves to avoid the heat of the sun. A boy scared away birds and insects from the trees. However, if a few trees are planted in a sheltered place and protected from the sun, a number of worms may be successfully reared in the open air, from which a hardy race of worms may be bred. If at the same time selection and hybridization are brought into play some wonderful results may be obtained.

With regard to the kind of leaf I used for feeding the Silk-worms, I am of opinion that the China Mulberry with large and crumpled leaf is the best for the first stage of the worms. They eat it greedily, while at that stage they don't appear to care much about the other kinds, although of course they eat them when they have no other choice. After the first stage the native Mulberry leaf which is called *Dasie* is the best. It is more consistent than the others, and therefore dries less quickly, which is always a great advantage; at the same time the worms in their older stages like it very much. I cannot say I think very highly of the leaves of the *Morus Multicaulis* (or small-entire-leaved China Mulberry) for the Cashmere Worm. But it may be very useful if the eggs are forced to hatch early by artificially increasing the surrounding temperature, as it is the only one I know of which produces tender leaves during the winter, but then it must be protected from the frost.

I must here express my sincere thanks to Nawab Mosim-od-Dowlah Bahadoor for the kind and ready assistance he has given me in allowing me to use the leaves of about 100 native Mulberry trees which he possesses in Makkagunge, and without which I could not have fed all my worms. The number of men employed were 24, as follows:—

From Lucknow District	...	...	10
From Gonda District, Gungrowlee Village			9
Durriabad District	...	...	3
Sultanpore District	...	...	1
Hurdui District	...	...	1

All these men were not necessary to look after the number of worms I was rearing, but I considered that the greater number that could become acquainted with Silk-worm culture the better, and as all the men asked for from the different Districts of Oudh were not sent, I employed some that were willing to learn the business from Lucknow and Gonda Districts.

Mr. Turnbull very kindly sent me a reeler on Rupees 15 per month, and a year's engagement, and also paying his expenses from and to Calcutta. He was not procurable under cheaper terms.

He arrived in Lucknow on the 2nd May 1863, long after the worms had spun, so that I did not keep all the men to see the reeling, but selected six of the most intelligent, and who appeared to take an interest in the business.

There should properly speaking have been two reelers, one to throw the threads of the Cocoons, and the other to reel. But I found a great advantage in having only one, because, as he was put to great inconvenience by not having proper assistance, he took great pains in teaching my men, two of whom, more intelligent than the rest, learnt the art in a week; so much so that the Bengalee reeler, after that time allowed them to reel, and he only looked on, his face indicating a slight trace of disgust at my men having learnt the work so quickly, I have no doubt that by a little practice they will be able to reel as well as their teacher. Of the Cocoons that were spun early in the season, 1 lb contained on an average about 1,037 Cocoons, and about 5,200 Cocoons produced 1 lb of Silk.

Of those that were spun later, 1 lb contained more than the above, and it took a larger number of Cocoons to the lb of Silk.

Upon an average 5 lbs. of Cocoons produced 1 lb of Silk.

The total weight of Cocoons produced during the season, exclusive of those kept for eggs, was 15½ lbs., and the amount of Silk reeled from them was 2 lbs. 12½ oz., also 1 lb 7 oz. of refuse Silk, which the reeler calls *Choshum*, and which is saleable and used for coarse fabrics.

I cannot say how much Silk can be expected to result from a given amount of eggs under favorable circumstances. Unfortunately, I omitted to weigh the eggs sent to me by Mr. Cope. Although I do not in the least doubt the words of Mr. Cope as to their having been 5 oz., still, as I could not be scientifically correct, I would rather leave the decision of this point to future experiments. Besides, a small quantity of eggs which Captain Hutton kindly gave me got mixed up with those procured from Mr. Cope.

The temperature in the Baradaree ranged from 72° to 82° up to April, after that it was hotter.

One might now ask.—What advantages have been gained by this experiment with Silk-worms?—the following: —

The knowledge that the Cashmere Silk-worm can live and produce good Silk in Lucknow, that the native Mulberry, common to the Province, is quite sufficient as a feeding material, though other kinds may be very useful. Twenty-four natives from different parts of Oudh, who never saw a Silk-worm before, (and who had some idea that Silk was produced by a plant like other fibres), have become acquainted with Silk-worm rearing, and six of them with the mode of reeling. Two of the latter have become reelers, by means of whom many others may be taught.

These men will disseminate the germs of a new trade in Oudh. They have learnt that they have the power in their hands of creating this new trade, and with it a new means of living quite different from the ways handed down to them from father to son. This alone is of sufficient importance. It will be the means of rousing them from that apathy which generations of oppression and prejudice have engendered. All these advantages will result, provided we discover some means of preserving the eggs during the hot months.

I sent some of the Cocoons produced during the above experiment, and taken at random, to Mr. Turnbull, Mr. Cope, and Captain Hutton. The undermentioned are the replies I received:—

From Mr. Turnbull,

"Your Cocoons have arrived, and they are certainly *very fine*, and better than Mr. Lindsay's (Hurdui), though they have deteriorated much."

Mr. Cope pronounced the sample I sent him "of very fair average quality."

Captain Hutton wrote the following in reply :—

Mussoorie, 9th June 1863.

My Dear Dr. Bonavia,—"The box containing Cocoons of *Bombyx Mori*, reared from Cashmere stock at Lucknow, reached me safely a few days since. The size and hardness are precisely what may always be expected in Cocoons reared in the Plains, whether at Lucknow, or in the Punjab; and the number of these that were required to produce a seer of Silk shews how greatly they have degenerated below the European standard.

You tell me that 10,400 Cocoons produced one seer of Silk, *ergo* 5,200 went to the lb.; while in France, previous to the late epidemic, 2,500 Cocoons produced that quantity. Hence yours are more than 50 per cent. below the late European standard. According to Mr. Turnbull's Report of last year, I think he said Mr. Cope's Cocoons were 56 per cent. below the Cashmere standard, and as these are certainly very inferior to the European, I am inclined to regard all Cocoons reared in this country from Cashmere stock as at least 75 per cent. below what they ought to be, and would be were it possible to eradicate the numerous diseases by which the worms are overwhelmed. It is a folly to contend that some are not diseased, for all are so, as is shewn in the wide departure from the natural color, proving that the constitution of the worm has been completely undermined by a long course of "breeding in and in." Various diseases have arisen in consequence, and the only remedy that can be effectual in restoring health will consist in causing the worm to *revert* to a state of nature. Upon this I am now engaged, and with a very fair chance of ultimate success.

In your climate, or in any part of the Plains, no good can be expected in the way of adding strength. The worm will always degenerate from the heat it must endure, and hence, if you continue to cultivate Lucknow bred stock, your worms will go from bad to worse. Your only plan will be to procure every year a fresh batch of eggs from a cooler climate, from Cashmere if possible, until we can establish supplies in the Hills.

There is no reason however to be discouraged in your attempt if you find the present Return remunerating. You can never hope to compete with colder climates in the amount of Silk produced, but unless the secreting glands become affected, which at present does not appear to be the case, the quality of all our produce from this stock will remain the same or nearly so. It is in quantity only that you will be deficient. When I say *quality*, I do not allude to the thickness of the fibre, because that is regulated by the size of the orifices in the lip through which the gum is compelled to pass from the reservoirs. As long as these reservoirs contain gum, the fibre will be of the same thickness, but it does not follow that elasticity and other qualities are regulated by the orifices. Indeed, we know that they are not, but are dependent upon temperature and the quality of the leaf. The thickness of fibre will increase or diminish with the size of the worm, and the quality will be regulated by feeding and temperature. In the fineness of the fibre I recognize decrease in the size of the worm arising from degeneracy. Some regard the fineness as an advantage, but then they look to the market, while I look to the health of the insect. You will, I think, find that the quality of your Silk this year will be the same as that of the Punjab, and of mine at Mussoorie, but in a year or two our climate will tell, and we shall leave you far behind in the amount of produce from equal numbers of Cocoons. As to the difficulty of introducing the worm either into Oudh, Rohilcund, the Punjab, or any other part of India, there is absolutely none, and never has been, provided *funds* were available. The worms may be reared with very tolerable success wherever the Mulberry thrives, provided care as to temperature be bestowed. Upon this point there has been a very great and unnecessary outcry and self-laudation in some quarters, for the only things necessary to insure the introduction of the worm with a reasonable chance of eventual profit are *funds*, and attention in rearing. Depend upon it that with perseverance and proper attention to the speculation you will succeed to your satisfaction. You have asked for my opinion, and I have given it candidly, though I speak rather as a naturalist, than as a mere speculator."

Your's sincerely,.

(Sd.) Thomas Hutton.

Memo. of a small experiment with the China Silk-worm.

On the 14th November 1862, I received a small quantity of eggs of the China Silk-worm from Mr. Turnbull.

They hatched on the 18th November 1862.
Cast their first skin on 27th Ditto „
„ second „ 3rd December „
„ third „ 11th Ditto „
„ fourth „ 22nd Ditto „
Began to spin on 8th January 1863.

A very few worms died when quite young. The nights were frosty, and I took the precaution to cover the worms at night with sheets of paper to prevent the cold from killing them. I did so because this worm was not acclimatized in Northern India, but has been reared for many generations in Bengal, so that it was necessary to give it every possible advantage in rearing it for the first time.

The worms grew very well. A small proportion died when they were ready to spin, others had already spun a thin layer of Silk round themselves, and then died in the caterpillar state. Some spun a thin layer of Silk and changed into a chrysalis, and finally the majority made apparently good but small Cocoons. Only two weak moths came out of the Cocoons, which I had kept for eggs, and on inspection I found the chrysalis of all the others dead. I sent a number of the Cocoons to Mr. Turnbull for his opinion as to their quality, and the following was his reply :—

"I will be candid, and tell you your Cocoons are what we consider rubbish, and unfit to reel."

So that as far as Silk was concerned this first attempt with the China Silk-worm was a failure. But as I knew the cause of the failure, I was not at all disheartened. The worms as I said hatched in November, a time at which the leaves of all the Mulberry trees excepting the *Morus Multicaulis** turn yellow and drop off. One can easily imagine that such was not the proper food for producing good Cocoons.

* Small entire-leaved China Mulberry.

The *Morus Multicaulis*, it is true, had good and tender leaves, but one frosty night disposed of them all at once. So that the unfortunate worms were obliged to choose between half-withered leaves and leaves injured by frost. Add to this, the coldness of the nights which in November, I should say, are very different from the Bengal nights, and the cause of failure is anything but difficult to understand. Nevertheless the worms lived with a very small mortality up to the spinning time, and most of them spun, which indicates a certain amount of hardiness, but the spontaneous death of the chrysalis within the Cocoons was sufficient indication of their general unhealthiness.

If plants of the *Morus Multicaulis* are planted in a sheltered place so that they may not be injured by frost, there will be plenty of leaves in the winter months, and then, I don't think, there will be much difficulty in acclimatizing the China Worm.

N. B.—About the 23rd June 1863 I again received some eggs of the China Worm from Mr. Turnbull. They hatched on the same day. They were spinning on the 10th July, and the moths came out on the 18th July. The eggs of these were again hatching on the 25th July, and on the 16th August 1863, the latter were again spinning. They produced very good Cocoons, which the Bengalee reeler said were equal to the Bengal ones of China Stock. They have been reeled, and the Silk appears to be very good.*

This worm in Bengal produces about seven crops in the year, and it appears to suit the climate of Oudh very well in the rains. We shall have some difficulty in keeping it through the winter, but not such as cannot be overcome by proper arrangements. I dread the hot winds more than the winter.

On the 21st July, I sent a small supply of eggs of the China Silk-worm to each Deputy Commissioner in Oudh, with no other object, at present, than that the natives of the district may acquire some idea of the nature of the Silk-worm, and thus understand the reason for which we are so anxious that they should plant Mulberry cuttings.

Memorandum of a small experiment with the DASIE *Silk-worm.*

On the 19th December I received some eggs of the *Dasie* Worm from Mr. Turnbull. They hatched on the 23rd December, and all died within the period of their first stage. I have not been able to discover the cause of their death, probably cold and bad food. Some of them lived till the period of their first change of skin, but were not able to throw it off completely, and so they died. Further experiments with this worm at more favorable seasons may end in better results.

Memorandum of small experiment with the MADRASSEE *Silk-worm.*

On the 26th May 1863 Lieutenant Marsh, of the 18th Bengal Cavalry, sent me a considerable number of young worms which had just hatched, of the *Madrassee* kind, and which he had received from *Partipore*. They all dried up within the first two days from the excessive heat and dryness of the atmosphere. The temperature within doors was 92°.

---

* 1 lb 7½ oz. of this Silk have been reeled by two natives of Oudh.

Memorandum of some experiments with the Tussur Cocoons.

A short time ago the Chief Commissioner of Oudh sent me a number of *Tussur* Cocoons obtained from the Rajah of Oel, which the natives call *Kooswaree*, for the purpose of making experiments upon them. The worm which produces this Cocoon feeds on the "*Byer*" leaf *(Zizyphus Jujuba)*. Many of the moths came out of the Cocoons, but unlike those of the Mulberry Silk-worm, the male, when in confinement, does not take any notice of the female, so that the eggs laid by the latter are useless.

Continued and varied experiments may lead to the discovery of some mode of domesticating this valuable insect.

Another difficulty is in reeling the Cocoons of the *Tussur* Worm, as they don't reel in the same fashion with those of the Mulberry Silk-worm. I managed to get some of them reeled by burying them in a mixture of charcoal ashes and water for a few hours, in order to dissolve the gum by which the threads adhere to each other and which is not even softened by the common process of steeping in hot water.

The Silk is of a light brownish color and appears to be very fine. I sent some of it to Mr. Turnbull for his opinion, and the following is his reply :—

"I have re-wound the silk, and it winds very well, the threads is 10-12, or crape size. The only drawback to that description of Silk is that it won't take the dye."

Notes on the production and food of Silk-worms called "Tussur" by the Rajah of Oel.

"At the end of May the moths leave their "chrysalis and commence laying. The eggs are "hatched after nine days, and the worms are fed "on the leaves of two descriptions of plants, *viz.*, "the "*Beree*" and "*Korou*" or "*Sukhoo*," and "about a month after the worms form their Co- "coons, within which they remain for about twenty "or twenty-five days, and leave them at the end of "September and begining of October, and com- "mence laying as above stated. The young worms "from them make their Cocoons in the beginning of "October and November, which are kept for eight "months, when, atthe end of May, the mo hs leave "them, thus giving two crops. In this Province "there are no reelers. To the east, *viz.*, in Gya, "there are several; moreover, in this District the "generality of the people are not acquainted with "the method of rearing Silk-worms, but I have "extended the cultivation."

The above Notes were forwarded to me by the Chief Commissioner of Oudh.

Report on Silk-worm experiments made on account of Government at Seetapore, by *P. I. Carnegy.*

"In all, five varieties of Silk-worms have been "reared, *viz.*, *Cheena* and *Dasie* Worms from "Bengal eggs; *Cashmere* from eggs direct from "Cashmere. Worms of the stock acclimatized at "Lahore, and Worms from eggs saved at Secta- "pore last season.

"Of the above varieties, the *Cheena*, received "from Mr. Turnbull, of *Ghatanl*, were the first "reared. The worms, a small quantity, were "hatched almot simultaneously on the 10th of "November, and continued healthy until they "formed Cocoons, although at that time fresh "tender Mulberry was very scarce. The Cocoons "formed were of average quality, rather inferior "in quality to the original stock, but superior in

" size. Their success proves that Silk culture can " be carried on in Oudh during the cold weather. " Of the second variety, *Dasia*, I received a small " quantity of eggs from Mr. Turnbull. These " eggs almost all hatched on the 29th December, " the worms were upon the whole healthy, and the " Cocoons produced by them were fully equal to " the Bengal stock.

" On the 20th of January I received twenty " ounces of eggs from Mr. Cope, of Umritsur. " Ten ounces were from stock acclimatized at " Lahore, and ten ounces from Cashmere. The " former shewed symptoms of hatching as soon as " they reached Seetapore, but I retarded the " hatching as much as possible until the middle " of February, when fresh leaves were procurable. " By the beginning of March almost all were " hatched, and only about a thousand eggs left. " The worms throve well, and the Cocoons pro- " duced were on the average equal to those so " highly reported on by Mr. Turnbull last year.

" The Cashmere eggs did not begin to hatch " until March, and have hatched very irregularly, " at the present time at least 30 per cent. remain " unhatched, though two or three worms come " out daily. The worms have not been quite so " healthy as the other varieties, but the Cocoons " have generally been very superior and slightly " heavier than the Lahore Cocoons.

" The eggs saved at Seetapore last season have, " like the Cashmere ones, been irregular in hatch- " ing, and about 25 per cent. are still unhatched. " The worms, however, have been pretty healthy, " and have produced good Cocoons, which are as " heavy as the Cashmere ones. All the Cocoons " spun after the middle of April are inferior to " those spun before, but the falling off has not been " so great as it was last year, and the Cocoons pro- " duced even now will, I believe, be found to " yield a very good quality of Silk.

" Since the middle of February there has been " a plentiful supply of Mulberry procurable, and " the worms have been fed both from the leaves " of the shrubs planted in the public Garden last " season, and from the trees growing about the " Station. The leaves of the *Morus Multicaulis* " growing in the Garden are much the finest and " largest, and the worms relish them much.

" Besides the men taught to rear Silk-worms in " Seetapore, men from Oel, Biswah, Mahoomda- " bad, Hurdui, Fyzabad, and Aurungabad, have " been taught.

" The Rajah of Oel asked for eggs, and suc- " ceeded in rearing some very good Cocoons. He " sent me six hundred to be reeled off, and asked " for more worms. Mr. Lindsay sent a small " quantity of Cocoons from Hurdui to be reeled " off. The Silk produced was very superior, " especially in color. Six hundred Cocoons from " Fyzabad have been reeled with an equally good " result. Small quantities of Cocoons have been " received from Biswah and Mahoomdabad, but " they were not so good as the others, apparently " they had been under-fed.

" The Bengalee reelers who arrived on the 7th of " May were not able to commence reeling Silk " until the 1st of June, owing to the necessity of " erecting the necessary apparatus. Unfortu- " nately the basins used for reeling, which the " men brought with them, were broken, and those " made here to re-place them also broke on being " used, and it was not till the date above men- " tioned that the reelers fairly got to work.

" The Silk produced I now forward to you.* " It consists of forty-two skeins, weighing three " seers and one and a half chittacks. Of this " quantity I have packed up thirty skeins, " weighing two seers and four chittacks, for trans- " mission to England. This consists of ten skeins " of each of the following kinds :—Silk from " Cashmere eggs ; Silk from eggs acclimatized at " Lahore ; and Silk from eggs acclimatized at " Seetapore. The remainder, twelve skeins, " weighing thirteen and a half chittacks, I send " loose, and from it you will be able to judge of " the quality of the Silk. That from Cashmere " eggs I consider very fine, especially in color ; " in that quality it is superior to the other two " samples, both of which are very much alike, " and both appear to me very good Silk. The " thread is finer than the Cashmere, it being of " that quality called 5-6, while the Cashmere is " 6-7, or one Cocoon coarser.

" I also forward a few small skeins of Silk reel- " ed by men of this District. The white skein " was reeled by the head Mullee of the public " Garden, and is really very good Silk, and with a " little more teaching the man would be a very " good reeler. The other skeins are about as good " as the Silk commonly reeled in the native fila- " tures of Bengal. Two men sent by the Oel " Rajah reeled a little Silk, and the Rajah has " promised to send them back when there is any " more Silk reeled here. He has taken much in- " terest in the experiment, and the worms he " reared turned out very well. Two men from " Fyzabad also reeled off a few Cocoons. I also " send one seer and twelve chittacks of *chussum*, or " refuse Silk. It is the outer floss of the " Cocoons, and from it a great deal of the common " Silk cloth is made in England. Its value is " about 40 Rupees per maund.

" There is in addition about half a maund of " Cocoons which would not reel off properly, and " from which a coarse kind of Silk can be made. " It is from this Silk the cloth commonly known " as Bhaugulpore Silk is made. Its value is about " five Rupees a seer.

" I have received from Bengal a supply of the " Bengal Monthly Worm. These eggs hatched " on the 24th instant, and I made over the " worms to the Bengalees. They are thriving " very well, and I believe the rains will be found " a very favorable season for rearing Silk-worms " in Oudh.

" I am sorry to report that the outturn of " Silk has not been nearly so large as I expected. " The Silk reelers did not arrive till late in the " season. As you are aware, a delay of a month " was caused by Mr. Palmer not forwarding the " money for the reelers to Mr. Turnbull. When " the men did arrive, there was another delay for " the reasons before stated. In the mean time " the Cocoons had been kept for a long time, and " when the damp weather set in, a great portion of " them become injured by the chrysalis inside " rotting, and rendering the Cocoon unfit to reel " off. Besides, when Cocoons are kept for any " length of time, the produce suffers very much. " The Cocoon spun after the hot weather set in " were of rather inferior quality too. It is to " these reasons I attribute the falling off in the " quantity of Silk. In future, however, things " promise a very different result, as the reelers are

"on the spot, and all the necessary apparratus "ready for reeling off the Cocoons as soon as they "are spun. I would also venture to hope that the "quality of the Silk will be found to make some "amends for the smallness of the quantity.

"Five ounces of eggs have been saved for next "season. The Cocoons from which the moths "have eaten out their way fetch a good price in "England, and I would suggest that a few might "be sent in the box with the Silk to find out "what they are worth."

Seetapore,
17*th May* & 27*th June* 1863.

In conclusion, I think there can be little doubt about our ultimate success, but what is immediately wanted is the propagation of all kinds of Mulberry trees, more especially the native kind. The China varieties are very useful, and I should add to a great extent indispensable. As almost all the natives of Oudh are entirely ignorant of the nature of the Silk-worm, and, as I said before, have not the slightest idea that Silk is produced by a worm, but that like other fibres it is produced by plants, the only way to make them acquainted with it is for them to see it in its various stages, and see the worm produce the Silk. This will be greatly facilitated by little independent experiments in various parts of Oudh, even of a private nature, and with not more than a few hundred worms. The incredulity of natives will scarcely be believed. They are accustomed to hear such falsehoods from their own countrymen that without actually seeing the Silk produced by the *worm*, they put the fact down among the category of the *usual* items of information. I was much amused to hear natives talk about the Silk-worms when I first brought them to their notice. I heard one of them say: "*Sahib kahta hai ke in kiron se reshum paeda hogo, lekin dekha chahiye,*" which in plain English meant that he would not believe it before he saw it.

All that these little experiments can do just now is to create a desire for the propagation and multiplication of the Mulberry plants. By the time they are well diffused throughout Oudh, and several plantations commenced, (without which no Silk for commercial purposes can be produced), those who are making experiments on a large scale, on Government account, will have a number of experienced natives to distribute over the Province and to teach commercially the culture of the Silk-worm. Let us though not expect too much at once, lest we be disappointed.

The following instructions may be of use to those who are not acquainted with the rearing of Silk-worms:—

Cashmere Silk-worm.

The eggs of this worm are loose, that is, when deposited they don't adhere to the object on which the moth lays them. When first deposited they are of a yellowish white color, and the good ones a few days after turn grey.

They begin to hatch about the middle of January, or beginning of February, and produce only one crop in the year. Their hatching will be retarded or accelerated according to temperature. They can be forced to hatch earlier than they would naturally do by artificially increasing the temperature of the place in which they are kept, but there will be no object in doing so unless leaves can be procured to feed them earlier than the usual time at which Mulberry trees left to nature commence to bud. The small-leaved China Mulberry, if properly protected from the frost, will remain in leaf throughout the winter.

The time the Cashmere Worm takes from hatching to spinning is about forty-six days.

This period will vary according to temperature. A higher temperature than usual will cause them to go through their changes more rapidly, and will also be the cause of diminishing the quantity of Silk each worm produces.

As soon as they hatch tender leaves are to be placed upon them on which they rapidly creep. They change their skin four times, and while they are moulting they don't feed, and therefore it is unnecessary to give them leaves. They don't require to be handled at all. Wet leaves should on no account be given to them. They should be fed several times in the day, and I think feeding them once or twice in the night also is a great advantage. They can be kept on trays made of any kind of matting, and as they increase in size they are to be distributed over other trays. They should not be too crowded. When they are removed from one tray to another, the leaf on which the worms are attached is to be lifted with the worms on it. The dry leaves and excrements ought to be removed occasionally. This can be easily effected by placing fresh leaves on the worms, and, when they creep on them, remove them to a clean tray. It must not be forgotten that Silk-worms have many enemies, such as ants, wasps, birds, &c., from all which they must be secured. When they are ready to spin, their skin is tight and their usual color changes into a pinkish one. At this stage they are sufficiently large to allow of their being handled. They are then to be placed wherever they are intended to spin. The spinning lasts three or four days according to temperature, during which time they must not be interfered with. When the Cocoons are fully formed, they can be removed from the spinning places. Those which are intended for Silk are to be exposed to the sun or otherwise sufficiently heated in order to kill the chrysalis, which is the form the worm acquires after spinning, and whch otherwise would come out in the shape of a moth and spoil the Cocoon for reeling purposes. Those which are intended for eggs must be kept in a cool place. As a rule, the Cocoon containing the female chrysalis is larger than the one which contains the male. Some days after the Cocoons are fully formed the moths emerge,* they pair, the female lays her eggs, and in a few days both male and female die. The eggs are then gathered and put in a dry and cool place for the ensuing year.

For spinning purposes, if the experiment is on a small scale to shew natives the nature of the insect, &c., any thin twigs will do, such as the twigs of dried *arhar*, &c., fixed round the trays upon which the Cashmere Worms will of their own accord creep when they are ready to spin.

The Bengal spinning trays will be found the best, as the worm is allowed a definite space to spin its Cocoon in, and so it is forced to make a compact Cocoon, and thus economizes its Silk. Among the twigs many of the worms get into a large space and spin a large and thin Cocoon, which does not reel so well as a small and compact one.

---

* The moths should be placed on a sheet of paper or pieces of cloth, in order that the eggs may be easily collected.

It must be remembered that, in any case, if the worms are too crowded during spinning time, they often spin *double* Cocoons, that is, two worms spin into one Cocoon, which not being composed of one thread is not reelable.

CHINA SILK-WORM.

This is smaller than the Cashmere Worm and differently marked. From the time of hatching to the time of spinning, during the rains, it took seventeen days.

It is to be treated in the same way as the other. In Bengal during the first stage, the China Silk-worms are fed on leaves cut up into thin strips by means of a knife, and they are kept up to their first change of skin in shallow earthen pans (gumlahs). They are regularly fed four times in the day and twice at night, and not touched till they change their first skin, when whole leaves are placed upon them, and as soon as they creep upon the leaves they are removed to clean trays. The old leaves and excrements are only changed at each moult.

The eggs of the China Worm adhere to the object on which they are laid, and therefore the female moths after pairing must be placed on sheets of paper a little distance from each other. The eggs of this worm will hatch again in about eight or nine days after they are laid.

In Bengal it gives about seven crops in the year.

Temperature has great influence in retarding or accelerating the period of its existence. Those that hatched in June took seventeen days, and those that hatched in November took fifty-one days to go through all their changes.

The above is intended only to give some idea of rearing Silk-worms, but those who wish to learn more about them can easily obtain a small quantity of eggs, and observe the worms while going through their various stages.

PROSPECTUS
OF
THE VICTORIA BANK OF CALCUTTA,
"Limited."

The undersigned believe that there is ample room for a Loan and Discount Bank in Calcutta, which, if administered on true principles, will doubtless prove a source of profit to the Shareholders.

The enormous resources of the country are being rapidly developed by the introduction of European capital, skill and enterprise, and as new undertakings are daily brought forward, the demand for money increases. Among the numerous Companies that have lately started into existence, it is certain that there are many connected with the development of the agricultural and industrial resources of the country, which, if properly carried out, will be found well deserving of encouragement and support. To afford such support will be the primary object of the Victoria Bank, and with this view the following project for forming a Joint Stock Bank, on the principle of Limited Liability, is submitted to the Public.

The Capital of the Victoria Bank of Calcutta "Limited" is to be Rs. 50,00,000 with power to increase.

The Capital to be divided into 10,000 Shares of Rs. 500 each.

The Projectors reserve the privilege of appropriating among themselves 1,000 Shares; the remaining 9,000 Shares are offered to the Public.

The Bank of Bengal will commence receiving applications for Shares at noon, on Monday, the 23rd November 1863, each application to be accompanied by a deposit of 20 Rs. per Share.

Applications for more than 200 Shares will not be received from any one individual or Firm.

The First Call of Rs. 80 must be paid also to the Bank of Bengal within 10 days after allotment, failing which the Deposit will be liable to forfeiture at the discretion of the Board of Directors.

It is proposed that within one week after the First Call has been paid, a Meeting of the Shareholders be convened (of which three days notice will be given) for the purpose of nominating a Board of Directors. No Shareholder who has not paid the First Call shall be entitled to vote at such Meeting. Voting Cards will be supplied by the Projectors to all Shareholders who shall have duly paid the First Call; such Cards shall be signed by Shareholders intending to vote, and delivered to the Chairman at the Meeting. No votes tendered in any other manner will be received.

The Directors shall appoint all Office Bearers, and do everything needful to carry on the operations of the Bank.

The Call for the remaining Rs. 400 per Share shall be made by the Directors in instalments of Rs. 100 each, at intervals of not less than two months.

The Board of Directors shall consist of six Shareholders, who shall be *bonâ fide* holders of not less than 20 Shares.

The Meeting on being convened shall elect a Chairman for that Meeting, who shall immediately appoint two Scrutineers, whose report of election of Directors shall be final. The principle of election shall be the same as in the Bank of Bengal, namely—

The Holder of	1 to 4	Shares to be entitled to	1	vote.
"	of 5 " 9	"	2	votes.
"	of 10 " 14	"	3	"
"	of 15 " 19	"	4	"
"	of 20 " 29	"	5	"
"	of 30 " 49	"	6	"
"	of 40 or upwards	"	7	"

It having been necessary to obtain legal advice, Messrs. Sandes, Stack and Co., have been engaged as Solicitors, subject to the approval of the Directors.

No applications for allotment of Shares will be received at the Bank of Bengal except those issued by the Projectors, which will bear their *M. S.* attestation.

To defray contingent expenses of advertisements, printing, &c, a fee of one Rupee will be charged for each application.

The account of this little fund will be rendered by the Projectors to the Board of Directors.

Darjeeling Cart Road.

Memorandum by CAPTAIN J. G. R. FORLONG, Officiating Superintending Engineer, Northern Circle, on the Darjeeling Cart Road,—(Dated Purneah, the 16th October 1863.)

THE Assistant Engineer of the Upper Section, Ganges and Darjeeling Road, has been directed to repair the broken Bridge across the Mahanuddee at Silligoree, but several other petty repairs are required to the old Terai and Ghât Road and its Bridges, which should be done in the first week of November by the Executive Engineer, Dinagepore Division.

2. I carefully inspected the mountain line up to its northern extremity, the Darjeeling Bazar, and every thing is progressing well, and all is now a mere matter of time.

3. There is now no lack of labor southwards; indeed, it is likely to be in great abundance this year, although during winter more abundant in Mr. Steel's Section (the Lower from Kurseon to the Terai) than in the two Upper.

4. The Upper or First Section, which is only four miles long, ought to be finished by about the end of April, and the Second or centre Section of fifteen miles by end of December, after which only about 500 Rupees per mile per annum will be required for its maintenance and the removal of slips, &c. These must take place for some few years. There will also be the repairing or renewing the culverts and revetment walls, which being all built of loose unhewn stone cannot be expected to stand very well.

5. It is probable, indeed, that most of these will have eventually to be built pucca, the first pressing object of opening the line to the Public having been obtained.

6. Protective walls or posts are also much required nearly everywhere on the low side; they should be put up during the next monsoon. It will be most unsafe to let carts on to the road without these.

7. As a whole this great work is a model of mountain road-making, and surpasses in accuracy of gradients seldom over 3' in 100' and never over 4' in 100,' and the grandeur of its cuttings and escarpments any of the Alpine lines of Europe. It remains to surpass them in its works, which it can only do when the present dizzy heights and depths, which it so fearlessly traverses, are compassed by handsome pucca works.

8. It is impossible to give a correct estimate of the cost of such a work, but from the past I should think that the mountain line from the Terai to the Darjeeling Bazar, about thirty-six miles, will not be under £1,800 per mile, and probably £2,000, say 6¾ lacs of Rupees, which is cheap in comparison with the Alpine and even many of the Highland lines through Scotland.

9. I would urge that no change whatever be made in the establishment of this Road. The two Assistant Engineers thoroughly know their work and none others do. Their names are also a tower of strength amongst the wild tribes of mountaineers whom they have to deal with.

From LIEUTENANT-COLONEL W. MAXWELL, R. A., Officiating Secretary to the Government of Bengal, in the Public Works Department, to the Superintending Engineer of the Northern Circle,—(Fort William, the 9th November 1863.)

I HAVE the honor to acknowledge the receipt of Captain Forlong's Memorandum on the Darjeeling Cart Road, No. 1364½, dated the 16th ultimo, and to state, with reference to the suggestions made in the 4th and 5th paragraphs thereof, that the Lieutenant-Governor does not consider that it will be necessary to re-place the present culverts and revetment walls with permanent masonry; but His Honor thinks that parapet walls are absolutely required everywhere along the line of road where danger may be apprehended, and I am to request that Estimates for the same may be submitted.

2. The Lieutenant-Governor has much pleasure in noticing the favorable testimony borne to the exertions of the Assistant Engineers, Mr. H. Dowes and Lieutenant Steel, R. E.

XXVIII. It shall be lawful for the Lieutenant-Governor of Bengal, by notification in the Calcutta Gazette, to extend the operation of this Act to any Jail or Jails that may hereafter be placed under the control of the Government of Bengal.

Commencement of Act.

XXIX. This Act shall come into operation on the day of

Statement of Objects and Reasons.

In most of the Districts and in many of the Sub-Divisions of Districts under the control of the Lieutenant-Governor of Bengal there are Civil and Criminal Jails for the reception of prisoners committed to Jail by the Civil and Revenue, and by the Criminal Courts respectively. There is also a Central Jail at Alipore, and a Great Jail, comprising a House of Correction, in Calcutta.

Under the Law at present in force the control and superintendence of all District Jails, including the Central Jail at Alipore, are vested in the Magistrate acting under instructions of the Zillah Judge, and subject generally to the orders of the

Government. The Magistrate is further compelled by Law to effect a certain classification of prisoners, and he is empowered by Law to punish them for certain breaches of discipline.

Under the authority of the Government an Officer called the Inspector-General of Jails has been vested with the general superintendence and control of all Jails, except the Great Jail at Calcutta, subject to Rules laid down from time to time for his guidance by the Government; the Magistrate still exercising his legal functions in the punishment of breaches of Jail discipline, and the Zillah Judge having practically ceased to exercise any functions except as an occasional official visitor of the Jail.

The House of Correction in the Great Jail at Calcutta is under the authority of the Commissioner of Police for Calcutta, and the rest of the Great Jail is under the authority of the Sheriff of Calcutta; but the Government is empowered to frame Rules for the proper discipline of the whole of the Great Jail.

The special Law, Act IV of 1862, passed by the Lieutenant-Governor of Bengal in Council, which has reference to the Great Jail at Calcutta, will for the present remain unrepealed, and otherwise it is not intended by this Bill materially to alter the Laws and the system now obtaining in the matters of Jail discipline and management.

But doubts have arisen as to the legality of some of the powers that have necessarily been exercised by Officers in charge of Jails. The Laws at present existing are scattered in detached portions throughout the Statute Book from the year 1793 up to this time, and seem to require to be curtailed and amended in some respects, and to be supplemented in other respects, and the Jail system, which has been the gradual growth of years of practical experience, seems to have arrived at that point that it needs establishment on a firmer legal basis.

The objects, then, of the present Bill are to consolidate, amend, and supplement the Laws and to give a more definite legal basis to the system at present in force in matters of Jail discipline and management.

8. The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained, and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 400 Rupees specified in the second of these Conditions.

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

15. The following papers, together with samples of the Opium for sale, will be exhibited for inspection on the day of sale, or may be seen previously to that date by application at the Office of the Junior Secretary to the Board of Revenue:—

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1862-63 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1861, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantitiy of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

Provided always that no corporal punishment shall ever be inflicted on any female prisoner, or on any prisoner except in presence of a Magistrate and a Medical Officer of the Government.

XXIII. The Magistrate or other person in charge of a Jail or place of confinement shall keep a book in which he shall record all cases disposed of by him under the last preceding Section, stating the charge made against the prisoner, the manner in which the charge was supported by evidence, and the order made by him in the case. And no prisoner who has been punished by the Magistrate or other person in charge of the Jail or place of confinement for breach of discipline, shall be punished in any other way or by any other authority for the same offence. Provided that nothing in this or in the preceding Section shall be held to prevent a Magistrate or other person in charge of a Jail from committing any prisoner for trial before the Magistrate and the Sessions Court, whenever such prisoner shall have been guilty of an offence for which the punishment authorized to be inflicted under this Act may appear inadequate.

Punishments awarded for breaches of prison discipline to be recorded in a book. No further punishment for the same offence.

Magistrate may, instead of punishing, commit to the Sessions.

XXIV. All persons employed within any Jail or place of confinement or in the custody of prisoners, shall be subject to such Rules as may be made by the Government for their good order and discipline and for regulating communication with the prisoners, and it shall be lawful for the Government to affix fines as penalties for the breach of any such Rules, provided that no such penalty shall exceed fifty Rupees. Punishment in certain cases for escaping from Jail.

XXVI. Whoever being employed in any Jail or in the custody of prisoners, intentionally suffers any such prisoners as are in the last preceding Section mentioned to escape, or intentionally aids such prisoners in escaping or attempting to escape from custody, shall be held to have committed an offence within the meaning of Section 221 of the Indian Penal Code.

Punishment for suffering or aiding such person to escape.

XXVII. Whoever, without due permission, takes or attempts to take, or introduces or attempts to introduce, or throws or attempts to throw, into any part of a Jail or place of confinement, any article prohibited by the Rules to be passed under this Act or communicates or attempts to communicate with any prisoner in any mode contrary to such Rules, shall be liable to be apprehended and brought before a Magistrate, and on conviction shall be liable to a fine not exceeding fifty Rupees, or to imprisonment, with or without hard labor, for any term not exceeding two months.

Punishment for taking or attempting to take prohibited articles into a Jail.

XXVIII. It shall be lawful for the Lieutenant-Governor of Bengal, by notification in the Calcutta Gazette, to extend the operation of this Act to any Jail or Jails that may hereafter be placed under the control of the Government of Bengal.

Operation of Act may be extended to Jails hereafter placed under Government.

XXIX. This Act shall come into operation on the day of

Commencement of Act.

STATEMENT OF OBJECTS AND REASONS.

IN most of the Districts and in many of the Sub-Divisions of Districts under the control of the Lieutenant-Governor of Bengal there are Civil and Criminal Jails for the reception of prisoners committed to Jail by the Civil and Revenue, and by the Criminal Courts respectively. There is also a Central Jail at Alipore, and a Great Jail comprising a House of Correction, in Calcutta.

Under the Law at present in force the control and superintendence of all District Jails, including the Central Jail at Alipore, are vested in the Magistrate acting under instructions of the Zillah Judge, and subject generally to the orders of the Government. The Magistrate is further compelled by Law to effect a certain classification of prisoners, and he is empowered by Law to punish them for certain breaches of discipline.

Under the authority of the Government an Officer called the Inspector-General of Jails has been vested with the general superintendence and control of all Jails, except the Great Jail at Calcutta, subject to Rules laid down from time to time for his guidance by the Government; the Magistrate still exercising his legal functions in the punishment of breaches of Jail discipline, and the Zillah Judge having practically ceased to exercise any functions except as an occasional official visitor of the Jail.

The House of Correction in the Great Jail at Calcutta is under the authority of the Commissioner of Police for Calcutta, and the rest of the Great Jail is under the authority of the Sheriff of Calcutta; but the Government is empowered to frame Rules for the proper discipline of the whole of the Great Jail.

The special Law, Act IV of 1862, passed by the Lieutenant-Governor of Bengal in Council, which has reference to the Great Jail at Calcutta, will for the present remain unrepealed, and otherwise it is not intended by this Bill materially to alter the Laws and the system now obtaining in the matters of Jail discipline and management.

But doubts have arisen as to the legality of some of the powers that have necessarily been exercised by Officers in charge of Jails. The Laws at present existing are scattered in detached portions throughout the Statute Book from the year 1793 up to this time, and seem to require to be curtailed and amended in some respects, and to be supplemented in other respects, and the Jail system, which has been the gradual growth of years of practical experience, seems to have arrived

at that point that it needs establishment on a firmer legal basis.

The objects, then, of the present Bill are to consolidate, amend, and supplement the Laws and to give a more definite legal basis to the system at present in force in matters of Jail discipline and management.

BENGAL AGRICULTURAL EXHIBITION OF 1864.

Report of the Central Committee of the Agricultural Exhibition of 1864 *on the arrangements made in furtherance of the objects of the Exhibition.*

To the Hon'ble Cecil Beadon,

Lieutenant-Governor of Bengal.

Calcutta, the 7th November 1863.

Hon'ble Sir,—The Committee appointed by your Honor to carry out the arrangements for the proposed Agricultural Exhibition of 1864 has now the honor to submit a Report on the result which has hitherto attended its labors.

2. It was but natural that an undertaking so novel in its character, and hardly understood by those for whose more immediate benefit it is intended, should be at the commencement beset with many difficulties; the Committee, however, felt convinced that if the real scope and object of the Exhibition were fully explained, and the hearty co-operation of Native Landholders enlisted, a successful result of this first experiment might confidently be expected.

3. With this aim steadily in view printed copies of Prize Lists in English, Oordoo, and Bengalee were forwarded to each of the Local Committees for distribution. English Prize Lists and the Rules attached to them were likewise forwarded to the Governments of Madras, Bombay, Ceylon, the North-Western Provinces, the Punjab, and to the Commissioner of Oude, and care was taken to make the proposed Exhibition known in England to many of the principal Manufacturers of Agricultural Machinery. In order to give every possible publicity large Hand Bills have been printed in English, Oordoo, and Bengalee, copies of which, through the courtesy of the Agent of the Eastern Bengal Railway and the Traffic Manager of the East India Railway Company, have been conspicuously posted at every Railway Station on their respective lines, and a Notification containing all details as to articles admissible at the Exhibition with the number and value of the prizes offered for each description has been sent to the Secretaries to the Governments of Madras, Ceylon, Bombay, the North-Western Provinces, the Punjab, and to the Secretary to the Chief Commissioner of Oude, with a view to obtaining the permission of the respective Governments to its publication in the *Official Gazettes*.

4. The Committee is much indebted to Moulvie Abdool Luteef and Abdoor Ruwoof, discourses relative to the undertaking having been prepared by them in the Vernacular and printed for distribution among Zemindars; and the Local Committees have been requested to spare no pains in fully explaining to the influential Residents and Landholders of their Districts the objects for which the Exhibition was determined upon, and the benefits which must result therefrom to all, directly or indirectly, interested in the progress and improvement of agricultural pursuits in this country.

5. The Committee has now the satisfaction to state that its endeavors to create an interest

in the proposed undertaking have been perfectly successful. The proceedings of the Local Committees, which find a permanent record in their publication in the *Government Gazette*, bear not only ample testimony to the spirit in which the requisitions of the Central Committee have been received, but they also afford a pleasing proof of the support held out to the undertaking by the offer on the part of private individuals of extra prizes, aggregating up to the present moment nearly Rupees 12,000.

6. The several Governments above referred to have promised every support in their power, and the Chief Commissioner of Oude has intimated that a collection of the agricultural products, &c., of Oude will be forwarded to the forthcoming Exhibition under the special charge of Dr. Bonavia. Advices have also been received from England of the despatch of a variety of machinery which is to be exhibited on behalf of the Manufacturers through their Local Agents in Calcutta.

7. The question as to the probable support which this first experiment is likely to receive having thus reached a practical solution, the Central Committee lost no time in maturing such different arrangements as appeared to be necessary, not only in the success of the Exhibition itself, but which were also consistent with a due consideration for the interests of intending Exhibitors and their attendants. On these arrangements the Central Committee now proceeds to report under their respective heads.

8. *Exhibition Yard.*—Your Honor having been pleased to place at the Committee's disposal the whole of the grounds adjoining the Belvidere compound to the southward, the same was surveyed and a Plan prepared, shewing the manner in which it has been proposed to lay it out, and the space allotted to the different descriptions of live stock, machinery, and implements, and agricultural produce, as described in the Prize List. The Plan likewise shews the position assigned to each class and the site of the Sheds necessary for the reception of such objects as require protection against exposure. This Plan having been approved by your Honor an Estimate was drawn up of the probable requirements in material for the construction of Sheds, and tenders being invited for the same a contract has been concluded for the required supply. To prevent delay and to ensure the delivery of material according to samples furnished, a Special Superintendent was appointed with orders to commence at the work at once, and at this moment the boundaries of the grounds, the different avennes, and the exact position of each Shed are marked out, the necessary drains are in course of construction, and one of the Sheds is completed. The arrangements made leave no doubt that the whole of the Sheds and enclosures, as well as the platforms required for heavy machinery, will be ready in the course of next month.

9. *Machinery in Motion.*—As a great variety of machines is expected to arrive in time for the Show, the Committee is of opinion that in order to afford visitors a better opportunity of judging of their real merits each machine ought to be exhibited in working order, if not during the whole week the Exhibition is open, at all events on the day when the Judges are to pronounce their awards. Arrangements have therefore been made for assigning special localities to the different descriptions of machinery. Fixed steam machinery will be in one part of the yard, hydraulic machines close to the tanks, whilst a distinct plot of ground is allotted to such as is worked by cattle. To admit of practical trials of all such agricultural machines as are moving by their own steam power a special slip of land verging on the southern part of the maidan has been selected. The Committee will provide shafting and steam for all fixed machinery requiring such appliances, but Exhibitors must supply the necessary belting at their own expense.

10. *Transmission of Articles to Calcutta.*—To secure to contributors every facility and advantage in forwarding goods from the interior for exhibition the Committee addressed the Offices named in the margin with a view to ascertain the extent of assistance they might be disposed to afford in the conveyance of live stock, machinery, and produce from the Provinces to Calcutta. Mr. Palmer, the Agent of the East India Railway Company, assures the Committee that he will do what he can consistently with the interest of the Company, but as nothing definite has been settled yet the Committee is at present unable to make any arrangements for the transmission of such contributions as will have to be forwarded by the East India Railway. Hopes are, however, entertained that the Directors of the Board in England will view the application in a more liberal spirit, and that the next Mail will bring information of the same concessions being accorded to the Committee as has been done in England and France to the Commissioners for the Exhibition of 1855 and 1862. The Committee, however, record with great satisfaction the handsome manner in which the applications have been met by Mr. Prestage, Agent to the Eastern Bengal Railway Company, and Mr. Penderton, Agent to the Calcutta and South-Eastern Railway Company. Both these gentlemen accord free passages for all live stock, machinery, and implements, and produce, provided that such be accompanied by a Certificate of the Local Committees, stating that the specimens are intended for the Agricultural Show. Mr. McLardy, the Secretary to the Ganges Steam Navigation Company, regrets that the Company is not in a position to grant free passages, and the Secretary to the India General Steam Navigation Company has not as yet favored the Committee with a reply. The Committee is now devising some plan by which it is hoped to attain the object in view without the intervention of River Steam Navigation Companies.

Eastern Bengal Railway.
South-Eastern Railway.
India General Steam Navigation Company.
Ganges Steam Navigation Company.

11. *Transmission of Goods by Seafaring Steamers.*—The Committee has likewise applied to the Directors of the Peninsular and Oriental Company in London, and in reply was informed that "the Company desire to afford every facility in their power towards the object of the Show, but must decline to take live stock. They will, however, convey implements and produce at half freight if there be room enough on board, and provided such articles would not deprive the Company of the opportunity of carrying other goods at full rates." With such conditions attached it would be extremely dangerous to place any reliance upon the assistance to be expected from that Company, especially at a

season when their Steamers are already overcrowded with passengers. The Committee therefore applied to the Agent of the *Messageries Imperiales*. Mr. Lamouroux at once offered a free passage for everything except live stock, which he very naturally objects to as likely to interfere with the comfort of passengers on board the Steamers.

12. It is, however, with particular pleasure, that the Committee bring to your Honor's notice the liberal manner in which the gentlemen noted in margin have come forward to afford material assistance in the conveyance of goods from out-Ports and intended for exhibition. Messrs. Jardine, Skinner and Company offer free passages for anything that can be taken without much inconvenience from Penang and Singapore on board their Steamers *Reiver* and *Clair Alpine*; Messrs. Apcar likewise promise free conveyance of all live stock, implements, produce, &c, in their China Steamers; and Messrs. Mackinnon, Mackenzie and Company, as Agents for the Burmah India Steam Navigation Company, undertake to provide space, free of cost, to the extent of twenty-five tons for implements and produce, andfor twenty head of cattle in each of the four Steamers from Moulmein and intermediate Ports, and the same privilege by each of the two Vessels which touch at Madras and the intermediate Ports.

Messrs. Jardine, Skinner and Company.
" Apcar and Company.
" Mackinnon, Mackenzie and Company.

13. *Landing and Transport of heavy Machinery.*—The next object requiring attention had reference to the landing and transport of heavy machinery, as explained in our Secretary's letter to Government, dated the 25th September. Under the orders conveyed in Mr. Secretary Eden's letter No. 987T., dated the 6th ultimo, Mr. Dowleans placed himself in communication with the Head of the Ordnance Department, the Master Attendant, the Superintendent of the Government Dock Yard at Kidderpore, and the Presidency Executive Commissariat Officer, and from all prompt assurances of aid were received. The Commissary of Ordnance places at the disposal of the Committee the crane at Baboo's Ghat, capable of lifting packages to the weight of three tons, and also the necessary arsenal carts and trucks for conveying the machinery to Belvidere. The only condition attached is that requisitions may be sent in two days previously, and a sufficient number of hands provided to assist as the Commissary of Ordnance is very naturally anxious that the assistance thus afforded should not interfere with the current work of his Department.

14. The Officiating Master Attendant has placed the means and appliances attached to his Department at the Committee's disposal. They consist of a heavy up-boat and a crane, capable of lifting two tons, and the Superintendent of the Government Dock Yard offers to land machinery by the Kidderpore crane up to fifteen tons weight, and to lend trucks for transporting it to Allipore. Every arrangement has therefore been made to afford Exhibitors facilities, which, whilst diminishing the risk incurred in landing heavy machinery, will greatly expedite its disembarkation, and materially assist in its transport to the Exhibition Yard.

15. *Platform for heavy Steam Machines.*—Considering the weight of the machines which will be exhibited, working under their own steam power, the Committee was of opinion that it would be hardly fair to put Exhibitors to the entire expense of erecting the necessary platforms, and that assistance in the shape of bricks (which afterwards might be turned to account for the Suburban roads) would not be out of place. At this moment it is impossible to say what the eventual requirements in this respect may be, but the Committee feel great pleasure in bringing to notice the prompt aid afforded by the Department of Public Works, a requisition made during the holidays to the Superintending Engineer, South-Eastern Circle, under the authority of Government conveyed in Mr. Secretary Eden's letter No. 987T., dated the 6th ultimo, for 20,000 bricks, having been met within twenty-four hours.

16. *Circular to Committees.*—Every thing having thus been done which, in the opinion of the Committee, might tend to facilitate the transmission, transport, and exhibition of contributions to the forthcoming Show, it appeared desirable that some plan should be devised for ensuring uniform Returns, in order to enable the Committee to carry out a variety of other arrangements for which due provision must be made. With this view a Circular was addressed on the 15th of September to the several Local Committees, embodying certain Rules for their guidance, and furnishing a form of Return for all contributions intended to be forwarded from their respective Districts for exhibition. The object of these Returns is—

1*st*.—To ascertain the probable requirements for space in each class.

2*ndly*.—To ascertain the number of each description of animals which will have to be fed.

3*rdly*.—To provide Moodie shops for Native servants coming in charge of live stock and implements.

4*thly*.—To prepare the Tickets to be attached to each specimen on view in accordance with the Rules laid down in the Prize List, and

5*thly*.—To make arrangements for the publication of a catalogue to be ready on the day of the opening of the Exhibition.

17. *Feeding of Animals.*—In anticipation of these Returns the Central Committee has already taken action. Advertisements have been published in the *Exchange Gazette* and in two local Native papers, inviting tenders for feeding of animals by contract. The contract will stipulate the quantity and quality of food for each animal according to samples in the Committee's possession, and these details will be printed in English and the Vernacular on cards, one of which will be handed to each servant in charge of cattle, so that he may know exactly what he is entitled to receive from the contractor.

18. *Conservancy.*—Arrangements have likewise been made for the proper conservancy of the Show Yard. The Sheds in which animals are exhibited will be cleaned twice a day, and the Magistrate of the 24-Pergunnahs has kindly promised to have carts in attendance to remove stable litter and other refuse every morning and evening. All such Sheds are being provided with drains, and a pump will be set up near the large tank to supply water for flushing them.

19. *Moodie Shops.*—As it is possible that there will be a large number of attendants coming in charge of cattle and implements from the Provinces who may be strangers in Calcutta, it appeared to the Committee desirable that provision should be made for securing to them the means of obtaining their daily requirements of food at a convenient place and at fixed rates, so as to protect them against extortion The piece of ground which

seemed admirably suited for this purpose is that to the west of the Show Yard and on the other side of the Allipore road. The Committee therefore applied to Brigadier-General Showers, C. B., who at once complied with the request, and obligingly placed at the disposal of the Committee a large slip of the Allipore parade ground, with the permission to erect Moodie shops thereon. The ground has since been measured, and, whilst admitting of the construction of shops on either side, will still leave in the centre ample room for a double line of carriages, and thus be the means of keeping the Allipore road always clear. An Advertisement published in two of the local Native papers intimates that the Committee is prepared to let to intending contractors the ground in question for the erection of Moodie shops according to a Plan to be seen in the Joint Secretary's Office, and that the price of all articles of food therein exposed for sale will be regulated by a fixed Nerick or Price Current.

20. *Tickets.*—To guard against pressure of work at the last moment it appeared desirable that several of the minor details should at once be carried out. Tickets of admission to the Exhibition have therefore already been printed, and arrangements made for their sale a fortnight prior to the opening of the Exhibition. The Tickets to admit Exhibitors' servants are likewise ready, and those which will have to be attached to each specimen on view, with the details prescribed by the rules of the Prize List, are in the Printer's hands, so that only the blanks will have to be filled up on the receipt of Returns from Local Committees.

21. It is impossible at the present stage of proceedings to say what will actually be exhibited at the Show; as much depends upon the size of the various machines offered for exhibition, and the space required for them. The Committee may, however, mention that, judging from communications already received from intending Exhibitors both in India and from England, the whole of the space that has been marked out on the Plan for various purposes will be all taken up.

22. Bearing in mind that the forthcoming Exhibition is a strictly agricultural one, the Committee has been obliged to decline several prizes offered by private individuals for manufactured goods. Specimens of silk or cotton cloth are only admissible as examples of the superior quality of fabric obtainable from a particular kind of raw silk or cotton, but the prizes can only be awarded to the produce itself, and not to the article manufactured therefrom

23. In only two instances has the policy of the Rule, which provides that each specimen of live stock, or machinery, or produce intended for exhibition should be the property of the Exhibitor, or be the produce of his estate, been questioned, on the ground that this might deter many people from contributing some really fine specimens, which they might obtain on loan and forward to the Exhibition at their own expense. Considering that the avowed object of the Exhibition is to promote improvement in the breed of cattle and in the productions of the soil, and to introduce a better class of agricultural implements, and seeing that the prizes have been fixed on a liberal scale, with the special view of thereby affording to successful competitors the means of purchasing at the Exhibition such cattle, implements, and appliances by which the contemplated improvement can be effected, it is clear that these objects would be frustrated were the prizes awarded to any one but the actual producer himself. The Central Committee has therefore declined to make any modification of that Rule.

24. The Returns from the several Local Committees are expected in the early part of next month, when the Central Committee hopes to report further progress.

From S. C. Bayley, Esq., Junior Secretary to the Government of Bengal, to the Officiating Deputy Auditor and Accountant-General, Bengal,—(dated the 14th November 1863.)

In continuation of the letter from this Office, No. 1529, dated the 1st April last, I am directed by the Lieutenant-Governor to request that you will be so good as to place the sum of Rupees (10,000) ten thousand at the disposal of the Provisional Committee of the Agricultural Exhibition to be held in Calcutta in January 1864, to enable them to meet preliminary expenses connected with the objects of the Exhibition.

2. This amount, I am to say, will be paid from the sum of Rupees (50,000) fifty thousand sanctioned under orders of the Financial Department of the 13th May last.

Agricultural Exhibition.

From F. R. Cockerell, Esq., Officiating Secretary to the Government of Bengal, to the Commissioners of the Patna, Bhaugulpore, Rajshahye, Dacca, Chittagong, Nuddea, Burdwan, Cuttack, and Chota Nagpore Divisions,—(dated the 11th November 1863.)

In view of the forthcoming Agricultural Show to be held at Alipore in January next I am directed to request that you will send invitations on behalf of the Lieutenant-Governor to all the principal Zemindars and other leading Native gentlemen of your Division to be present on the occasion.

2. You will let them clearly understand that they are at perfect liberty to attend or not as their inclination or convenience may suggest, but that it will give the Lieutenant-Governor much pleasure to see them at the Show.

3. The novelty of an Exhibition of this nature will, no doubt, be an attraction to many; but it is desirable that they should all be made as much as possible to understand the advantage they may derive from seeing in one place a collection of the finest cattle and other live-stock produced in Bengal and imported from other countries, of the most elaborate and powerful machinery, and the best implements applicable to Agricultural purposes, and of the cereal and other produce of these Provinces, from comparing the practice and experience of their own District with those of others, from the intercourse they will have with intelligent Agriculturists from other parts of the country, and from the interest which cannot fail to be awakened by a general gathering to promote a science on which the wealth and prosperity of India, as well as of every individual landholder and cultivator of the soil, must always mainly depend.

4. On one of the days of the Show week it is the intention of the Lieutenant-Governor to hold

a Durbar, at which all Native gentlemen will be received in accordance with the usual custom on such occasions.

5. You are authorized, if your presence is not required in your Division during the week, to repair to Calcutta and to remain there while the Show lasts, charging yourself specially with the care of the Native gentlemen of your Division who may attend and who require your assistance. In the case of many it will probably be necessary to make arrangements for their accommodation while in Calcutta, and for their protection from the imposition to which, as strangers, they are liable, especially at such a time. Encamping ground will be provided for those who choose to bring Tents with them, and supplies will be available in the vicinity of the Show Yard.

6. You are also authorized to permit any Officers of the Government, English and Native, who may wish to be present at the Exhibition, and who can be spared from their local duties without detriment to the Public Service, to be in Calcutta for the whole or a portion of the week, making such arrangements for carrying on the business of their offices during their temporary absence as may be practicable.

Sowing of American Cotton Seed.

Season.—In Dharwar the average fall of rain in the Cotton Districts varies from 25 to 30 inches. It begins in June and the weight of the south-west monsoon is over about the middle of August. In September, October, and the first-half of November there are occasional heavy falls belonging to the Madras Monsoon.

All Cotton, both New Orleans and Native, is sown in August at the time that the ground, after having been thoroughly soaked, has become partly dried at the surface. The ground is amply moist without being so wet as to rot the seed. Frequent hot sunny days during this month tend to promote germination, and about three months more remain, during which rain falls from time to time. About the beginning of October a strong dry cutting east wind sets in, and until the middle of November occasional heavy thunder storms, and days of moist, west and southerly winds intervene.

After the latter period the dry east wind usually continues steadily night and day till the month of January. The plant begins to flower towards the end of December, and picking begins between February and March (a little sooner than the Native Cotton, which is sown at the same time with it).

The above shews the course of the season or sowing time in Dharwar and the adjacent Districts, *viz.*, Belgaum, Raichoor, and Mysore. In other places the time of sowing must be accommodated as much as possible to the seasons there prevailing, so as to obtain for the young plants about the same amount of monsoon climate.

Ordinarily, sowing about the same time as the Native Cotton of the country should answer. But when the dry winds are very severe it might be advisable to anticipate the time of sowing Native Cotton, provided the condition of the ground as regards moisture will admit of it, as the plant must attain a certain amount of vigor to prevent its suffering from these winds.

Particular care must, however, be taken to avoid sowing at any period that will risk falls of rain occurring during the picking time.

Cultivation.—The preparation of the land adapted for the Native Cotton will usually answer for the American variety, but particular attention must be paid to the eradication of weeds and grass.

The New Orleans Seed is woolly and without some preparation it will not run freely through the drill. The method adopted by the cultivators here is to rub it with their hands on the ground in a mixture of cowdung and water, after this it is sown with the drill as usual with other seeds.

About the second month after sowing the drills are hoed or scraped, this is done with the usual implement drawn by two bullocks, it loosens the earth on both sides of each row of plants, and also removes weeds and grass. The operation is repeated twice (or it may be oftener) at intervals of about a fortnight.

His Excellency the Governor-General in Council is pleased to sanction the re-publication of the following General Order issued from the Military Department:—

No. 157A. of 1863.—His Excellency the Governor-General is pleased to publish the following Extracts of a Despatch from the Right Hon'ble the Secretary of State for India, No. 311, dated 31st August 1863, regarding the absentee and acting allowances of Military Officers in Civil employ, the provisions of which are applicable to all the Presidencies:—

Para. 31.—With your Despatch No. 23, in the Financial Department, you forward a further Report from the Committee of Secretaries regarding the absentee and acting allowances of Military Officers in Civil employ, with a note thereon by your Financial Secretary.

32.—You concur generally in the recommendations of the Secretaries, with the amendments noted by the Financial Secretary, and propose the adoption of the following principles:—

1*st*.—That every Military Officer in Civil employ, when on leave, should draw pay under the Military Rules; and

2*nd*.—That every Military Officer when acting in any Civil appointment should draw his Civil pay under the Civil Rules.

33. Upon these two principles you propose the following Rules for the Officer on leave:—

A Military Officer in Civil employ on leave, either in India or in England, shall draw precisely the pay which he would be entitled to draw under the Military Leave Rules, except when on privilege leave as hereafter specially provided.

Such pay shall be provided from the Civil Department excepting only in cases where the allowances so drawn would exceed the entire Civil pay of the appointment, when the excess will be paid by the Military Department. The Staff salary of any Officer shall be held to be the difference between the Indian pay and allowances of his rank and the full salary of his permanent appointment.

34.—For the Acting Officer your Government proposed the following Rules:—

A Military Officer acting for another in Civil employ shall draw Deputation Allowance under the Rule by which the allowance is granted to Covenanted Civil Servants.

If the Officer be in Military Staff employ such Deputation Allowance will be given in addition to his Military pay and allowances, plus half the Staff pay of his substantive appointment.

If the Officer hold no substantive Staff appointment, Civil or Military, it will be given in addition to his Military pay and allowances.

A Military Officer in Civil employ performing the duties of his substantive appointment, and at the same time officiating in another, is entitled to his substantive salary, and in addition to a Deputation Allowance of 20 and 10 per cent. on the Staff salary of the appointment in which he is officiating, provided the pay of the substantive appointment, with the addition of the Deputation Allowance, does not exceed the pay of the higher appointment.

A Subordinate acting for his principal or for any other Officer at the same Station is not entitled to Deputation Allowance for the first month while so acting, unless he is required to act on two occasions within a brief period (say twelve months), in which case he draws Deputation Allowance for the whole period during which he may have held the appointment in excess of one month as if he had acted continuously.

A Military Officer proceeding from one Civil appointment to another shall be allowed to draw, during the authorized period of transit, out of the salary of the office he is about to join, a sum equal to that of his previous situation. This Rule to be preceded by an order making the Civil Rules for joining time applicable to Military Officers in Civil employ.

A Military Officer in Civil employ can take three months' cumulative privilege leave (under the Civil Rules only), but he must earn it by thirty-three months continuous service in the Civil Department alone.

35. These several Rules are approved of.

(Sd) H. W. NORMAN, *Lieut.-Col.*,
Secy. to the Govt. of India,
with the Governor General.

---

2. In accordance with the instructions of the Secretary of State quoted above, His Excellency in Council is pleased to declare that Military Officers transferred from one Civil appointment to another shall, in respect to joining time, be subject to the same Rules as Covenanted Civilians.

3. His Excellency in Council is pleased also to decide that in Departments where appointments are in classes and grades the Deputation Allowances of Military Officers in Civil employ shall be subject to the Rule of limitation contained in Financial Resolution No. 5913 of this day's date.

MILITARY.

HIS EXCELLENCY THE RIGHT HON'BLE THE GOVERNOR GENERAL OF INDIA IN COUNCIL.

MY LORD,—With the view of obviating delay in the despatch of Invalids and Time-expired Men from India, who may have claims to compensation for clothing, it has been proposed by the Bombay Government that such compensation be not paid until the arrival of the men in this country.

2. To carry out this arrangement a Return (in duplicate) must be prepared by each Regiment of the claims of men about to be sent home for discharge from the Corps, and after verification by the Superintendent of Army Clothing such Return must be sent to the Deputy Adjutant-General, in order that one copy may be forwarded to this Office and the other be delivered to the Officer about to proceed in charge of the Detachment, to be made over by him on his arrival to the proper Officer* by whom the disbursement is to be made.

* (The Pay-Master at Netley, or elsewhere)

3. The Secretary at War sees no objection to the proposed arrangement, and has stated that instructions will be accordingly given to the Pay-Master at Netley, and to the Pay-Masters of Depôt Battalions, to make the payments in question.

4. I therefore request, should you see no reason to differ from the views of the Bombay Government, that you will cause the necessary instructions to be issued for giving effect to the arrangement at the respective Presidencies.

The Board, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so.

The following are the Conditions of Sale :—

1. The Opium will be sold for exportation by Sea only, and no Certificate will be granted except to cover such export.

2. The Opium will be ordinarily offered for sale at an upset price of Rupees 400 per Chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by Clause 12 of these Conditions of Sale.

3. The Sale shall commence at the hour of 11 A. M. of the day fixed by previous Notification, and shall not be continued after the hour of 5 P. M., but if at that hour any of the lots advertised for sale shall remain unsold, the Sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a Public Holiday) at the hour of 11 A. M., and so on, until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board may dispose of the lots which remain on hand at a future Sale.

4. Each lot shall contain five Chests.

5. A Promissory Note for a sum calculated according to the scale noted in the margin shall be taken as a deposit on each lot from the Purchaser in the Sale Room, and before the lot is registered in the Sale Book, and all such Promissory Notes shall be redeemed on the part of the Purchasers at this Office by Bank of Bengal Receipts, or by substitution of other Public Securities of the Bengal Government, on or before 4 o'clock in the afternoon of the fifth day after the Sale, or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts, or deposit of other Public Securities as aforesaid shall have been delivered in, shall be re-sold at such time or times, and under such conditions of re-sale, as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

	Deposit.

On bids of Rs. 1,400, but less than „ 1,600	„ 300 „
On bids of „ 1,600, but less than „ 1,800	„ 400 „
And so on, Rs. 100 being added to the Deposit for every additional Rs. 400 bid.	

6. The Promissory Notes taken on the day of sale under the last mentioned condition, if remaining unredeemed at 4 o'clock of the fifth day following the day of Sale, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

7. No tender of Money, Bank of Bengal Receipts, or Public Securities, on account of Opium, upon which the prescribed Deposit may not have been made before 4 o'clock of the fifth day following the day of Sale, will be afterwards accepted.

8. The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order ; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

10. No deposit of Public Securities under the fifth of the present Conditions will be received in this Office, except from the party recorded as the Purchaser in the Sale Book, or his authorized Agent. The Receipt for deposit of Public Securities will be granted only in the name of such Purchaser, and the Securities so deposited will be returned when payment in full has been made by the said Purchaser or his Order.

11. The Officer superintending the Sale on the part of the Board of Revenue is empowered to reject, at his discretion, the bid of any individual, unless such individual shall, on demand, tender at the time a Deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these Conditions.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained, and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 400 Rupees specified in the second of these Conditions

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

15. The following papers, together with samples of the Opium for sale, will be exhibited for inspection on the day of sale, or may be seen previously to that date by application at the Office of the Junior Secretary to the Board of Revenue:—

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1863-64 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1864, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantity of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

Article of the Convention above referred to.

Article 6th.—"With regard to the Trade in "Opium, it is agreed between the High Contracting "Parties that at each of the periodical "Sales of that Article there shall be reserved "for the French Government, and delivered upon "requisition duly made by the Agents of His "Most Christian Majesty, or by the persons duly "appointed by them, the number of Chests so "applied for, provided that such supply shall not "exceed three hundred Chests in each year, and "the price for the same shall be determined by "the average rate at which Opium shall have "been sold at every such periodical sale, it being "understood that if the quantity of Opium applied for at any one time shall not be taken on "account of the French Government by the "Agents of His Most Christian Majesty within "the usual period of delivery, the quantity so applied for shall nevertheless be considered as so "much in reduction of the three hundred Chests "hereinbefore mentioned. Deck space to Coolies proceeding to the Tea Districts

From Captain C. Burbank, Officiating Superintendent of Labor Transport at Calcutta, to S. C. Bayley, Esq., Junior Secretary to the Government of Bengal,—(No 536, dated the 4th November 1863.)

I have the honor to acknowledge the receipt of your Office letter No. 1062T, dated the 7th ultimo, and, in compliance with the instructions contained therein, beg to forward, for submission to His Honor the Lieutenant-Governor of Bengal, the accompanying recommendations from the Committee appointed to report on the amount of space on Steamers and Flats, which should be alloted to each Cooley proceeding to Assam, Cachar, and Sylhet, under Act. III. of 1863.

Report of the Committee appointed to enquire on the amount of deck space on Steamers and Flats, which should be allotted to each Cooley proceeding to Assam, Cachar, and Sylhet.

The Committee propose, for the consideration of His Honor the Lieutenant-Governor of Bengal, the following recommendations :—

1. That the deck space for each adult Laborer proceeding to Assam, Cachar, or Sylhet be fixed at $6 \times 2 = 12$ superficial feet, and that two children under the age of ten years be allowed the space of an adult.

2. This measurement to be in force from 1st February to 31st October inclusive, when the space might be lessened to 10 feet superficial.

3. To prevent overcrowding the measurement of the lower deck and half of the upper deck should be computed as carrying space only; the other half of the upper deck to be reserved as a place for airing and exercise, and when the people could resort to for recreation from the close and deadly atmosphere of the between-decks.

From F. R. Cockerell, Esq., Officiating Secretary to the Government of Bengal, to the Officiating Superintendent of Labor Transport, Calcutta,—(dated Fort William, the 14th November 1863.)

I am directed to acknowledge the receipt of your letter No. 536, dated the 4th instant, with its enclosure, and in reply to state that the Lieutenant-Governor is pleased to approve of the recommendations of the Committee appointed to report on the amount of deck space on Steamers and Flats which should be allotted to each Cooley proceeding to the Districts of Assam, Cachar, and Sylhet, and I am to request that you will take the necessary steps for making the Rules generally known and cause them to be duly observed.

Government of India, Public Works Department.

Probable dates of the opening of the East Indian Railway to Delhi.

From Captain R. de Bourbel, R. E., Officiating Under-Secretary to the Government of the North Western Provinces, Public Works Department, Railway Branch, to Colonel H. Strachey, R. E., Secretary to the Government of India, Public Works Department, with the Governor General,—(dated Camp Nynee Tal, the 3rd November 1863.)

In reply to the enquiry contained in your letter No. 2218 of 15th September 1863, I am directed to state that, if the supply of permanent way material from Bengal does not fail, there is every reason to expect that the East Indian Railway will be opened for public traffic up to the banks of the Jumna at Allahabad by the 1st March 1864, up to Boolundshuhur Road by 1st January 1864, and up to the banks of the Jumna at Delhi by 1st July 1864.

2. The Chief Engineer, East Indian Railway, hopes to have the several Sections ready before those dates, but this will depend upon the permanent way material being supplied in good time.

3. The East Indian Railway Company has selected 34,000 sleepers of the quantity in store at Kasheepoor. These are in course of transit to the line, and provided the iron wood sleepers from Bengal arrive in time, and the Kumaon Forest Agency is able to deliver some twenty-four thousand more sleepers at the head of the Ganges Canal at Myapoor, no further interruption to the progress of plate-laying need be anticipated on this account.

4. Colonel Ramsey, C. B., is fully aware of the necessity of the early completion of this Railway to Delhi, and is exerting himself to transport the remaining number of sleepers required, which are ready cut in the Forests, to the Depôt in the Plains.

The Lighthouse stands not on point Sottile as stated in the Sicilian Notice, but on point Ferro, the low rocky western extreme of the island, and navigators are hereby informed accordingly.

Government of Bengal.

Salt Market during the Second Quarter of 1863-64.

From T. BRUCE LANE, Esq., Junior Secretary to the Board of Revenue, Lower Provinces, to the Officiating Secretary to the Government of Bengal,—(dated the 21st November 1863.)

A. GROTE, Esq.

I AM directed by the Board of Revenue to submit the following Report on the state of the Salt Market during the Second Quarter of 1863-64.

2. The total quantity of Government Salt sold by the Board under Rowannahs was 1,32,704 maunds, giving a monthly average of 44,234 maunds, which is about 1,520 maunds less than the average monthly sales in the previous Quarter.

August	1863 ...	Maunds	63,724
September	„ ...	„	38,955
October	„ ...	„	30,825
	Total Maunds ...		1,32,704

3. The sales of Government Salt from the Ghoosery Golahs amounted to 14,200 maunds during the Quarter. The sales at Tumlook were 1,02,175 maunds against 81,115 maunds in the previous Quarter, and at Hidgellee 8,982 maunds against 12,010 maunds; the falling off in the Hidgellee sales seems to be mainly at Ghât Ramnugger. The general decrease in sales of Government Salt appears to arise from the increased importation and sale of Foreign Salt as shewn below, the consignees of which apparently find it advisable to sell over the Ship's side in preference to bonding at the present low market price.

4. The sales of Excise Salt during the Quarter were 8,720 maunds against 11,039 maunds of the previous Quarter.

5. The quantities of Salt which have been dispatched into the interior of the country *vid* the border Chowkeys of Baboogunge up the Hooghly and Gopaulgunge *en route* to the Gorai, and by the East Indian and Eastern Bengal Lines of Railway, are shewn in the following Comparative Statements. In both a falling off will be observed:—

8. In August and September the price of Liverpool Salt ranged between Rupees 60 and 65 per 100 maunds, but in October it fell to Rupees 54. Madras Kurkutch continued to sell at an average of Rupees 52 till the middle of September, when the price fell to Rupees 49, and at the close of the Quarter it was only Rupees 42. Bombay Salt maintained the average price of Rupees 42 up to the middle of the Quarter; it then fell to Rupees 38, and at the close of the Quarter the price was Rupees 30.

9. The quantities of Salt available for exportation on private trade at the several Madras Depôts on the first day of each of the three months of the Quarter under review and the corresponding Quarter of the previous year are exhibited below :—

The Board, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so.

The following are the Conditions of Sale :—

1) The Opium will be sold for exportation by Sea only, and no Certificate will be granted except to cover such export.

2. The Opium will be ordinarily offered for sale at an upset price of Rupees 400 per Chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by Clause 12 of these Conditions of Sale.

3. The Sale shall commence at the hour of 11 A. M. of the day fixed by previous Notification, and shall not be continued after the hour of 5 P. M., but if at that hour any of the lots advertised for sale shall remain unsold, the Sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a Public Holiday) at the hour of 11 A. M., and so on, until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board may dispose of the lots which remain on hand at a future Sale.

4. Each lot shall contain five Chests.

5. A Promissory Note for a sum calculated according to the scale noted in the margin shall be taken as a deposit on each lot from the Purchaser in the Sale Room, and before the lot is registered in the Sale Book, and all such Promissory Notes shall be redeemed on the part of the Purchasers at this Office by Bank of Bengal Receipts, or by substitution of other Public Securities of the Bengal Government, on or before 4 o'clock in the afternoon of the fifth day after the Sale, or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts, or deposit of other Public Securities as aforesaid shall have been delivered in, shall be re-sold at such time or times, and under such conditions of re-sale, as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

On bids of „ 1,600, but less than „ 2,000	„ 400 „
And so on, Rs. 100 being added to the Deposit for every additional Rs 400 bid.	

6. The Promissory Notes taken on the day of sale under the last mentioned condition, if remaining unredeemed at 4 o'clock of the fifth day following the day of Sale, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

7. No tender of Money, Bank of Bengal Receipts, or Public Securities, on account of Opium, upon which the prescribed Deposit may not have been made before 4 o'clock of the fifth day following the day of Sale, will be afterwards accepted.

8. The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order ; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

10. No deposit of Public Securities under the fifth of the present Conditions will be received in this Office, except from the party recorded as the Purchaser in the Sale Book, or his authorized Agent. The Receipt for deposit of Public Securities will be granted only in the name of such Purchaser, and the Securities so deposited will be returned when payment in full has been made by the said Purchaser or his Order.

11. The Officer superintending the Sale on the part of the Board of Revenue is empowered to reject, at his discretion, the bid of any individual, unless such individual shall, on demand, tender at the time a Deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these Conditions.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained, and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 400 Rupees specified in the second of these Conditions

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

15. The following papers, together with samples of the Opium for sale, will be exhibited for inspection on the day of sale, or may be seen previously to that date by application at the Office of the Junior Secretary to the Board of Revenue:—

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1862-63 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1864, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantitiy of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

Government of India, Public Works Department.

Progress Report of Works in the Great Indian Peninsula Railway.

Memorandum by Lieutenant-Colonel H. Rivers, R. E., Consulting Engineer for Railways,—(dated the 11th September 1863.)

The accompanying Report of the progress of Works on the Great Indian Peninsula Railway is submitted for the information of Government.

2. It is satisfactory, with the exception of Nos. 14 and 15 Contracts.

3. As to the former, some explanation is offered in the fact of the greater importance of finishing No. 13 (the section between Bhosawul and Oomrawuttee), and the want of labor and roads.

4. As to No. 15 nothing can be advanced. The Railway Officers expressed indignation last year when a Government Officer reported the slackness on this contract in general, and the Taptee Viaduct in particular, but that warning was not too soon; and even now there are only regrets that the progress is not better.

5. Until this viaduct is finished the works beyond will not be completed quickly, and, unless better progress is made, Contracts 16 and 17, finishing the line to Jubbulpoor, will be completed before No. 15.

6. These were begun later, and are further from the base of supplies and operations; they are no better off for roads or inhabitants, and yet the Contractors have been so much more energetic than Mr George Wythes and his Agent, Mr. Ker, that the above suggested result may probably follow.

7. The contract time for completion seems now to have become a dead letter, but the manner in which No. 15 Contract has been conducted since Mr. George Wythes has taken it requires some special notice and warning, and the Consulting Engineer of the Company, the referee under the contract, might be asked whether he has no means of rousing Mr. Wythes' energies.

8. The contract time is December 1863; June 1865 will not see the completion at the present rate of progress.

9. It would at all events be well that the London Board and the Engineering world at home should know how this contract, which had to encounter no great difficulties either as to the works, the climate, or the country, is being carried on.

From R. W. Graham, Esq., Chief Resident Engineer, to W. R. Hoare, Esq., Secretary, Great Indian Peninsula Railway Company,—(dated Poona, the 21st August 1863.)

Sir,—I have the honor to report upon the present state and progress of the works in the Engineering Department.

2. On the Concan Division since the date of my last Report third class Waiting-sheds have been built at Byculla and Callian Stations, and a smaller shed of the same description at Narel, and at Titwalla a permanent Inspector's Bungalow has been built. Sidings for the reception of the new Locomotive Stock have been laid near Musjid Bunder and at the Coke Ovens at Sion. The extra arches and culverts, and alterations in the level of the line in various parts of the Contracts 1 to 6 and 10, have been completed.

3. The line and works have been maintained in good order, with the exception only of some heavy slips on the Goolbun embankment, which, though they have interfered very little with the traffic, have been a source of considerable expense and trouble. This embankment was completed after the close of last rains; consequently a considerable portion of the upper earthworks had not had the

full benefit of last monsoon. It will also be remembered that this embankment is over 100 feet in height, and therefore some settlement and washling away of the slopes was to be expected during this monsoon. On the 16th June, after a heavy and continuous fall of rain, extensive gullies were washed out in the slopes of the embankment, and a small slip occurred on the down-line side early on the 17th. As further slips seemed probable, timbers from 20 to 28 feet long were ordered to be laid longitudinally beneath the sleepers under each Rail along the most doubtful parts of the embankment, each pair of longitudinals resting upon two cross timbers.

4. On the 22nd of June a large slip occurred on the up line side of the embankment, but with the assistance of the timbers the road was made secure in a few hours. On the 3rd July, another slip of about 500 cubic yards occurred near the large slip, but the framing under the Rails kept the road secure on a good bearing. The large slip has continued to move from time to time, but the Ballast Train which has been working from Khurdee since the 25th of June has now gained upon it, and the embankment has been got into a much more satisfactory state. The road across the embankment has been maintained throughout with very little interruption to the traffic. The Passenger Trains had to be worked on both sides of the embankment, and the passengers transferred on two occasions only.

5. The Bhore Ghaut Incline was opened by His Excellency the Governor on the 11th of the following month; Goods Trains commenced working over it, and continued working regularly up to the 16th of June, when embankments 5 and 8 were reported unsafe for the passage of trains: since that date no trains have been run, and embankments 5 and 8 have settled to the extent of about 3 feet since the beginning of the rains. A slip of about 1,500 cubic yards, and about 100 feet in length, has occurred in No 5 embankment. The only slip of any importance in the slopes of cuttings has occurred at the lower end of cutting No. 4, where about 1,300 cubic yards of the slopes came in, filling the Railway for a length of 100 feet and nearly 12 feet in depth. Some small slips have occurred on other parts of the line, and a few loose stones have fallen from the slopes, but no serious contingency of any kind has occurred upon the Incline.

6. The impracticability of keeping up the embankments and working the Incline through the first monsoon has been all along pointed out, but I am happy to say that the effects of the rains on the works have been less serious than might have been expected. The two embankments and the slip at No. 4 cutting abovementioned are the only works requiring heavy repairs. The filling up of the embankments is going on as actively as the weather will permit. Above 1,500 workpeople are employed upon the Incline. The double road is being laid in from Paduldhery to Kurjut, and the Engine Shed and other building at that Station are in progress.

7. On the South-Eastern Line Deccan Division a new through siding, has been laid in at Lonowlee, at the top of the Incline, for the purpose of changing the Ghaut and Deccan Line Engines, and at the same Station the Reservoir has been enlarged during the season by the excavation of 12,565 cubic yards.

8. At Kirkee a Dwelling-house for a European Station Master has been completed.

9. At Poona the extension of the arrival Goods Shed has been finished. The Permanent Way has been maintained in good order, but a considerable increase in the renewal of sleepers has become necessary.

10. The fence walling on this division has become a serious item in the cost of maintenance. On hard dry ground this description of fence answers well enough; but on the light soils repairs are constantly required, and at the setting in of the rains a large force of men have to be employed repairing the damage caused by the settlement and scour of the foundations.

11. Sanction has just been obtained for planting a hedge alongside the walling; this addition will in two or three years time form a thoroughly efficient fence.

12. My Report of the 23rd May gave full details of the state of the Thull Ghaut Works up to that date. Since then the work has been almost entirely confined to tunnelling, which has progressed steadily. All the Tunnels will be finished by January next, with the exception of No. 2, which, at the present rate of progress, will be completed about three months later.

13. From Egutpoora to Julgaum the line generally has been kept in good order. The measures taken last season for preventing further slips in the embankments at Moondeegaum, Manickgaum, and Padlee, have proved successful; those embankments have given little or no trouble these rains. A slip occurred in Padlee cutting on 22nd June, causing a delay of three or four hours to the Passenger Train. The slip may be attributed to the unfinished state of the slopes, from which material for the embankment had been taken, and which had not been fully dressed off before the heavy rains set in: it is a contingency which is not likely to occur again. The 30 feet girder Bridge at Niphar, in substitution of the 15 feet arch, which proved insufficient last year, has been completed. The fence walling on this line, as on the South-Eastern, is a constant source of expense and annoyance, and a sanction for planting a hedge similar to that on the South-Eastern has been obtained.

14. While admitting that this fence on some situations is not satisfactory, I cannot allow that the numerous instances of cattle straying on the line are to be attributed altogether to defects in the fence. There is no doubt whatever that in many cases cattle are driven wilfully on the line, and more frequently are on the line with the knowledge of the owners, who are sufficiently shrewd to see that they have only to make a gap in the fence to escape conviction.

15. An instance in point occurred only the other day near Padlee, where the Patell of Shenwud was seen about three o'clock one morning deliberately to break down the fence and drive his cattle on to the line; he was seized on the line with the cattle in his charge, and taken off to the Mamlutdar, who fined him ten Rupees.

16. The punishment seems hardly adequate to the offence, but the clear and summary conviction, which I have ordered to be printed and circulated along the line, may, I hope, have a good effect.

17. The line from Julgaum to Mulkapoor, a distance of 45¼ miles, was opened for public traffic on the 21st May. Since that date the road has been kept in good order, and the Engines have

been well and regularly supplied from the temporary Tanks at Nargaum and the Waggur.

18. A permanent Tank has been sanctioned at Nargaum.

19. A temporary Booking Office has been provided at Bhosawul; the permanent Station, which forms a part of No. 15 Contract, not being completed. The small roadside Stations at Wurrangaum and Nargaum are complete. The Station Building at Mulkapoor, including Station Master's apartment, Booking Office, and Waiting-room, is finished. The metalling of the platform is completed, and the approach road to the Station is in progress. The Tank-house is completed, and the Pointsmen's Cottages are ready for occupation. The Station Sidings and "Triangle" are in good working order, but they are not yet fully ballasted.

20. Between Mulkapoor and Sheagaum the masonry has made good progress since the date of my last Report. The Contractor's Engine now runs across the Biswan Viaduct of ten 30 feet girder openings, and conveys stone to the Kaydar Bridge at 41 miles, which is nearly ready for the girders. Beyond the Kaydar Bridge the masonry is well advanced.

21. I cannot venture to name any positive date for the opening of the line to Sheagaum, as the progress of the masonry and plate-laying depends so much on the weather and consequent state of the roads; but the Contractors promise that no efforts will be spared to get the road open as soon as possible, I have no doubt that by the end of the year, at latest, the line will be opened to Sheagaum.

22. At Nandoor Station the foundations for the Booking Office have been got in. The Well has been sunk to a depth of 52 feet, and will have to be taken down five or six feet lower to ensure a regular and full supply.

23. At Sheagaum Station the walls of the Booking-Office are up to the window and door-heads, and the Passenger and Goods' platform walls are completed, with the exception of the curbs. The Engine Shed walls are up to the springing level of the pitched stone arches, and the door and window casings are all fixed. The Pointsmen's Cottages are completed. The Well is sunk 33 feet, and will probably have to be deepened another 10 feet.

24. At the date of my last Report, Nos. 9, 11, and 12 Piers of the Mund Vaiduct had still to be founded. This was successfully accomplished before the rains set in, and there is now no further impediment to the rapid completion of this work. Piers 1 to 6 inclusive, No. 14, and both abutments, are up to the level of girders, and Piers 7 to 13 average about 14 feet below that level.

25 The Plate-laying is not yet commenced beyond the Mund Viaduct (67¼ miles on the contract), but the Contractor intends moving one of his Engines across the Mund after the rains, when the work will be pushed on with vigor. The Plate-laying may now be considered the measure of the time of completion to Budnaira, and if the Contractor's arrangements are successfully carried out, the whole should be completed within twelve months from this date. The Stations at Akola and Moortizapoor have been commenced, and good progress has been made with the Budnaira Station.

26. On Contract No. 14 about 93 per cent. of the earthwork in embankments has been executed, and the cuttings are nearly completed; about 35 per cent. of the Ballast has been spread. The masonry over the first 40 miles of the contract is well advanced, but the progress beyond that point, especially with the viaducts and larger Bridges, has been slow.

27. Looking at this Section between Budnaira and Nagpore as a distinct contract from No. 13, though in the hands of the same Contractors, there can be no question that the progress made up to this time is much below the requirements of the contract. I doubt, however, whether, considering the great scarcity of labor and carriage throughout Berar, it would have been expedient to force these works at the risk, or rather I should say with the certainty of impoverishing Contract No. 13. It would be in no way to the interests of the Company to have portions of Contract No. 14 completed while a link was wanting between them and the opened line, and therefore I am of opinion that under the peculiar circumstances of the country through which these lines pass, it is better that the Contractors should concentrate their forces and direct all their energies to the completion of the line in continuous sections.

28. If these contracts as regards the works are thus looked upon as one, the Contractors are, I think, bound to use their utmost efforts to push on the completion of the various sections. This I believe Messrs. Lee, Watson, and Aiton, are fully prepared to do, and as the pressure of work on Contract No. 13 is relieved, the works on Contract No. 14 will be carried on with greatly increased activity, On this system of working, the line may be expected to be completed to Nagpoor by June 1865.

Contract No. 15, Bhosawul to Hurda.

29. I regret to say that my expectations with regard to the progress of the masonry on the Taptee Viaduct, as stated in my last Report, have been far from realised. The Piers of the 150 feet openings, and seven 60 feet openings on the north side, instead of being up to level of girder-bed, are, on an average, about 30 and 26 feet respectively below that level, and I have still to report that the progress with the masonry, especially over the first 60 miles of the Contract, is far from satisfactory. Making every allowance for the difficulties which the Contractor may have experienced with regard to labor, I am bound to say that it does not appear to me that those difficulties have been met with an amount of energy at all calculated to overcome them.

30. I am not aware of any drawback or contingency to account for the small amount of masonry executed at the Taptee Viaduct during the latter part of the fair season.

31. I have represented what I consider to be an unsatisfactory state of affairs to the Contractor and his Agent, and I trust that arrangements will be made for carrying on the masonry works next season with proper energy and activity.

Contract No. 16.

32. A total of 1,070,590 cubic yards of earthwork in Embankments, and 331,619 cubic yards in Cuttings, have been executed on this contract, and 23,707 cubic yards of Ballast have been spread.

33. The progress generally with the masonry along the contract is satisfactory. At the Town

Viaduct six Piers and one Abutment yet remain to be founded.

34. The progress during the last season in getting in the foundations of this viaduct was checked by the want of sufficient pumping power. The Contractors are fully aware of this deficiency, and have taken means to remedy it. I trust therefore that next season the whole of the foundations will be got in, and good progress made with this important work. At Bogra Tunnel, 87 lineal yards of Headings have been driven, and the Cuttings at each end of the Tunnel are well advanced.

Contract No. 17.

35. The whole of the earthwork on this contract may be considered finished, and ballast for about 24 miles of line have been collected, and the greater portion spread. Considerable progress has been made in the masonry. Out of the total of eighty-one Bridges, sixty-two are in progress. The Culverts are also in a forward state.

36. The foundations of the Shair and Suckur Viaducts are very unfavorable: only one Abutment and one Pier of each have been founded. One Abutment and seven Piers of the Nerbudda Viaduct remain to be founded.

37. The Telegraph Line has been extended from Bhosawul to within 20 miles of Nagpoor, and Offices have been opened at Sheagaum, Akola, and Budnaira for Oomrawuttee for the use of the Public.

Resolution of the Government of Bombay.

His Excellency in Council observes that until the Taptee Viaduct is finished the works beyond it will not be completed quickly, and unless better progress is made Contracts Nos. 16 and 17, finishing the line to Jubburpoor, may possibly be completed before No. 15.

2. As Nos. 16 and 17 were begun later than No. 15, are further from the base of supplies and operations, and are no better off for roads or inhabitants, His Excellency in Council considers that the manner in which Contract No. 15 has been conducted since Mr. George Wythes has taken it, and the fact that the Contract time will be much extended, require some special notice, and that the Consulting Engineer of the Company, the referee under the Contract, might be asked whether he has no means of rousing Mr. Wythes' energies.

Agricultural Exhibition.

From the Officiating Secretary to Government, Straits Settlement, to the Secretary to the Government of Bengal,—(No. 15, dated Singapore, the 10th November 1863.)

Sir,—In acknowledging the receipt of your letter No 3913, dated the 28th July 1863, I have the honor, by desire of His Honor the Governor, to state, for the information of the Hon'ble the Lieutenant-Governor of Bengal, that although owing to the want of any field for agriculture at Singapore it has been found impossible to form at this Station a Local Committee to further the object of the proposed Exhibition at Calcutta, a Committee, composed of the gentlemen whose names are marginally noted, has been formed at Penang, with the view of collecting and transmitting to Bengal specimens of the various articles of agricultural produce to be found in that Island and its Dependency, Province Wellesley, and His Honor is induced to believe that the contribution from that Residency will not be deemed undeserving of notice.

President.

From R N. Shore Esq, Commissioner of Cuttack, to the Secretary to the Government of Bengal,—(No. 490, dated the 21st November 1863.)

Sir,—I have the honor to submit a further Report on the proceedings of the Local Committees for the Agricultural Exhibition in this Division.

2. Two Meetings have been held this month in Cuttack, on the 3rd and 14th respectively. Several samples of Grain and Timber were examined by the Committee, and it was decided that the following articles should be sent, subject to sanction of the Central Committee:—

1*st.*—Timber of four kinds (Kendu (Ebony), Sal, Pyusal, and Sissoo) from the Dhenkanal Tributary Mehal.

2*nd.*—Rice, the kind called Dewan Bhog, of remarkable fineness and whiteness, grown on Baboo Luckee Narain Rai's Estate.

3*rd.*—Leaf Tobacco grown on Baboo Rughoonath Chowdree's Estate of Saibeer.

4*th.*—Pulses, *viz*, Koolthee, Kulai, and Moong, from Baboo Goluck Chunder Bose's Estate.

3. It is doubtful whether this District will supply any other articles worthy of a place in the Exhibition.

4. A Meeting was held at Balasore on the 20th September, which was reported to this Office too late to admit of the abstract being included in my last Divisional Report.

5. The Committee appear to be exerting themselves. Various articles of produce, *viz.*, Rice, Jute, Flax, and Pulse have been promised by some of the principal Zemindars; a young Bull (across with the Hurriana breed), Buffaloes, and Ghee are expected from Baboo Puddolochun Mundul, and measures were taken to obtain specimens of wild Silk, Indian Corn, and Safflower from the large Tributary Mehal of Mohurbhunge.

From G F. Cockburn, Esq., Commissioner of the Patna Division, to the Officiating Secretary to the Government of Bengal,—(No. 379, dated the 14th November 1863.)

Sir,—In continuation of my letter No. 349, dated 12th ultimo, I have the honor to submit as follows in regard to the proceedings of the District Committees for the Agricultural Exhibition.

2. From Sarun, Chumparun, and Behar no further information has been received.

3. *Tirhoot.*—A public meeting was held at Mozufferpore, in Tirhoot, on the 16th ultimo, for the purpose of making generally known the Rules promulgated by the Central Committee, Calcutta, in their Circular of 15th September, which had just come to hand, and it was decided to be impossible to carry out the measures and to forward the Returns by the fixed date, *viz.*, 30th instant, owing to the intervention of the Holidays and Sonepore Fair, so that the Returns would not reach the Central Committee before 15th December at soonest.

4. Nine more Prizes as per margin were announced, amounting to Rupees 775, making, in addition to those formerly presented, a total of twenty-eight Prizes, amounting to Rupees 2,135.

5. A re-distribution by the Local Committee of Tirhoot Prizes was agreed to, the whole amount being thrown into one general Fund and the Prize List if adjusted with the special object of apportioning the scale of Prizes with reference to the produce, &c., sent from the District to the Exhibition.

6. This last arrangement is reported by the Honorary Secretary to Central Committee as likely to create difficulty, as the Prize List was being printed and on the eve of issue, and some Tirhoot residents might have determined to be exhibitors on the faith of the scale of Prizes already announced.

7. Mr. Joint Magistrate and Deputy Collector Metcalfe was also appointed Secretary to the Local Committees, and no doubt will prove a very efficient one.

8. *Shahabad.*—From Shahabad I have received no further official information as yet, but I know that Mr. Grey, the Officiating Collector, has been very active in stirring up the Committee and people to take an interest in the coming Exhibition, and a local Show is to be held to-day at Arrah.

9. *Patna.*—In Patna three meetings took place on the 13th ultimo, 3rd and 11th instant, and various practical Resolutions passed, having reference chiefly to the degree of aid to be expected, if any, from the Central Committee in the transmission of Live Stock, &c., for the Exhibition, to the rules for aging of Live Stock, to sheep being four or two in number to meet the requirements of the Central Committee Prize List, to the raising of a Fund and making other arrangements for a local show to be held at Bankipore. To-day, the 14th instant, a slight alteration in regard to the Prizes given by two parties was made, and 100 Rupees was presented by Syed Mohamed Hossein Khan, *alias* Mahomed Nawab, for the best Cow of any age bred in the Patna Division, and thanks were awarded to A. Cole, Esquire, Deputy Magistrate of Barh, for his exertions on behalf of the local Show, &c.

10. A copy of this letter will be sent as usual for the information of the Honorary Secretary, Central Committee.

The Calcutta Gazette.

SATURDAY, DECEMBER 12, 1863.

Home Department.

LEGISLATIVE.

The following Act of the Governor-General of India in Council, received the assent of His Excellency the Governor General on the 7th December 1863, and is hereby promulgated for general information.—

Act No. XXIX of 1863.

An Act to declare the receipts of the Banks of Bengal, Madras and Bombay to be sufficient in lieu of the receipts of the Sub-Treasurers of Fort William, Fort St. George and Bombay respectively.

Preamble.

Whereas under the provisions of Act XXIV of 1861 *(to enable the Banks of Bengal, Madras and Bombay to enter into arrangements with the Government for managing the issue, payment, and exchange of Government Currency Notes and certain business hitherto transacted by the Government Treasuries)*, the Bank of Bengal has, through the Governor-General of India in Council, entered into an agreement with the Secretary of State for India in Council that so much of the business hitherto generally transacted at the General Treasury of the Government at the Presidency of Fort William as consists of receiving and paying money on behalf of the Supreme Government and the Government of Bengal shall be carried on and transacted by the said Bank: and whereas the Bank of Madras and the Bank of Bombay have entered into similar agreements through the Governor in Council of Madras and the Governor in Council of Bombay with relation to the business hitherto generally transacted at the Treasuries at Madras and Bombay respectively: and whereas the office of Sub-Treasurer at Fort William and the office of Sub-Treasurer at Fort St. George and the office of Sub-Treasurer at Bombay have been abolished, and the business generally transacted at these offices has for some time past been and is now under the said agreements carried on and transacted by the said Bank of Bengal, Bank of Madras, and Bank of Bombay respectively: and whereas doubts have been entertained whether in certain cases, in which during the existence of the office of Sub-Treasurer the receipt of the Sub-Treasurer was required the receipt of the Secretary of the Bank of Bengal, or of the Secretary of the Bank of Madras or of the Secretary of the Bank of Bombay, as the case may be, is a good and sufficient receipt and discharge to the person to whom the same is given: and where it is desirable that these doubts should be removed; It is enacted as follows:—

Receipts of Secretaries of the Banks to be good in lieu of those of the Sub-Treasurers at the Presidencies.

I. The receipt of the Secretary of the Bank of Bengal, of the Secretary of the Bank of Madras, and of the Secretary of the Bank of Bombay (as the case may be), granted under the circumstances aforesaid, shall be deemed to be, and always to have been, as good and sufficient a receipt and discharge to the person to whom the same is granted, as the receipt of the Sub-Treasurer of Fort William, or of the Sub-Treasurer of Fort St. George, or of the Sub-Treasurer of Bombay would have been if the office of the said Sub-Treasurer had not been abolished.

All Acts in which the Sub-Treasurers at the Presidencies are named to be read as if the Banks' Secretaries were named instead.

II. In every Act and Regulation in which the words Sub-Treasurer of Fort William, Sub-Treasurer of Fort St. George, or Sub-Treasurer of Bombay occur in connection with the payment of money required to be paid to, or of any act required to be performed by, any one of the said Sub-Treasurers, such Act or Regulation shall hereafter be

read as if the words Secretary of the Bank of Bengal, Secretary of the Bank of Madras, and Secretary of the Bank of Bombay occurred therein, instead of the words Sub-Treasurer of Fort William, Sub-Treasurer of Fort St. George, and Sub-Treasurer of Bombay respectively.

A. G. Macpherson,

Offg. Depy. Secy. to the Govt. of India,
Home Department.

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 7th December 1863, and was referred to a Select Committee, with instructions to make their report thereon in three days :—

No. 27 of 1863.

A Bill to give effect to the publication of certain Orders and other matters in the Gazette of India.

Preamble.

Whereas the Governor-General of India in Council has resolved to publish an Official Gazette to be called the *Gazette of India* containing such Orders, Notifications and other matters as the Governor-General of India in Council shall direct to be inserted therein; It is enacted as follows :—

Publication in *the Gazette of India* to have the effect of publication in any other Gazette in which publication is prescribed by any law now in force.

I. When in any Regulation or Act now in operation, or in any Rule having the force of law, it is directed that any Order, Notification or other matter shall be published in the Official Gazette of any Presidency or place, such Order, Notification or other matter shall be deemed to be duly published in accordance with the requirements of the law if it be published either in the Gazette in which it would have appeared but for the passing of this Act, or in *the Gazette of India* under the directions of the Governor-General of India in Council.

Statement of Objects and Reasons.

This Bill has its origin in various representations which have been made to Government as to the inconvenience and costliness of the present mode of giving publicity to the Orders and Notifications of the Government of India. All the Orders of the Government of India are published in the Calcutta Gazette. The Calcutta Gazette is also the Gazette of the Government of Bengal, and that Government being concerned with the direct administration of the country has, on an average, occasion to publish much more matter than ordinarily emanates from the Government of India. The result is that when the Calcutta Gazette is circulated for the purposes of the Government of India, it is circulated with an immense quantity of matter attached to it which is of no interest beyond Bengal proper. The cost of printing is thus needlessly increased, the expense of transmission is augmented, and after all the Gazette is a less perfect medium of communication than if it were less bulky. Legislation is needed because there are various Regulations and Acts in which it is directed that certain Orders shall be published in the Calcutta Gazette, and it is therefore necessary to provide that when such publication is not intended to have reference to Bengal alone it shall in future be made in the *Gazette of India*.

Government of India.

Abstract of the Proceedings of the Council of the Governor-General of India assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 and 25 Vic., Cap. 67.

The Council met at Government House on Monday, the 7th December 1863.

Present:

His Excellency the Viceroy and Governor-General of India, *presiding*.

Major-General the Hon'ble Sir R. Napier, K. C. B.
The Hon'ble H. B. Harington.
The Hon'ble H. Sumner Maine.
The Hon'ble Sir C. E. Trevelyan, K. C. B.
The Hon'ble W. Grey.
The Hon'ble R. S. Ellis, C. B.
The Hon'ble A. A. Roberts, C. B.
The Hon'ble H. L. Anderson.
The Hon'ble C. H. Brown.

The Hon'ble Mr. Anderson and the Hon'ble Mr. Brown took the Oath of Allegiance, and the oath that they would faithfully discharge the duties of their office.

Oudh Claims Commissioners' Bill.

The Hon'ble Mr. Maine introduced the Bill to provide for the appointment of Commissioners to enquire into certain claims against the late Native Government of Oudh, and moved that it be referred to a Select Committee, with instructions to report in three days. He said that this Bill having already been published in the *Gazette* by the order of the late Governor-General, it was unnecessary for him to ask for leave to introduce it, and he proposed therefore to introduce the Bill, and move that it be referred at once to a Select Committee. The Bill related to certain claims of very old standing against the former Government of Oudh,—some of the claims dating from the last century. Even before Oudh became part of British India, the Government of the East India Company had frequently been urged to use its influence with the King of Oudh for the purpose of getting these claims satisfied, and on the annexation of that Province they were pressed directly against the Government of India on the ground that Oudh having become a British possession the Government was bound to discharge the debts of the late Rulers. The Court of Directors in 1857 directed that a Commission should be appointed to investigate these claims: but at that time the state of the country was such that it was impossible to carry out those directions literally. Accordingly, the claims were sifted, some of them by an eminent lawyer, Sir Barnes Peacock, who was then a Member of Council, and some of them by Mr. E. C. Bayley, who was then Extra Judicial Commissioner of Oudh. Both Sir Barnes Peacock and Mr. Bayley recorded opinions unfavorable to all the claimants, but objections were taken to these decisions on the ground that the mode in which the investigations were conducted was inconsistent with the pledge given in Parliament by Lord Stanley in 1858, that these claims should be investigated by a Commission on the spot. Her Majesty's Government in England had recently requested that a Commission should issue to enquire into and dispose finally of these claims. The Government consequently had caused this Bill to be prepared, authorizing the appointment of Commissioners who would have all the powers of Ju'ges so as to enable them to conduct the proceedings with regularity. The claimants would be

permitted to appear before the Commissioners to support their claims. All necessary witnesses might be summoned and examined, and if examined would speak under the sanction of an oath, and be subject, if they gave false evidence, to the penalties of perjury. The provisions of the Bill were not new, for they were chiefly taken from the Act under which the Bengal Indigo Commission was appointed, although in some particulars modifications had been necessary to meet the peculiar circumstances of the case.

He would move that the Committee be instructed to report in three days. Some despatch in the passing of the Act was necessary in as much as notice had already been given that an enquiry would be held under the Act in Calcutta, which the claimants preferred to Lucknow as the place of sitting, and the time named for holding that enquiry was at hand.

The Motion was put and agreed to.

Alimentary Salt Bill (Central Provinces).

The Hon'ble Mr. Harington moved for leave to introduce a Bill for regulating the importation and manufacture of alimentary Salt in the Territories administered by the Chief Commissioner of the Central Provinces. He said a communication lately received from the Chief Commissioner of the Central Provinces brought to the notice of the Government of India the very unsati-factory state of the law in those Provinces in respect to that branch of the public Revenue which was derived from the duty upon Salt. In the Province of Nagpore an order of the Local Government, passed in the month of May 1861, to which the Indian Councils' Act of the same year had given the force of law, imposed a duty of one Rupee eight annas per maund on Salt imported into the Province; but no orders were issued as to the manner in which the duty was to be levied, or as to the measures by which infringements of the order imposing the duty were to be prevented and punished. Practically the system in force in the North-Western Provinces under the provisions of Act XIV. of 1843, for regulating in those Provinces the levy of Customs duties and the manufacture of Salt was stated to have been, more or less, acted upon in the Central Provinces; but it was suggested that this had been done without any legal warrant. Furthermore, it appeared that as regarded some parts of the Central Provinces orders had been issued at different times by the Government of the North-Western Provinces which would seem to be scarcely consistent with so much of Act XIV. of 1843 as exempted the Saugor and Nerbudda Territories from the operation of that Act. The present Bill was intended to remove the existing doubts as to the state of the law, and to place the Customs duty on Salt in the Central Provinces, and all matters connected with the levy of the same, on the same footing as in the Territories under the North-West Government. This was proposed to be done by extending to the Central Provinces the law of the North-Western Provinces so far as the same was considered suitable thereto.

A Section had been added to the Bill indemnifying the Collectors of Customs and other Officers for acts done before the passing of the Bill which might lawfully have been done had the Bill been in force at the time, and declaring that no action or proceeding should be maintained against any such Collector or other Officer in respect of any thing so done.

The Motion was put and agreed to.

Poorwah and Khuddee Bill.

The Hon'ble Mr. Harington also moved for leave to introduce a Bill to bring the Jagheers of Poorwah and Khuddee, in the District of Banda, under the operation of the general Regulations. He said that the Bill was introduced at the request of the Government of the North-Western Provinces. The two Jagheers to which the Bill related were declared by Regulation XXII. of 1812 to have always been, and to be still exempted from the operation of the general Regulations. The Jagheer of Poorwah was resumed in the year 1856, and the Jagheer of Khuddee in the year 1853. From the time of their resumption the two Jagheers had been administered by the Officers of the British Government according to what was known as the Non-Regulation system; but being included in a District (Banda) which was subject to the general Regulations, it was considered desirable that they also should be brought under the operation of those Regulations, in order that the entire District might be administered on one uniform system.

The Motion was put and agreed to.

Hindoo and Mahomedan Law Officers' Bill.

The Hon'ble Mr. Roberts, in moving for leave to introduce a Bill for the abolition of the offices of Hindoo and Mahomedan Law Officer, said the object of the Bill was two-fold; *firstly*, the abolition of the appointments of Hindoo and Mahomedan Law Officers throughout the country; and, *secondly*, the disseverance of the connection of Government with the offices of Cazi-ul-Cuzat or head Cazis of Provinces, and of City, Town, and Pergunnah Cazis. The Council would remember that for many years after the introduction of the British Rule into India the European Officers of the Government, partly no doubt from the paucity of their number, and partly also from their ignorance alike of the languages and of laws of the people, did not take any direct part in the administration of Justice, which was conducted by native functionaries; and even when Lord Cornwallis, in the year 1793, constituted Courts of Justice presided over by European Judges in Bengal, and when at a later date similar Courts were established in the Madras and Bombay Presidencies, a Mahomedan and a Hindoo Law Officer was appointed to each Court of Civil Judicature for the purpose of expounding the laws of the Hindoos and of the Mahomedans in causes which might be referable to the determination of those Authorities. Although to this day in suits regarding succession, inheritance, marriage, and caste, and all religious usages and institutions, the Mahomedan Law with respect to Mahomedans, and the Hindoo Law with regard to Hindoos, were still the general rules by which the Courts were to form their decision, yet the assistance of Mahomedan or Hindoo Law Officers was no longer deemed expedient or necessary for the exposition of those Laws. So far back as the year 1773 Mr. Warren Hastings, with his usual discernment and energy, authorized the compilation of a Digest of the Laws of the

Hindoos, and it was published the following year. He also recommended the translation of the Hedaya, the most celebrated law treatise of the Sunni School of Mahomedan Law. It was printed in Calcutta in 1791. Since then the labors of Sir William Jones, and of a great many distinguished Oriental scholars, among whom he might mention the names of Messrs. Colebrooke, Halhed, Haughton, Hamilton, Harington, Wynch, Sutherland, Sir Francis Macnaghten, Sir William Macnaghten, Sir Archibald Galloway, Dr. Sprenger, Dr. Roer, Captain Lees, and Messrs. Neil Baillie and Macpherson, and, still later a very learned Native gentleman, now a Member of the Legislative Council of His Honor the Lieutenant-Governor of Bengal, Baboo Prosonno Coomar Tagore, on this side of India—of Sir Thomas Strange and Mr. Ellis on the Madras side—of Sir Erskine Perry and Messrs. Norris, Willoughby, and Borradaile at Bombay; together with the many valuable works on both the Civil and Criminal Codes of the Hindoos and Mahomedans which had appeared in France, Germany, Holland, Russia, and at Constantinople, had given us access both to the original laws and to the works of Commentators, and had rendered the courts independant of the expositions of Hindoo and Mahomedan Law Officers. To the value of Sir William Macnaghten's famous work, entitled the Principals and Precedents of Hindoo and Mahodan Law, Sir Edward Ryan, formerly chief Judge of the Supreme Court of Calcutta, had, in the Judicial Committee of the Privy Council, of which he was one of the Judges, borne the highest testimony. He stated that it was all but decisive on any point of Hindoo Law contained in it, and that more respect would be paid to its *dicta* by the Judges of the Calcutta Court than even to the opinions of the Pundits: and the late Horace Hayman Wilson, no mean authority, was of opinion that a similar character was applicable to the Mahomedan portion. There were besides Digests of Decisions and the reported Decisions of the late Supreme and Sudder Courts and of the Zillah Courts of all the Presidencies, which have been published annually for many years past. It was under such circumstances that the Hon'ble and learned Chief Justice of the High Court of Judicature at Calcutta, soon after the formation of that Court, expressed his opinion that neither Hindoo nor Mahomedan Law Officers were any longer required. The Code of Procedure gave the Courts power to take any evidence that they might deem necessary, and they had the means in standard works, and in the rulings of the Courts for a period of seventy years, of ascertaining what the law really was. It was proposed therefore that the Courts should henceforth expound the law themselves without the intervention of Law Officers. The foregoing remarks referred to the Courts of Civil Judicature. As regarded the administration of Criminal Justice, the employment of a Law Officer was not only unnecessary, but was not compatible with the present state of the law. On the introduction of the British Rule, the Government succeeding the Mogul Government, retained the Mahomedan Law as the rule for the administration of Criminal Justice, but reserved to itself the right of introducing such alterations and modifications as reason and humanity might suggest. In the course of time a mixed Mahomedan and Regulation Criminal Law sprung up, which prevailed for many years, and, in the administration of it, the Futwa or opinion of a Mahomedan Law Officer was only occasionally necessary. But this mixed law was finally superseded upwards of two years ago by Act XLV. of 1860, known as the Indian Penal Code, which was now the Criminal Law throughout the length and breadth of British India. It minutely defined every offence, and prescribed a suitable punishment for every offence. It was followed by Act XXV. of 1861, called the Code of Criminal Procedure, which prescribed that if the accused person was acquitted, the Court should record a judgment of acquittal. If the accused person was convicted, the Court should proceed to pass sentence upon him according to law. As regarded therefore the administration of Civil Justice, the retention of the offices of Hindoo and Mahomedan Law Officers was deemed both unnecessary and inexpedient, while on the introduction of the Penal Code the employment of Mahomedan Law Officers in the administration of Criminal Justice had become quite obsolete. The abolition, therefore, of these offices was the first object of the Bill. The present incumbents would of course be put on the same footing as all Officers of Government whose appointments were from time to time abolished.

It was further proposed by the Bill to dissever the connection of Government with the office of Cazi-ul Cuzat, or chief Cazi of a Province, and also with the offices of City, Town, and Pergunnah Cazis. These offices did not rest upon, nor were they created by, any legislative enactment of the British Government. They were an institution of Mahomedan Government and of Mahomedan Society. We found Cazis existing in every City, Town, and Pergunnah, and all that our earlier Legislators sought to do was to define generally what the duties of Cazis were, and to provide that persons of character, and duly qualified with respect to legal knowledge, should be appointed to those offices. The letter of the Regulations of the three Presidencies regarding the appointment and removal of Cazis was nearly identical. Indeed, Regulation XI. of 1802 of the Madras Code was avowedly framed upon Regulation XXXIX. of 1793 of the Bengal Code. These Regulations defined the duties of Cazis to be "the preparing and attesting deeds of transfer and other law papers, celebrating marriages, and performing such religious duties or ceremonies prescribed by the Mahomedan Law as have been hitherto discharged by them." The Bengal Regulation added: "and also for superintending the sale of distrained property, and paying charitable and other pensions and allowances." Further, in Bengal and Madras the Cazi-ul Cuzat or Chief Cazi was constituted the Mahomedan Law Officer in the Sudder Courts. On the Bombay side, in addition to the ordinary duties of a Cazi as described above, an important use of the office was stated to be "in furnishing the means of settling questions of inheritance and succession between Mahomedans." He hoped he had succeeded in shewing that Cazis were no longer required as exponents of Mahomedan Law. Then as regarded the duty of preparing and attesting Deeds of transfer and other law papers, although Cazis were occasionally employed by the public as notaries for this purpose, they had been, to a great extent, superseded by the regular Registrars of Deeds who were appointed under separate enactments for the registry of Deeds. The

attestation of a Deed by a Cazi was received *quantum valeat* in our Courts: but the same force did not attach to it as to the attestation of a Registrar of Deeds. It now remained for him to explain that they had long ceased to be employed in superintending the sale of distrained property, or in paying pensions and allowances. These duties had been transferred to regularly constituted and salaried servants of the Government, which Cazis had never been. A few Cazis might have received small salaries, and there were believed to be a few endowments in the Madras and Bombay Presidencies; but the majority of Cazis had been remunerated for any services they might have performed for the State by khilats or annual presents in the shape of money or shawls, which were generally bestowed on the Bengal side at the Eed Festival. For their services as public notaries, or for their attendance at marriages, &c., they were remunerated by the persons who employed them. Nor must it be supposed that the Cazis recognized by Government and appointed under the Regulations were the only Cazis in the country. For one Cazi appointed by Government there were probably ten self-constituted Cazis, who were acceptable to, and recognized and employed by, the Mahomedan community. This circumstance of itself shewed that the time had arrived for discontinuing any interference on the part of Government with the appointment of Cazi, and for allowing perfect freedom of action in the matter to the Mahomedan community, subject only to a reference, in case of dispute, to a Court of Justice. Cazis, whether those who had heretofore been appointed by Government, or those who had established themselves as Cazis to the satisfaction of the community to which they belonged, would be free to discharge such duties as had heretofore been performed by them and were prescribed by the Mahomedan Law. All that it was proposed to do was to repeal the existing laws in our Statute Book regarding the office of Cazi, and to declare that Government would not henceforth make any fresh appointment to that office. The Bill, whether as regarded the offices of Hindoo and Mahomedan Law Officer, or as regarded the offices of Cazi-ul-Cuzat, or of other Cazis, would be a mere repealing enactment, and would erase some twenty-five Regulations and Acts in whole or in part from the Statute Book. The scope of the Bill, for leave to introduce which he now moved, did not appear fully from the title given in the List of Business for the day. The title which he proposed to give to the Bill was a Bill to repeal the laws relating to the offices of Hindoo and Mahomedan Law Officers, and to the offices of Cazi-ul-Cuzat and of Cazi, and to abolish the former offices.

The Motion was put and agreed to.

Receipts of Presidency Banks in lieu of Sub-Treasurers' Receipts Bill.

The Hon'ble Mr. Maine moved for leave to introduce a Bill to declare the receipts of the Bank of Bengal, the Bank of Madras, and the Bank of Bombay, to be good and sufficient in lieu of the receipts of the Sub-Treasurers of the Presidencies of Bengal, Madras, and Bombay. He said that the Bill was necessitated by doubts which were felt by certain learned persons as to the sufficiency of receipts granted by the Secretaries of the Banks of the three Presidencies in lieu of the receipts of the Sub-Treasurers of those Presidencies. By the Administrator-General's Act (VIII. of 1855) it was provided that the proceeds of certain estates in the hands of the Administrator-General should, if unclaimed for fifteen years or upwards, be paid to the Sub-Treasurer of the Presidency and carried to the credit of Government; and the Act declared that the receipts of the Sub-Treasurer and Accountant-General should be a full indemnity to the Administrator-General for such payments. By a recent arrangement come to between the Government and the Bank of Bengal, the Bank of Madras, and the Bank of Bombay, so much of the business of the Government Treasuries as consisted in paying and receiving money had been transferred to the three Presidency Banks. The question had been raised whether the receipt of the Secretary of one of the Banks in respect of payments made under the provisions of the Administrator-General's Act above referred to met the requirements of the law so as to constitute a full indemnity to the Administrator-General. The Advocate-General of Bombay and the Officiating Advocate-General here expressed an opinion that such receipts were not sufficient. Without discussing the correctness of that opinion it was sufficient to say that the fact of those two Officers deeming such receipts insufficient was quite enough to make it necessary to remove all question on the subject, for it would be quite intolerable to the public that any doubt should be permitted to exist.

The Motion was put and agreed to.

The Hon'ble Mr. Maine applied to His Excellency the President to suspend the Rules for the Conduct of Business, with a view to enable him to move that the Bill be introduced and passed,—observing, that he thought it very desirable that the Bill should pass at once, as he did not wish it to be supposed, even for a single day, that the receipts were insufficient.

His Excellency the President declared the Rules to be suspended.

The Hon'ble Mr. Maine then introduced the Bill, and moved that it be taken into consideration.

His Excellency the President said that it was by no means clear to him that there was any force in the objections which had been taken to the sufficiency of these receipts: and he rather questioned there being any necessity for passing the Bill at all.

The Hon'ble Mr. Maine said that the doubt should at all events be set at rest; and to this His Excellency the President assented.

The Motion was put and agreed to.

The Hon'ble Mr. Maine then moved that the Bill be passed.

The Motion was put and agreed to.

Administration of Justice at Aden.

The Hon'ble Mr. Anderson, in introducing the Bill to provide for the administration of Civil and Criminal Justice at Aden, and in moving that it be referred to a Select Committee, with instructions to report in one month, said that, although Aden had been for about a quarter of a century a British possession, no due provision had yet been

made for the proper administration of justice in it. The subject had long been under discussion, and some years ago the matter was brought to the attention of the Government of India by the Government of Bombay with reference to a sentence passed by the Resident at Aden. The Arab Commander of a vessel sailing under British colors had been sentenced to three years imprisonment for purchasing and receiving on board three slaves, but the Advocate-General at Bombay questioned the legality of the sentence, and was of opinion that the Resident had no power to carry it out. Many technical legal difficulties had been found in the attempt to deal with the matter, but these difficulties appeared to him to have been substantially surmounted in the Bill now introduced. Questions had been raised whether the subject ought to be taken up by the Local Legislature or by the Imperial Legislature, or whether it should be taken up partly by the one and partly by the other. It appeared to him that the last was in strictness the most correct course to pursue, but it certainly was also the most inconvenient one; and the Bombay Government had requested the Government of India to legislate for the whole subject in one measure. The Bill now introduced was originally drawn by the late Mr. Ritchie, but it had been revised and improved by Mr. Maine, who had embodied in it certain suggestions recently made by the Chief Justice of the High Court in

Mr. Anderson then briefly explained the provisions of the proposed Act, and concluded by stating that he considered the Bill to be well calculated to attain the object which the Government had in view, although he thought that one or two points of detail required consideration, which he doubted not they would duly receive from the Select Committee to which the Bill would be referred.

The Hon'ble Mr. Harington said that in assenting to the introduction of this Bill he wished it to be understood that he did not bind himself to all the provisions of the Bill. He considered some of these provisions extremely objectionable. He would not occupy the time of the Council by stating his objections in detail at this stage of the Bill, but would bring them forward in Select Committee, where they could be more conveniently considered and discussed in the first instance.

The Motion was put and agreed to.

"Gazette of India" Bill.

The Hon'ble Mr. Maine, in moving for leave to introduce a Bill to give effect to the publication of certain orders and other matters in the *Gazette of India*, said that the Bill had its origin in various representations which had been made to Government as to the inconvenience and costliness of the present mode of giving publicity to the Orders and Notifications of the Government of India. All Orders of the Government of India were published in the *Calcutta Gazette*. The *Calcutta Gazette* was also the *Gazette* of the Government of Bengal, and that Government being concerned with the direct administration of the country had on an average occasion to publish much more matter than ordinarily emanated from the Government of India. For instance, in the last number of the *Gazette*, while only five pages were filled with the Orders of the Government of India, there were about twenty pages which were filled with the Orders and other matter proceeding from the Bengal Government. The result was that, when the *Calcutta Gazette* was circulated for the purposes of the Government of India, it was circulated with an immense quantity of matter attached to it which was of no interest beyond Bengal Proper. The cost of printing was thus needlessly increased, the expense of transmission was augmented, and after all the *Gazette* was a less perfect medium of communication than if it were less bulky. The establishment of a new *Gazette* was rather a matter of Executive concern, but some legislation was needed, because there were various Acts and Regulations in existence in which it was expressly directed that certain Orders should be published in the *Calcutta Gazette*, and it therefore became necessary to provide that, where such publication was not intended to have reference to Bengal alone, it should in future be made in the *Gazette of India*. It was proposed to give the Governor-General in Council power to make rules discriminating between the Orders which were to appear in the *Gazette of India* and those which were to appear in the local *Gazette*.

His Excellency the President considered it doubtful whether any new *Gazette* should be established. Each local Government already had its own *Gazette*.

The Hon'ble Mr. Harington said that although it was intended that the *Gazette of India* should be kept quite separate and distinct from the local *Gazettes*, a copy would be furnished to all controlling Authorities throughout the country. Much repetition and re-printing of matter would thus be avoided.

The Hon'ble Sir Charles Trevelyan said that the question had been fully considered by the Executive Council before it was resolved that a new *Gazette* should be issued. There would be great convenience in the Government of India having a *Gazette* of its own; at present its orders were mixed up with all the matter contained in the Bengal *Gazette*, and carried all that matter about with them wherever they circulated.

His Excellency the President said that the position of the *Calcutta Gazette* appeared to him to be very similar to that of the *London Gazette*, which contained the Orders of Government and an immense mass of other matter besides, such as Lists of Bankrupteies and the like. However he had no wish to offer any opposition to the Bill.

The Hon'ble Mr. Maine observed that the suggestion that an Imperial *Gazette* should be published emanated from gentlemen who were connected with the Local Governments and who had been struck by the inconvenience of the present system.

The Hon'ble Sir C. Trevelyan remarked that there were many conveniences in each Government having a separate organ, if only for the sake of perspicuity, and for the sake of avoiding an unnecessary expenditure of postage. Moreover, he thought that there was another great advantage which would be derived from the Government of India having a *Gazette* of its own. He thought that the Supreme Government had hitherto always appeared too much to be mixed up with the Government of Bengal, and that it was very desirable to shew that it had in fact no more to do with that Government than with any other of the Local Governments.

The Motion was put and agreed to.

The Hon'ble Mr. Maine applied to His Excellency the President to suspend the Rules for the Conduct of Business, to enable him to introduce the Bill and move that it be referred to a Select Committee.

His Excellency the President declared the Rules to be suspended.

The Hon'ble Mr. Maine then introduced the Bill, and moved that it be referred to a Select Committee, with instructions to report in three days.

The Motion was put and agreed to.

Registration of Assurances Bill.

The Hon'ble Mr. Ellis moved that the amended Bill, to provide for the Registration of Assurances, be referred back to a Select Committee, with instructions to consider the reports received from the Local Governments and make a further report.

The Motion was put and agreed to.

Act XX. of 1862 Continuance Bill.

The Hon'ble Mr. Maine, in moving for leave to introduce a Bill to continue in force Act XX. of 1862 (to provide for the levy of Fees and Stamp Duties in the High Court of Judicature of Fort William in Bengal, and to suspend the operation of certain Sections of Act. VII. of 1859 in the said High Court) said that this was merely a continuing Bill corresponding with a Bill recently passed by the Council. When the High Courts were established great difficulty was experienced in applying certain Sections of the Civil Procedure Code to the Procedure of the High Courts in the exercise of their original jurisdiction. There was also a difficulty in substituting the system of Stamps, in suits instituted under the original jurisdiction of the Court, for the fees previously levied under the practice of the old Supreme Courts. A Bill was therefore introduced last year to suspend temporarily the operation of certain Sections of the Civil Procedure Code, and also certain Sections of the Stamp Act. It was hoped that arrangements would soon be completed which would render that suspension no longer necessary; and he was glad to be able to say that he had reason to believe that the difficulties which had been felt were fully disposed of by his Hon'ble friend, Mr. Harington, in the revised Civil Procedure Code which he had recently prepared, and which he hoped would be brought before the Council ere long. He proposed that the Act should remain in force until such date as the Governor-General in Council should order. Of course the Governor-General in Council would issue the requisite order as soon as the new Code should come into force.

The Motion was put and agreed to.

The Hon'ble Mr. Maine applied to His Excellency the President to suspend the Rules for the Conduct of Business, to enable him to introduce the Bill and move that it be referred to a Select Committee.

His Excellency the President declared the Rules to be suspended.

The Hon'ble Mr. Maine then introduced the Bill, and moved that it be referred to a Select Committee, with instructions to report in three days.

The Motion was put and agreed to

The following Select Committees were named:—

Ellis and Anderson, and the Mover.

LEGISLATIVE.

THE following Act of the Governor-General of India in Council, received the assent of His Excellency the Governor General on the 7th December 1863, and is hereby promulgated for general information.—

ACT No XXIX OF 1863.

An Act to declare the receipts of the Banks of Bengal, Madras and Bombay to be sufficient in lieu of the receipts of the Sub-Treasurers of Fort William, Fort St. George and Bombay respectively.

Preamble.

WHEREAS under the provisions of Act XXIV of 1861 (*to enable the Banks of Bengal, Madras and Bombay to enter into arrangements with the Government for managing the issue, payment, and exchange of Government Currency Notes and certain business hitherto transacted by the Government Treasuries*), the Bank of Bengal has, through the Governor-General of India in Council, entered into an agreement with the Secretary of State for India in Council that so much of the business hitherto generally transacted at the General Treasury of the Government at the Presidency of Fort William as consists of receiving and paying money on behalf of the Supreme Government and the Government of Bengal shall be carried on and transacted by the said Bank: and whereas the Bank of Madras and the Bank of Bombay have entered into similar agreements through the Governor in Council of Madras and the Governor in Council of Bombay with relation to the business hitherto generally transacted at the Treasuries at Madras and Bombay respectively: and whereas the office of Sub-Treasurer at Fort William and the office of Sub-Treasurer at Fort St. George and the office of Sub-Treasurer at Bombay have been abolished, and the business generally transacted at these offices has for some time past been and is now under the said agreements carried on and transacted by the said Bank of Bengal, Bank of Madras, and Bank of Bombay respectively: and whereas doubts have been entertained whether in certain cases, in which during the existence of the office of Sub-Treasurer the receipt of the Sub-Treasurer was required the receipt of the Secretary of the Bank of Bengal, or of the Secretary of the Bank of Madras or of the Secretary of the Bank of Bombay, as the case may be, is a good and sufficient receipt and discharge to the person to whom the same is given; and whereas it is desirable that these doubts should be removed; It is enacted as follows:—

Receipts of Secretaries of the Banks to be good in lieu of those of the Sub-Treasurers at the Presidencies.

I. The receipt of the Secretary of the Bank of Bengal, of the Secretary of the Bank of Madras, and of the Secretary of the Bank of Bombay (as the case may be), granted under the circumstances aforesaid, shall be deemed to be, and always to have been, as good and sufficient a receipt and discharge to the person to whom the same is granted, as the receipt of the Sub-Treasurer of Fort William, or of the Sub-Treasurer of Fort St. George, or of the Sub-Treasurer of Bombay would have been if the office of the said Sub-Treasurer had not been abolished.

All Acts in which the Sub-Treasurers at the Presidencies are named to be read as if the Banks' Secretaries were named instead.

II. In every Act and Regulation in which the words Sub-Treasurer of Fort William, Sub-Treasurer of Fort St. George, or Sub-Treasurer of Bombay occur in connection with the payment of money required to be paid to, or of any act required to be performed by, any one of the said Sub-Treasurers, such Act or Regulation shall hereafter be

read as if the words Secretary of the Bank of Bengal, Secretary of the Bank of Madras, and Secretary of the Bank of Bombay occurred therein, instead of the words Sub-Treasurer of Fort William, Sub-Treasurer of Fort St. George, and Sub-Treasurer of Bombay respectively.

THE following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 7th December 1863, and was referred to a Select Committee, with instructions to make their report thereon in three days :—

No. 27 OF 1863.

A Bill to give effect to the publication of certain Orders and other matters in the Gazette of India.

Preamble.

WHEREAS the Governor General of India in Council has resolved to publish an Official Gazette to be called the *Gazette of India* containing such Orders, Notifications and other matters as the Governor-General of India in Council shall direct to be inserted therein; It is enacted as follows :—

Publication in *the Gazette of India* to have the effect of publication in any other Gazette in which publication is prescribed by any law now in force.

I. When in any Regulation or Act now in operation, or in any Rule having the force of law, it is directed that any Order, Notification or other matter shall be published in the Official Gazette of any Presidency or place, such Order, Notification or other matter shall be deemed to be duly published in accordance with the requirements of the law if it be published either in the Gazette in which it would have appeared but for the passing of this Act, or in *the Gazette of India* under the directions of the Governor-General of India in Council.

STATEMENT OF OBJECTS AND REASONS.

THIS Bill has its origin in various representations which have been made to Government as to the inconvenience and costliness of the present mode of giving publicity to the Orders and Notifications of the Government of India. All the Orders of the Government of India are published in the Calcutta Gazette. The Calcutta Gazette is also the Gazette of the Government of Bengal, and that Government being concerned with the direct administration of the country has, on an average, occasion to publish much more matter than ordinarily emanates from the Government of India. The result is that when the Calcutta Gazette is circulated for the purposes of the Government of India, it is circulated with an immense quantity of matter attached to it which is of no interest beyond Bengal proper. The cost of printing is thus needlessly increased, the expense of transmission is augmented, and after all the Gazette is a less perfect medium of communication than if it were less bulky. Legislation is needed because there are various Regulations and Acts in which it is directed that certain Orders shall be published in the Calcutta Gazette, and it is therefore necessary to provide that when such publication is not intended to have reference to Bengal alone it shall in future be made in the *Gazette of India*.

The Act, which was to expire on the 1st January 1863, was by Act XXIV of 1862 continued in force until the 1st January 1864.

Statement of Objects and Reasons.

The only existing legal provision for the Municipal management of Towns and Villages throughout the Districts under the Government of Bengal, except the Town of Calcutta and its Suburbs, is contained in Act XXVI of 1850. That law was enacted to provide for the making, repairing, cleaning, lighting, or watching any public streets, roads, &c., and for the prevention of local nuisances, but it was to come into operation only at the instance, and upon the spontaneous expression of a general desire on the part of the inhabitants of the Towns to be subjected to its provisions. The Act contained no fixed principle of taxation, but left power to the Municipal Commissioners, subject to the control of the local Government, to determine in each place in which it might be introduced the form which the taxation should take. Similarly, it left the determination and definition of what might be deemed nuisances within the meaning and intention of the law, as well as the measures to be resorted to for their prevention or removal, to the discretion of the Commissioners.

So limited has been the operation of the law during the years that have passed from its first enactment up to the present time, that it may fairly be deemed to have failed to provide effectually for the objects with which it was framed, and this failure may be attributed to the peculiar features of it above enumerated.

It is proposed, therefore, by the present Bill, to enable the local Government to provide effectually for the Municipal management of Towns, Villages, &c., in the interior of the Provinces subject to the jurisdiction of the Lieutenant-Governor of Bengal, where such provision appears to be called for, and to be in accordance with the wishes of the owners of property and the more intelligent classes generally of the Towns, Villages, &c., to which it is to be applied.

The want of such a legal provision to strengthen the hands of the District Executive Officers has long been felt, and has more especially attracted notice during the last two or three years, in which a fatally destructive epidemic fever, generated by the malaria arising from an entire absence of conservancy measures, has raged unchecked within the large and densely populated Towns and Villages, bordering on either bank of the River Hooghly in the Districts of Nuddea, Hooghly, and the 24-Pergunnahs. For the prevention and removal of the chief causes of this malaria several Sections of the Bill are calculated to provide effectually.

The Board, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so.

The following are the Conditions of Sale :—

1. The Opium will be sold for exportation by Sea only, and no Certificate will be granted except to cover such export.

2. The Opium will be ordinarily offered for sale at an upset price of Rupees 400 per Chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by Clause 12 of these Conditions of Sale.

3. The Sale shall commence at the hour of 11 A. M. of the day fixed by previous Notification, and shall not be continued after the hour of 5 P. M., but if at that hour any of the lots advertised for sale shall remain unsold, the Sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a Public Holiday) at the hour of 11 A. M., and so on, until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board may dispose of the lots which remain on hand at a future Sale.

4. Each lot shall contain five Chests.

5. A Promissory Note for a sum calculated according to the scale noted in the margin shall be taken as a deposit on each lot from the Purchaser in the Sale Room, and before the lot is registered in the Sale Book, and all such Promissory Notes shall be redeemed on the part of the Purchasers at this Office by Bank of Bengal Receipts, or by substitution of other Public Securities of the Bengal Government, on or before 4 o'clock in the afternoon of the fifth day after the Sale, or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts, or deposit of other Public Securities as aforesaid shall have been delivered in, shall be re-sold at such time or times, and under such conditions of re-sale, as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

On bids of „ 1,600, but less than „ 2,000	„ 400 „
And so on, Rs. 100 being added to the Deposit for every additional Rs. 400 bid.	

6. The Promissory Notes taken on the day of sale under the last mentioned condition, if remaining unredeemed at 4 o'clock of the fifth day following the day of Sale, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

7. No tender of Money, Bank of Bengal Receipts, or Public Securities, on account of Opium, upon which the prescribed Deposit may not have been made before 4 o'clock of the fifth day following the day of Sale, will be afterwards accepted.

8. The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

10. No deposit of Public Securities under the fifth of the present Conditions will be received in this Office, except from the party recorded as the Purchaser in the Sale Book, or his authorized Agent. The Receipt for deposit of Public Securities will be granted only in the name of such Purchaser, and the Securities so deposited will be returned when payment in full has been made by the said Purchaser or his Order.

11. The Officer superintending the Sale on the part of the Board of Revenue is empowered to reject, at his discretion, the bid of any individual, unless such individual shall, on demand, tender at the time a Deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these Conditions.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 400 Rupees specified in the second of these Conditions.

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

15. The following papers, together with samples of the Opium for sale, will be exhibited for inspection on the day of sale, or may be seen previously to that date by application at the Office of the Junior Secretary to the Board of Revenue:—

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1862-63 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1864, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantitiy of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

NOTIFICATION.

AN Examination of candidates for admission as Pleaders of the Mofussil Courts will take place in Calcutta on the last Monday in January 1864, and at the Head-Quarters of each Division on the last Monday of July 1864.

The Examination will be conducted as nearly as possible in accordance with the Rules laid down by the late Sudder Court in February 1861. These Rules are as follows:—

1. There shall be two distinct Grades or Classes of Pleaders as heretofore.

2. The Senior Grade shall be allowed to plead at the Bar of all the Courts subordinate to the High Court, Civil, Criminal, and Revenue, and shall be further eligible for the office of Moonsiff.

3. The Junior Grade shall be restricted to practise in the Courts of the Sudder Ameen, the Moonsiff, the Magistrate, the Collector and their Subordinates.

4. The examination shall be partly written and partly *viva vôce*.

5. The *viva vôce* examination shall be such as to test the practical knowledge of the candidates on questions connected with the subjects of the test.

6. The written examination papers shall be prepared by Examinees, who shall act in conjunction with, and under the control of, the High Court.

7. The written examination shall form the subject of two papers, of which the former shall embrace questions relative to the Law of Property and its subordinate heads, and the second questions on Evidence, Civil and Criminal Procedure and Criminal Law. The maximum number of marks for each of these papers shall be 100, and no candidate shall be held to have passed unless he shall have obtained 160 marks in the two papers.

8. Applications for admission to Examination shall in all cases be sent or submitted to the Zillah Judge of the District in which the candidate resides, or is employed, at least one month before the date fixed for Examination, and the candidate shall satisfy the Judge by Certificate or otherwise that he is a person of good moral character. The date on which the application is received shall be noted thereon.

9. Candidates residing in Calcutta shall submit their applications to the Judge of the 24-Pergunnahs.

10. Persons under the age of twenty shall not be eligible for examination.

11. Every applicant for examination for the higher Grade shall pay a fee of Rupees 20, and for the lower Grade a fee of Rupees 10, and in the event of the candidate's passing, a second fee of the same amount, as that demanded prior to examination, must be paid before he is entitled to receive a Diploma. In the event of his not passing the fee will be forfeited.

12. In the case of parties desirous of being examined in Calcutta, the requisite fees must be deposited in the Treasury of the Collector of the 24-Pergunnahs, and in the case of candidates for the Mofussil Examinations, the fees must be paid into the Collectorate Treasury of the District in which the Examination will be held. The candidate tendering the fee will at the same time present the Certificate of Admission provided by Rule 8, and the Collector's receipt for the fee will be endorsed on the Certificate

13. There shall be separate Examination papers for each Grade of Pleadership, but a candidate offering himself for a Senior Pleadership, and obtaining only three-fifths of the maximum number of marks, shall be entitled to a Junior Pleadership Certificate.

14. The Local Examination Committee shall consist of the Commissioner, Judge, Collector, Principal Sudder Ameen, and any others who shall be appointed, the Judge shall be ex-officio President, and, in the unavoidable absence of any of the Members, three shall form a quorum. Government of India, Public Works Department.

Upper Godavery Works.

From COLONEL R. STRACHEY, R. E, Secretary to the Government of India, Public Works Department, with the Governor General to Chief Commissioner, Central Provinces,—(No. 1388, dated the 14th July 1863.)

IN reply to your Secretary's letter No. 85, dated 24th January 1863, I am directed to inform you that His Excellency the Governor General has read your very clear and able Report on the projected works for improving the navigation of the River Godavery, forwarded therewith; with much satisfaction.

2. The general conclusions at which you appear to have arrived may be shortly summed up as follows :—

The works at the 1st Barrier may be constructed for 12 lakhs, and their completion is plainly necessary. Two projects are referred to as having been proposed for the works at the 2nd Barrier, estimated at 7 and 16 lakhs respectively, of which you prefer, for the reasons given, to adopt the lesser.

The works at the 3rd Barrier are roughly estimated at 15 lakhs. These you do not recommend to be taken up at present, confining the project to opening the navigation to the *foot* of the 3rd Barrier.

The works between the Barriers would be—

Removal of rocks in bed of river	2½	lakhs.
Groines for narrowing stream	3½	„
Towing-paths	½	„
Annicuts above 3rd Barrier ...	6	„
Total ...	12½	lakhs.

The total cost of the entire scheme would be—

Minor Project	46½	lakhs.
Major „	59½	„

and it would [illegible] a navigation from the falls of Wurda to the [illegible]orge of the Godavery, 350 miles, for vessels of two feet draught for five or six months in the year, and for vessels of from three to five feet draught for the greater portion of this time.

The Engineers have proposed measures for obtaining a permanent, or almost permanent, supply of water in the river by help of reservoirs, but no estimates for the cost of such works in any way deserving confidence have yet been drawn up.

The expenditure up to the end of September 1862 may be estimated at—

Surveys	¾	lakhs.
Works	4½	„
Tramways at the Barrier...	3	„
Miscellaneous	1	„
Total ...	9¼	lakhs.

but 7¼ lakhs more will probably have been spent up to the end of April 1863, or 17 lakhs in all.

The works which you recommend for present execution comprise only those at the 1st and 2nd Barriers, and the clearance of the river, &c., to the foot of the 3rd Barrier, at a total expenditure estimated at 25¼ lakhs, *viz* :—

1st Barrier	12	lakhs.
2nd „ (lesser project) ...	7	„
Works in river bed to foot of 3rd Barrier	6¼	„
Total	25¼	lakhs.

It is not clear whether this estimate includes any portion of the previous expenditure. You also propose, as an essential adjunct to this modified scheme, a road from Chanda to the foot of the 3rd Barrier, 75 miles (from Chanda to Nagpoor a road is already under construction,) and ask sanc-

tion to commence a survey and frame estimates, which are set down at 4½ lakhs. Further, you advise that the line of telegraph should be extended from Chanda to Dowlaishweram or Coconada *viâ* Doomagoodium, the head-quarters of the works; and that the postal communications should be put on a more efficient footing.

3. His Excellency the Governor General, after considering the questions raised by you in the light of such information as he has to bear on the subject, is satisfied that, by completing the line of Godavery navigation past the 1st and 2nd Barriers, and up to the foot of the 3rd Barrier, the rich southern part of the Central Provinces will get the advantage of the river route for the export of its produce, and the import of its foreign supplies

4. This part of the project will be a thing complete in itself, and of certain utility even if the navigation is only open for some four or five months in the year It is an error to consider that such communications as these must be permanently open to be of substantial utility. The Baltic is closed for half the year, and still the trade with its ports is of great importance. The canals of all the colder parts of Europe and America are closed for several months in every year, and yet their value is undisputed. For the transport of mere agricultural produce a partial communication, such as the Godavery might supply, when its ordinary and natural stream shall have been made navigable by the proposed works at the Barriers and in its bed, will probably be quite as much as the country through which it passes will really require for a long time to come. The crops come in but once a year, and the whole produce for export should easily be got rid of during the four or five months for which it may be looked on as pretty certain that the navigation may, under any circumstances, be kept open.

5. It will be understood that there is no idea of disputing the superior advantages of permanent water communication over an interrupted one. But in the present instance it would certainly be the case that the former and complete arrangement, if it could be effected, would greatly exceed the other in cost, and that the works on the more moderate scale would be perfectly suitable for the more extended project, if it should at any future time be desired to carry it out; and it might be the case that, after a great amount of outlay, it might finally be found an impossibility to maintain a constant supply of water sufficient for navigation, as it would depend on engineering operations without parallel, and of very questionable efficacy, *viz.*, the maintenance of the river supply from reservoirs Considering, therefore, that it is certain that the less complete scheme will practically give all that is essential, His Excellency has no sort of difficulty in accepting the conclusion that the more extended project should be entirely set aside for the present, either until the smaller one is actualy carried out to completion, or is in a very much more matured condition than at present. The Engineers will, for some considerable time to come, have quite sufficient employment in working out that part of the project which is certainly practicable, and the execution of which must obviously precede that of the other parts, the success of which may be looked on as in some degree questionable.

6. In considering the scheme that deals with the natural river supply, and will provide for four or five months navigation, it has, first, to be considered that the works at the 1st Barrier are in progress on designs that have been approved by the Madras Government, though they have not yet been submitted for approval to the Government of India. Inasmuch as these works are in actual progress, the Government of India has no desire to arrest them, or to interfere with the designs unless it is shewn to be quite essential.

7. The works at the 1st Barrier actually in hand should therefore be carried out vigorously according to the designs already approved by the Madras Government. Any distinct portion of the works not yet actually begun must not, however, be put in hand till the project has received the approval of the Government of India, excepting under special authority.

8. A detailed statement of the works in progress should be submitted at once, and the Engineers should make every exertion to complete the designs and estimate for these works, so that they may receive regular sanction without loss of time.

9. As regards the works at the 2nd Barrier, which are not yet begun, it must be distinctly understood that nothing is to be put in hand until the detailed projects and estimates are sanctioned by the Supreme Government, although, on a proper explanation of the general project and a general approval of it, His Excellency may be induced to authorize the preparation of materials of a durable nature, if it be desired, in anticipation of the submission of the detailed designs.

10. His Excellency considers that no opinion can be given as to which project for the works at this Barrier should be adopted, until the receipt of Captain Haig's Reports, since he may be able to shew good reasons for taking up the more costly rather than the less project.

11. Captain Haig therefore should consider carefully your remarks as to the works at this Barrier, and should take the necessary steps for obtaining final orders on the system to be adopted in dealing with them as early as possible. It will plainly be labour thrown away to work out detailed estimates for both projects, and essential facts can, without doubt, be quite sufficiently explained on approximate calculations to enable the Government of India to settle the doubtful points.

12. The preparation and submission of the designs and estimates for the works at the 2nd Barrier must therefore be looked on as the essential thing now pressing as regards this portion of the project.

13. The tramways at the 1st and 2nd Barriers which are understood to be far advanced may be completed.

14. In like manner, though your views as to limiting operations for the present to the works at the 1st and 2nd Barriers seem plausible, the Government of India must refrain from giving any decision on the matter till the opinion of the Engineers has been heard.

15. All work at the 3rd Barrier, however, should be stopped, including the tramway, unless the latter is much more nearly brought to completion than seems to be the case from your accounts. Captain Haig, of course, to be at liberty to make any representations he thinks fit on this point, and he should report, as early as possible, on the general question, so that the Government of India may be placed in a position to say finally whether the works at the 3rd Barrier shall be undertaken now,

or shall be deferred till the other two Barriers are opened.

16. It will be necessary that great care shall be taken by the Engineers that all minor operations between the Barriers, or in the parts of the rivers that will be opened on the completion of the Barrier Works, whether they be clearing away of rocks, construction of groines, or towing-paths, shall be completed at least as soon as the canals and locks; and that the necessary detailed designs and estimates be submitted in due course.

17. Captain Haig should be called on to report his opinion as to the period that will be required for the completion of the several parts of the project.

18. A clear Statement must be submitted at the earliest possible date, shewing the manner in which the past outlay on the Godavery Works has been applied. This Statement will include the cost of all stores, machinery, or vessels obtained from England, or transferred from other works.

19. The orders of the Government of India having already been issued in general terms as to the Transport Agency, it will now only be necessary to remark that a full detailed Report on the present condition of this branch of the operations, and of the system followed in all its transactions, should be submitted to the Government of India No addition to the fleet is to be made without specific authority, and all proposals for new work, in connexion with this part of the project, will require sanction by the Government of India in the regular way on estimate, as much as those for building operations.

20. His Excellency concurs with you in the expediency of having a road from Chanda to the foot of the 3rd Barrier. Considering that the navigation will be most actively in operation during the rainy months, a good road to the end of the navigation will be almost essential, and if the 3rd Barrier is eventually completed, this road will still act as a feeder. For the reason above noticed, it is desirable that you should consider and report on the general question of feeding roads to the river. Metalled lines will probably for the present, as a rule, be out of the question, but much good may be done by lines of a cheap description. The provision of a certain extent of such road might almost be fairly looked on as a necessary supplement to this project.

21. The orders of the Government of India have already been conveyed to you regarding the Establishments employed on these works.

22. The question of a line of telegraph, and also of postal communication between Nagpoor and Rajahmundry along the course of the Godavery, will be referred, with a favorable recommendation for consideration in the Home Department.

Ransome's Patent Silicious Stone.

From Major F. P. Lavard, Superintending Engineer, Northern Circle, to the Officiating Chief Engineer, Lower Provinces,—(No. 1424, dated Bhaugulpore, the 26th October 1863.)

Dated 12th September 1863.

Sir,—With reference to Circular No. 56 from the Government of Bengal, I have the honor to forward an interesting Report drawn up by Mr. G. Vivian, C. E., Executive Engineer and Superintendent of Nizamut Buildings at Moorshedabad, of his experience in the use of Ransome's Patent Silicious Stone.

2. I can fully testify to all Mr. Vivian states regarding the Patent Stone, having, during my recent inspection tour on the Berhampore Division, examined the new residence now under construction at Moorshedabad by Mr. Vivian for His Highness the Nawab Nazim.

3. The mouldings are most beautifully sharp and well-defined, more so perhaps than could be executed with the chisel; the breakages during the long voyage from England and subsequent transport to Moorshedabad from Calcutta were comparatively speaking very few The use of this Stone in the construction of the new Offices at the Presidency might be most advantageous.

4. I have kept no copy of Mr. Vivian's Report, and shall therefore feel obliged by your returning it after perusal, or when no longer required.

Extract from a letter from G. W. Vivian, Esq., C. E., Executive Engineer and Superintendent of Nizamut Buildings, Moorshedabad, to Captain J. G. R. Forlong, Officiating Superintending Engineer, Northern Circle, Bhaugulpore,—(No. 432, dated the 1st October 1863.)

Para. 1.—"I have the honor to acknowledge the receipt of your No. 1162, forwarding, for my information, Bengal Government's Circular No. 56, with annexures, and requesting me to report my experience of the various descriptions of stone or concrete I have made use of and their cost.

2. In the erection of the Nawab Nazim's new residence I have used Ransome's Patent Silicious Stone for a large portion of the external dressings and finishings and terra cotta to a limited extent. I consider Ransome's Patent Stone far superior to any Sandstone for external finishing and ornament, and well worthy the attention of the Government in the erection of any large buildings.

3. On commencing these works, I applied to persons at Chunar for tenders for capitals, bases, steps, &c., in Chunar Stone, but the tender furnished me, and the conditions attached were so absurd (an advance of two-thirds the full amount) and not being altogether satisfied with the character of the material, or sure of the description of workmanship, I abandoned this idea and turned my attention to Ransome's Stone. I had not seen any of the material, but was so satisfied with the description I met with of the chemical constitution of the substance, and modus operandi employed in its preparation, that I determined to give it a trial, and I am bound to say the result has been very satisfactory. When the stone-work was unpacked, the majority of the pieces manifested an alkaline efflorescence, which I at first sight feared was a premonitory symptom of disintegration, but this rapidly wore off, a great portion has been fixed nearly two years, and (if possible) appears more indurated now than when it arrived.

4. In Government of India's Circular, No. 46 of 1863, the instructions laid down for making concrete Stone by Ransome's Patent is dissimilar to that pursued in making the stone-work I have employed, it appears the constituent parts are merely incorporated by trituration in a cement mill, moulded and immersed in a solution of chloride of calcium, but the question is whether the moisture can be withdrawn from the interior

or the chloride of calcium made to interpenetrate the mass, and thereby produce a thoroughly homogeneous substance, unless artificial means be employed.

5. I enclose a Tracing of some of the articles I have had manufactured for the Palace of this stone, and a Statement shewing the original price in England and cost on reaching Moorshedabad. The Corinthian capitals are beautifully turned out, and it would have been quite impossible to have got them executed so artistically in Chunar Stone. Original Drawings were sent home for these details, therefore the price includes patterns and moulds. I believe Mr. Ransome will in time simplify the process and reduce the cost of production, and I have no doubt it will prove a great boon to the profession and be extensively used.

6. On the 28th ultimo I despatched to your address per rail, *viâ* Nulhatty, a package containing a pierced baluster and fragments of the Stone. For fixing this stone-work I use portland cement."

Extract from a letter from W. L. GRANVILLE, Esq., Architect to the Government of Bengal, to the Officiating Chief Engineer, Bengal,—(No. 35, dated the 9th November 1863.)

Para. 1.—" I have perused the papers forwarded with your letter No. 1617 of 7th instant, regarding the use of Ransome's artificial Stone, and beg to state that after many year's experience I believe it to be one of the most durable materials known.

2. It is not affected by any atmospherical changes of temperature on moisture, and is not subject to efflorescence or disintegration of any kind.

3. The presumed efflorescence noticed by Mr. Vivian was only a deposit from the atmosphere, of no harm whatever. In fact, the material is as indestructible as flint."

Government of Bengal.

Calcutta Port Fund.

From CAPTAIN THOMAS HILL, First Assistant Master Attendant in charge, to the Secretary to the Government of Bengal,—(No. 2168, dated the 10th October 1863.)

IN accordance with the request contained in Mr. Junior Secretary's letter No. 4925, dated the 6th instant, and previous correspondence on the subject, I have the honor to submit, herewith, the Calcutta Port Fund Account for the year 1862-63, from which it will be seen that the expenses of the year have exceeded the receipts by Rupees 31,208-15-7, although the total amount of collections during the year is in excess of the receipts of the year before, as shewn in the margin. But considering that a large item of Rupees 66,021-12 is charged in the account now submitted for the construction of new Boats and Buoys during the year, and that several Establishments, as per margin, not before charged against the Port Fund, are now so debited, the deficiency is sufficiently accounted for.

FORT WILLIAM;
MASTER ATTENDANT'S OFFICE,
The 10th October 1863.

THOMAS HILL, *Captain,*

First Assistant Master Attendant in charge.

From S. C. BAYLEY, Esq., Junior Secretary to the Government of Bengal, to the Officiating Deputy Auditor and Accountant-General to the Government of Bengal,—(dated the 1st December 1863.)

WITH reference to your letter No. 33M., dated the 15th September last, recommending the entertainment by the Master Attendant of an Accountant with Establishment, involving a total cost not exceeding Rupees (10,000) ten thousand per annum, for keeping the Accounts of the Calcutta Port Fund, I am directed by the Lieutenant-Governor to forward to you the accompanying copy of a letter* from the First Assistant Master Attendant in charge, submitting a Return shewing the account current of the receipts and disbursements of the Fund for the year 1862-63, and to request that you will be so good as to state if, looking to the amount of work to be done, which need scarcely take up anything like the whole time of a well paid Accountant, and to the fact that, since the Office of the Controller of Marine Affairs has been transferred to the Master Attendant, some Accounts Establishment will necessarily be placed at his disposal, a more economical scheme than that recommended by you might not be suggested, as the Fund cannot at present bear the additional expense of Rupees 10,000 per annum which will attend your proposal.

LEGISLATIVE.

THE following Act of the Governor-General of India in Council, received the assent of His Excellency the Governor General on the 7th December 1863, and is hereby promulgated for general information:—

ACT No. XXIX OF 1863.

An Act to declare the receipts of the Banks of Bengal, Madras and Bombay to be sufficient in lieu of the receipts of the Sub-Treasurers of Fort William, Fort St. George and Bombay respectively.

Preamble.

WHEREAS under the provisions of Act XXIV of 1861 (*to enable the Banks of Bengal, Madras and Bombay to enter into arrangements with the Government for managing the issue, payment, and exchange of Government Currency Notes and certain business hitherto transacted by the Government Treasuries*), the Bank of Bengal has, through the Governor-General of India in Council, entered into an agreement with the Secretary of State for India in Council that so much of the business hitherto generally transacted at the General Treasury of the Government at the Presidency of Fort William as consists of receiving and paying money on behalf of the Supreme Government and the Government of Bengal shall be carried on and transacted by the said Bank: and whereas the Bank of Madras and the Bank of Bombay have entered into similar agreements through the Governor in Council of Madras and the Governor in Council of Bombay with relation to the business hitherto generally transacted at the Treasuries at Madras and Bombay respectively: and whereas the office of Sub-Treasurer at Fort William and the office of Sub-Treasurer at Fort St. George and the office of Sub-Treasurer at Bombay have been abolished, and the business generally transacted at these offices has for some time past been and is now under the said agreements carried on and transacted by the said Bank of Bengal, Bank of Madras, and Bank of Bombay respectively: and whereas doubts have been entertained whether in certain cases, in which during the existence of the office of Sub-Treasurer the receipt of the Sub-Treasurer was required the receipt of the Secretary of the Bank of Bengal, or of the Secretary of the Bank of Madras or of the Secretary of the Bank of Bombay, as the case may be, is a good and sufficient receipt and discharge to the person to whom the same is given: and whereas it is desirable that these doubts should be removed; It is enacted as follows:—

Receipts of Secretaries of the Banks to be good in lieu of those of the Sub-Treasurers at the Presidencies.

I. The receipt of the Secretary of the Bank of Bengal, of the Secretary of the Bank of Madras, and of the Secretary of the Bank of Bombay (as the case may be), granted under the circumstances aforesaid, shall be deemed to be, and always to have been, as good and sufficient a receipt and discharge to the person to whom the same is granted, as the receipt of the Sub-Treasurer of Fort William, or of the Sub-Treasurer of Fort St. George, or of the Sub-Treasurer of Bombay would have been if the office of the said Sub-Treasurer had not been abolished.

All Acts in which the Sub-Treasurers at the Presidencies are named to be read as if the Banks' Secretaries were named instead.

II. In every Act and Regulation in which the words Sub-Treasurer of Fort William, Sub-Treasurer of Fort St. George, or Sub-Treasurer of Bombay occur in connection with the payment of money required to be paid to, or of any act required to be performed by, any one of the said Sub-Treasurers, such Act or Regulation shall hereafter be

read as if the words Secretary of the Bank of Bengal, Secretary of the Bank of Madras, and Secretary of the Bank of Bombay occurred therein, instead of the words Sub-Treasurer of Fort William, Sub-Treasurer of Fort St. George, and Sub-Treasurer of Bombay respectively.

THE following Act of the Governor-General of India in Council, received the assent of His Excellency the Governor-General on the 16th December 1863, and is hereby promulgated for general information :—

ACT No. XXX OF 1863.

An Act to provide for the appointment of Commissioners to enquire into certain claims against the late Native Government of Oudh.

Preamble.

WHEREAS certain persons have made demands against the Government of India in respect of claims preferred by them, either in their own right or as the representatives of persons now deceased, against the late Native Government of Oudh : and whereas it is desirable that Commissioners should be appointed for the purpose of investigating the said claims ; It is enacted as follows :—

Appointment of Commission of Enquiry.

I. It shall be lawful for the Governor-General of India in Council to issue a Commission to such persons as he shall think fit, for the purpose of enquiring into and reporting on such claims preferred against the late Native Government of Oudh, as shall be in the said Commission named and described. The said Commissioners shall fully enquire into the said claims respectively, and shall as soon as they conveniently can report to the Governor-General of India in Council the result of their enquiries, and shall in their report or reports make such suggestions, if any, as shall to them seem fit.

Governor-General in Council may appoint a sole Commissioner.

II. It shall be lawful for the Governor-General of India in Council to issue such Commission to one person only, if he shall so think proper : and if a Commission is issued to one person only, all the powers by this Act given to Commissioners shall and may be exercised by the sole Commissioner so appointed ; and all the provisions of this Act as to appointing new Commissioners in the room of any of the Commissioners dying or resigning, or becoming unable or refusing to act, and as to the powers to be exercised by the new Commissioners so appointed, shall apply equally (so far as the same may be applicable) to the case of a sole Commissioner dying or resigning, or becoming unable or refusing to act, and of any new Commissioner appointed in his room.

Death or resignation of any of the Commissioners.

III. In case of the death or resignation of any of the said Commissioners, or of any of them becoming unable or refusing to act, it shall be lawful for the other Commissioners or Commissioner to act alone, and all the powers by this Act given to Commissioners shall and may be exercised by the continuing Commissioners or Commissioner alone. It shall be lawful for the Governor-General of India in Council from time to time, without issuing a new Commission, to appoint some other person or persons to act as a Commissioner or Commissioners jointly with the continuing Commissioners or Commissioner, and in such case all the powers conferred by this Act shall and may be exercised by the said newly-appointed Commissioner or Commissioners jointly with the continuing Commissioners or Commissioner.

Claimants may appear to support their claims at time and place fixed by Governor-General.

IV. The said Commissioners shall enter in public upon the enquiry into the said claims respectively, at such time and place as shall have been fixed by the Governor-General of India in Council, by notification published in the Calcutta Gazette at any time whether before or after the passing of this Act. It shall be lawful for any of the claimants preferring the claims in the said Commission mentioned, to appear at the time and place so appointed in support of their claims respectively, either in person or by Agent duly constituted. The Secretary of State for India in Council may also in like manner appear at such time and place in opposition to the said claims. No claimant who shall not appear at the time and place appointed shall be entitled to appear subsequently or to take any part in the proceedings unless the Commissioners shall in their discretion specially permit him so to do. It shall be lawful for the Governor-General of India in Council by notification in the Calcutta Gazette to vary or cancel any notification previously given as aforesaid.

Mode in which public enquiry is to be conducted.

V. The public enquiry into the several claims aforesaid shall be conducted by the said Commissioners so far as regards adjournments, the examination of claimants and witnesses, the reception of documents and the rules of evidence, in like manner (so far as the same may in the opinion of the Commissioners be possible) as an ordinary Civil suit under the Code of Civil Procedure. The persons appearing in support of any claim shall be deemed for the purpose of the enquiry to be the plaintiffs in the cause, and the Secretary of State for India in Council shall be deemed to be the defendant, and may oppose the claimants in like manner as a defendant in a Civil suit may ordinarily oppose the plaintiff therein.

Attendance of witnesses.

VI. It shall be lawful for the Commissioners aforesaid, by a summons under the hand of any one of them, to require the attendance before them at a time and place to be mentioned in such summons, of any person or persons whomsoever, residing or being within British India, whose evidence, shall in the judgment of the Commissioners

aforesaid be material to any of the matters of the enquiry aforesaid; and to require the person or persons so summoned to bring and produce before them all such books, papers, deeds, and writings as to them the said Commissioners shall appear necessary for arriving at the truth of the matters directed to be enquired into by the said Commissioners; all which persons shall accordingly attend before the said Commissioners, and shall produce such books, papers, deeds, and writings as shall be required of them and shall be in their custody and control or in the custody and control of any one of them, according to the tenor of the summons.

Examination of witnesses on oath or affirmation.

VII. It shall be lawful for the Commissioners aforesaid, or one of them, to administer an oath or an affirmation in such form as to the said Commissioners shall seem fit, to all persons who shall be examined before them touching the matters to be enquired into: Provided that nothing herein contained shall render it necessary for the said Commissioners to take evidence upon oath or affirmation unless they shall think it fit or expedient so to do.

Proviso.

Witnesses neglecting to attend, &c.

VIII. If any person upon whom any such summons shall be served, by the delivery thereof to him or by the leaving thereof at his usual place of abode, shall without reasonable cause (to be allowed by the Commissioners aforesaid), fail to appear before them at the time and place mentioned in the summons, or shall refuse to be sworn or to make affirmation (as the case may be), or shall not make answer to such questions as shall be put to him touching the matters directed, or which may hereafter be directed to be enquired into by the Commissioners aforesaid, or shall refuse or fail without reasonable cause (to be allowed by the Commissioners aforesaid) to produce and show to the said Commissioners any such paper, book, deed, or writing being in his possession or under his control as to the Commissioners aforesaid shall appear necessary for arriving at the truth of the matters to be enquired into by them, the Commissioners aforesaid shall have the same powers in all respects touching any such person so failing to appear, or refusing to be sworn or to make affirmation, or not answering such questions as shall be put to him, or refusing to produce and show any such book, paper, deed, or writing as aforesaid, as the Principal Court of Original Civil Jurisdiction within the limits of which the said person shall be residing may by law exercise against any person for making default of appearance, or for refusing to be sworn or to give evidence on any issue joined in any action depending in such Court.

Expenses of witnesses.

IX. Whenever a summons is issued for the attendance of a witness under this Act, the Commissioners may if they think fit order such witness to receive from the Collector or Commissioner of the District or Division, such travelling and other expenses as he would have been entitled to receive had he been summoned to appear and give evidence in the Principal Court of Original Civil Jurisdiction in the District or Division.

Punishment for false evidence.

X. Every person who, upon examination upon oath or affirmation before the Commissioners aforesaid or any of them, shall wilfully give false evidence, shall be liable to the punishment provided in Section 193 of the Indian Penal Code for the offence of giving false evidence.

THE following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 16th December 1863, and was referred to a Select Committee, with instructions to make their report thereon in three weeks:—

No. 23 OF 1863.

A Bill for regulating the importation and manufacture of alimentary Salt in the Territories administered by the Chief Commissioner of the Central Provinces.

Preamble.

WHEREAS it is expedient to provide for the levy of a Customs duty upon Salt in the Territories administered by the Chief Commissioner of the Central Provinces, and to extend to the said Territories certain provisions of Act XIV of 1843 *(for regulating the levy of Customs duties and the manufacture of Salt in the North-Western Provinces of the Presidency of Bengal)*, and of Act XXXVI of 1855 *(to empower Officers of Customs and Land Revenue to search houses and other enclosed places for contraband Salt in the North-Western Provinces)*, and of Act XIX of 1862 *(to extend to the Provinces of Oude certain provisions of Acts XIV of* 1843 *and XXXVI of* 1855 *relating to the manufacture of contraband Salt, and to amend the last named Act)*; It is enacted as follows:—

Section XIV of Act XIV of 1843 partially repealed.

I. So much of Section XIV, Act XIV of 1843 as declares that nothing in the said Act contained shall apply or be deemed to apply to the Saugor and Nerbudda Territories, is hereby repealed.

Customs duty on Salt imported into the Central Provinces.

II. It shall be lawful for the Governor-General in Council to order the levy of a Customs duty not exceeding three Rupees per maund on Salt imported into the Territories administered by the Chief Commissioner of the Central Provinces.

Certain provisions of Act XIV of 1843, of Act XXXVI of 1855, and of Act XIX of 1862, extended to the Central Provinces.

III. So much of Sections III, IV, V, VI, VII, VIII, IX, X, XI, XII and XIII of Act XIV of 1843 as relates to the manufacture and importation of alimentary Salt, and to the prevention and punishment of the illicit manufacture and importation of such Salt, and Sections I, II, III, V, VI, VII, VIII and IX of Act XXXVI of 1855 *(to empower Officers of Customs and Land Revenue to search houses and other enclosed places for contraband Salt in the North-Western Provinces)*, and Section II of Act XIX of 1862 *(to extend to the Province of Oude certain provisions of Acts XIV of* 1843 *and XXXVI of* 1855 *relating to the manufacture of contraband Salt, and to amend the last named Act)* are hereby extended to the Territories administered by the Chief Commissioner of the Central Provinces.

Indemnity to Collectors of Customs and others.

IV. Every Collector of Customs and other Officer in the Territories administered by the Chief Commissioner of the Central Provinces, however such Officer is designated, is hereby indemnified for any thing done before the passing of this Act, which might lawfully have been done if this Act had been in force, and no action or other proceeding shall be maintained against any such Collector or other Officer in respect of any thing so done.

STATEMENT OF OBJECTS AND REASONS.

A communication lately received from the Chief Commissioner of the Central Provinces brought to the notice of the Government of India the very unsatisfactory state of the law in those Provinces in respect to that branch of the public Revenue which was derived from the duty upon Salt. In the Province of Nagpore an order of the local Government, passed in the month of May 1861, to which the Indian Councils' Act of the same year has given the force of law, imposed a duty of one Rupee eight annas per maund on Salt imported into the Province; but no orders were issued as to the manner in which the duty was to be levied, or as to the measures by which infringements of the order imposing the duty were to be prevented and punished. Practically the system in force in the North-Western Provinces under the provisions of Act XIV of 1843, for regulating in those Provinces the levy of Customs duties and the manufacture of Salt, is stated to have been, more or less, acted upon in the Central Provinces; but it is suggested that this has been done without any legal warrant. Furthermore, it appears that as regards some parts of the Central Provinces orders have been issued at different times by the Government of the North-Western Provinces which would seem to be scarcely consistent with so much of Act XIV of 1843 as exempts the Saugor and Nerbudda Territories from the operation of that Act. The present Bill is intended to remove the existing doubts as to the state of the law, and to place the

Customs duty on Salt in the Central Provinces, and all matters connected with the levy of the same, on the same footing as in the Territories under the North-West Government. This is proposed to be done by extending to the Central Provinces the law of the North-Western Provinces so far as the same is considered suitable thereto.

A Section has been added to the Bill indemnifying the Collectors of Customs and other Officers for acts done before the passing of the Bill which might lawfully have been done had the Bill been in force at the time, and declaring that no action or proceeding shall be maintained against any such Collector or other Officer in respect of any thing so done.

THE following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 16th December 1863, and was referred to a Select Committee with instructions to make their report thereon in three weeks :—

No. 24 OF 1863.

A Bill to bring the Jagheers of Poorwah and Khuddee, in the District of Banda, under the operation of the General Regulations.

Preamble.

WHEREAS the Jagheers of Poorwah and Khuddee in the District of Banda are not subject to the General Regulations, and it is expedient that the said Jagheers should be administered on the same system as prevails in the rest of the District; It is enacted as follows :—

Laws and Regulations for internal administration of Banda to have full force in Poorwah and Khuddee.

I. The Laws and Regulations established for the internal administration of the District of Banda shall have full force and effect in the Jagheers of Poorwah and Khuddee, and the administration of Civil and Criminal Justice, and the superintendence of the settlement and realization of the public revenue, and of all matters relating to rent in the said Jagheers, are hereby vested in the Officers who are, or may hereafter be, appointed by the Lieutenant-Governor of the North-Western Provinces for the said District of Banda.

Saving as to suits pending at the time of passing of this Act.

II. All suits and proceedings, whether in appeal or otherwise, arising in the said Jagheers, and which, at the time of this Act coming into operation, shall be pending in any Court or before any Officer, shall be heard and determined in the same manner as if this Act had not been passed.

Suits remanded by any Appellate Court.

III. Any suit which, before the coming into operation of this Act, shall have been determined and which shall have been or shall be remanded by any Appellate Court, shall be tried before the Court which for the time being would be competent to try such a suit if instituted after the passing of this Act.

Execution of decrees.

IV. All applications for execution of decrees or orders which, but for the passing of this Act, would have been made to any Court or Officer existing at the time of the passing of this Act, shall be made to the Court or Officer who would have had jurisdiction in respect of the matter in dispute, had the suit or proceeding been instituted after the coming into operation of this Act.

Appeals from decrees or orders passed before passing of Act.

V. All appeals from decrees or orders passed before the coming into operation of this Act shall be received, heard and determined by the Court or Officer who would have had jurisdiction over such appeals, had the decrees or orders to which they relate been passed after the coming into operation of this Act.

Commencement of Act.

VI. This Act shall take effect from such date as the Lieutenant-Governor of the North-Western Provinces shall fix by an order to be published in the Official Gazette.

STATEMENT OF OBJECTS AND REASONS.

This Bill is introduced at the request of the Government of the North-Western Provinces.

The two Jagheers to which the Bill relates, were declared by Regulation XXII of 1812 to have always been, and to be still exempted from the operation of the General Regulations. The Jagheer of Poorwah was resumed in the year 1856, and the Jagheer of Khuddee in the year 1853. From the time of their resumption the two Jagheers have been administered by the Officers of the British Government according to what is known as the non-Regulation system; but being included in a District (Banda) which is subject to the General Regulations, it is considered desirable that they also should be brought under the operation of these Regulations in order that the entire District may be administered on one uniform system. This is the object of the present Bill.

Statement of Objects and Reasons.

The only existing legal provision for the Municipal management of Towns and Villages throughout the Districts under the Government of Bengal, except the Town of Calcutta and its Suburbs, is contained in Act XXVI of 1850. That law was enacted to provide for the making, repairing, cleaning, lighting, or watching any public streets, roads, &c., and for the prevention of local nuisances, but it was to come into operation only at the instance, and upon the spontaneous expression of a general desire on the part of the inhabitants of the Towns to be subjected to its provisions. The Act contained no fixed principle of taxation, but left power to the Municipal Commissioners, subject to the control of the local Government, to determine in each place in which it might be introduced the form which the taxation should take. Similarly, it left the determination and definition of what might be deemed nuisances within the meaning and intention of the law, as well as the measures to be resorted to for their prevention or removal, to the discretion of the Commissioners.

So limited has been the operation of the law during the years that have passed from its first enactment up to the present time, that it may fairly be deemed to have failed to provide effectually for the objects with which it was framed, and this failure may be attributed to the peculiar features of it above enumerated.

It is proposed, therefore, by the present Bill, to enable the local Government to provide effectually for the Municipal management of Towns, Villages, &c., in the interior of the Provinces subject to the jurisdiction of the Lieutenant-Governor of Bengal, where such provision appears to be called for, and to be in accordance with the wishes of the owners of property and the more intelligent classes generally of the Towns, Villages, &c., to which it is to be applied.

The want of such a legal provision to strengthen the hands of the District Executive Officers has long been felt, and has more especially attracted notice during the last two or three years, in which a fatally destructive epidemic fever, generated by the malaria arising from an entire absence of conservancy measures, has raged unchecked within the large and densely populated Towns and Villages, bordering on either bank of the River Hooghly, in the Districts of Nuddea, Hooghly, and the 24-Pergunnahs. For the prevention and removal of the chief causes of this malaria several Sections of the Bill are calculated to provide effectually.

Under orders of the Government of Bengal, conveyed through the Chief Customs Authority, the following Rules observed on the Custom House Wharf are published for general information:—

Importers and others landing goods at the Custom House are to appoint Watchmen to take care of them, such Watchmen are to have in their possession the badge or written authority of the persons appointing them, and which is to be produced when required by an Officer of Customs.

Wharf Assistants are strictly cautioned from receiving packages containing matches, acids, crackers, gunpowder, guncaps, saltpetre, or other inflammable articles within their Sheds, and to bring to the notice of the Controller immediately they find from their boat notes or information otherwise received that such articles are about to be landed. Any person bringing such goods into the Sheds and Godowns of the Custom House will be liable to a fine of 500 Rupees, and to make good all damages arising therefrom.

No packages are allowed to be opened on the Wharf without the Collector's orders, or if for appraisement, under direction of one of the Appraisers.

No full casks or cases of wine, beer, or any other liquor is to be passed out until the empty ones covered by the same Perwannah are removed first. This rule is applicable in cases where parties are allowed to fill up beer, sprits, tar, &c., on the Wharf before passing.

As the Out-Sheds are only intended for the accommodation of goods landed before the opening and after the closing of the gates, unless under special permission of the Collector, and with certain exception, no goods are allowed to be placed therein between the hours of 10 A. M. and 5 P. M.

The following goods only are allowed to be landed outside at all hours:—Timbers and planks of all description, heavy anchors and chains, tar, rosin, pitch, and all heavy packages which require the use of the Crane.

All expenses incurred for advertising and removing packages are to be paid by the Owners or Consignees thereof at the time of passing.

An extra Officer and a Peon to be appointed to all private bond Godowns at the expense of the bonders. The former to receive and the latter to accompany the goods passing into private bond. An Officer is also appointed, at the expense of the bonders, to pass out goods from private bond on which duty has been paid.

A Peon (if one be available) will be appointed by the Officer at the Bonded Warehouse to accompany goods into public bond, otherwise a fee of 4 annas must be paid for an extra Peon.

The rate to be charged by the extra Officer has been fixed from 10 A. M. to 1 P. M. at 1 Rupee and 8 annas; and any further time beyond the above, up to 5 P. M., 3 Rupees. From 5 to 6 P. M. an extra charge of 12 annas will be made, and 1 Rupee from 5 to 6-30 P. M., after which time Officers are not expected to work. Fee for Peons, 4 annas each per day.

A conveyance fee of 1 Rupee to be paid to the extra Officer when required to attend at a Godown the distance of which from the Custom House exceeds ½ a mile.

Instances having occurred in which goods could not be received and duly secured in the Bonded Warehouse on account of passing out late from the Wharf, Assistants will not allow any goods intended for private bond to be carted after 4 P. M., and for public bond after 4-30 P. M.

No work will be allowed on Sundays and Christian holidays.

Work, before and after hours, and on general holidays, will be allowed only on payment of fees, and under sanction of the Collector.

The rate for working on those holidays, and before and after hours, *i. e.*, from 7 to 10 A. M. and from 5 P. M. to sunset, is fixed at 5 Rupees for each requisition for the Assistants, and 8 annas to the Peons; if after sunset, extra fees of 5 Rupees and 8 annas, respectively, will be charged.

All applications for working on holidays should be sent in to the Collector the day previous, and in time to allow the necessary arrangements to be made.

Goods lying under cover within the Custom House to be allowed four days rent-free, two days single rent, and for any number of days in excess of that period double rent up to fourteen days (exclusive of the rent-free and single rent terms), after that to treble rent for ten days more, and quadruple rent for any period in excess of that term. These rates to be calculated by the single rates fixed in Government Order No. 2796, dated 15th November 1859, published in the *Calcutta Gazette* on the 4th January 1860.

All empty Cargo Boats lying for more than twenty-four hours on the River bank within the limits of the Custom House, *i. e.*, from Coilah Ghaut to Clive Street Ghaut, will be charged a rent of 5 Rupees per day.

FOREIGNERS' BILL.

The Hon'ble MR. MAINE, in introducing the Bill to give the Government certain powers with respect to Foreigners, and moving that it be referred to a Select Committee, with instructions to report in three weeks, said that the Bill was one of those which had already been published by the order of the late Governor-General. The Foreigners' Act was originally passed in the year of the Mutinies, but it was a temporary measure terminable in December 1859: it had, however, been since continued from time to time, and expired only on the 5th of this present month of December. The last of the Acts continuing the Foreigners' Act in operation was in truth passed in order to give the Government of India time to consult the local Governments as to the necessity of renewing the Act. The replies of the local Governments had lately been received. These replies had not been circulated to the Members, chiefly because they were all brief, and all much to the same effect. They all said that, although they very rarely had occasion to put in force the powers vested in them by the Foreigners' Acts, still they considered that they ought not to be wholly deprived of those powers in case any necessity for making use of them should arise. Thus the Government of Bombay said—"It will be observed that "the Act appears to have been brought very little "into play in the Bombay Presidency, but when "a necessity has arisen for enforcing it, it "appears to have worked satisfactorily. His "Excellency the Governor in Council would, there-"fore, recommend the continuance of Act XXXIII "of 1857 as a permanent enactment." So the Government of Madras reported—"The Inspector-"General of Police reports that Act XXXIII of "1857, continued by Act I of 1862, is now practi-"cally a dead letter. The Magistrates do not "enforce its provisions, and the Police have been "instructed not to molest persons travelling with-"out a license. The Inspector-General considers "that the provisions of the Act, although inopera-"tive in times of peace, are calculated to be useful "during periods of popular excitement, and that "the Act should be perpetuated with the modi-"fication that it should be put in force at any "time and in any part of the Presidency by an "order of the local Government." With reference to the proposal to perpetuate Act XXXIII of 1857, he thought it an evil to keep in the Statute Book any Act which was inoperative, especially an Act which was a severe one in its provisions. He therefore did not propose simply to perpetuate the old Act. When the opinions of the local Governments were examined it would be seen that it was in fact only a very few of the provisions of the old Act which it was considered to be necessary to keep in force. Those provisions might be divided into three classes—*Firstly*, those enabling

the local Government to order any Foreigner to leave the country; *Secondly*, those establishing a system of granting licenses to Foreigners to reside in the country; and *Thirdly*, those giving the power of searching and examining for the purpose of identification and the like. It was only of the provi-ions of the fi-st kind that the local Governments were unwilling to be deprived. He therefore proposed that the first four Sections only of the Bill which he now introduced should be in force every where throughout India: the rest of the Bill would only be in force when it was specially required and had been specially extended. The first four Sections only gave the Government powers which, according to the better opinion, belonged to the English Crown under the common law. The other portions of the Bill resembled more in their character the special terminable Acts which had been occasionally passed in Great Britain in times of public peril.

The Motion was put and agreed to.

ALIMENTARY SALT BILL (CENTRAL PROVINCES).

The Hon'ble MR. HARINGTON introduced the Bill for regulating the importation and manufacture of alimentary Salt in the Territories administered by the Chief Commissioner of the Central Provinces, and moved that it be referred to a Select Committee, with instructions to report in three weeks. He said that, on his applying for leave to introduce this Bill, certain observations had fallen from His Excellency the President as to the effect which Section II of the Bill might have upon the Presidency of Madras in respect to Salt, which, having already paid duty at Madras, was subsequently sent for sale to the Central Provinces. He had since taken the subject into consideration and it had occurred to him that in order to meet any objections such as had been mentioned by His Excellency, words might be introduced into the Section, either excluding from its operation Salt which had paid duty prior to its being brought into the Central Provinces, or confining the operation of the Section to Salt imported from Foreign Territories. If the Council allowed the Bill to be referred to a Select Committee, he would propose to the Committee an amendment to the effect which he had mentioned.

The Hon'ble SIR CHARLES TREVELYAN said that it seemed to him at the last Meeting to have been agreed that it would be sufficient to establish a maximum rate of duty, and that, within that maximum, the scale might be so adjusted as to meet every possible state of circumstances. Thus, when Salt had previously paid highly, a low rate of duty, or no duty at all, might be levied; on Salt from Cambay or elsewhere, where only a low Excise duty was levied, a somewhat higher rate might be imposed; and on any Salt which had previously paid no duty a still higher rate might be levied.

The Hon'ble MR. HARINGTON remarked that the adoption of Sir Charles Trevelyan's proposition would render it necessary to alter the wording of the Section. The nature of the alterations to be introduced had better, he thought, be left for the consideration of the Select Committee in the first instance.

His Excellency the PRESIDENT thought that it might be left to the Select Committee to do what was requisite.

The Hon'ble SIR CHARLES TREVELYAN said, he had inferred from what Mr. Harington had said that it was his intention to introduce a provision that no second duty should ever in any case be levied. He thought it very undesirable to lay down any such principle.

The Motion was put and agreed to.

POORWAH AND KHUDDEE BILL.

The Hon'ble MR. HARINGTON applied to His Excellency the President to suspend the Rules for the Conduct of Business, to enable him to introduce the Bill to bring the Jagheers of Poorwah and Khuddee, in the District of Banda, under the operation of the General Regulations.

His Excellency the PRESIDENT declared the Rules to be suspended.

The Hon'ble MR. HARINGTON introducted the Bill, and moved that it be referred to a Select Committee, with instructions to report in three weeks.

The Motion was put and agreed to:

OUDH CLAIMS COMMISSIONERS' BILL.

The Hon'ble MR MAINE presented the Report of the Select Committee on the Bill to provide for the appointment of Commissioners to enquire into certain claims against the late Native Government of Oudh. He read the Report, which was in the following terms:—" We, the undersigned, the Members of the Select Committee of the Council of the Governor-General of India for the purpose of making Laws and Regulations, to whom the Bill to provide for the appointment of Commissioners to enquire into certain claims against the late Native Government of Oudh was referred, have the honor to report that we have considered the Bill and recommend certain amendments. We would add the words 'either in person or by Agent duly constituted,' after the word 'respectively' in line 13 of Section IV. In Section V we would add the words 'claimants and' before the word 'witnesses' in line 6; the words the 'reception of documents' after the word, witnesses' in the same line, and the words 'under the Code of Civil Procedure' after the word 'suit' in line 9. In Section VI we think that the Proviso beginning at line 25 should be omitted. And in Section VIII we recommend the omission of the following words beginning at line 5, *viz.*— 'being a person living within fifty miles of the place at which he shall be required to attend."

The Hon'ble MR. MAINE also moved that the Report be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. MAINE also moved that the Bill be passed with the amendments recommended by the Select Committee.

The Motion was put and agreed to.

The Hon'ble MR. MAINE also presented the Report of the Select Committee on the Bill to give effect to the publication of certain orders and other matters in the *Gazette of India*, stating that the Select Committee had no amendments to suggest.

The Hon'ble MR. MAINE moved that the Report be taken into consideration.

The Motion was put and agreed to.

The Hon'ble Mr. Maine moved that the Bill be passed.

The Motion was put and agreed to.

The Hon'ble Mr. Maine also presented the Report of the Select Committee on the Bill to continue in force Act XX of 1862 (to provide for the levy of Fees and Stamp Duties in the High Court of Judicature at Fort William in Bengal, and to suspend the operation of certain Sections of Act VIII of 1859 in the said High Court)—adding, that the Select Committee did not recommend any alterations in the Bill.

The Hon'ble Mr. Maine moved that the Report be taken into consideration.

The Motion was put and agreed to.

Godavery Transport Service.

From H. Stanbrough, Esq., to Secretary to Government of India, Home Department,—(dated the 24th October 1862.)

I had the honor to submit, for His Excellency the Viceroy's information, on the 4th instant, a Memorandum on the conveyance of Nagpoor cotton by the Godavery River to Cocanada in July, August, and September 1862.

In that Memorandum I pointed out that the result of the experiment of this year, as compared with a similar experiment made by myself formerly, was not favorable as regards total cost of transit and the frequent breaking of bulk; but I also stated that the experiment of this year could not be taken as a fair criterion of what could eventually be done. The experiment was so far successfull that a large quantity of cotton *was* brought down the Godavery in good order, and at a rate of carriage which would allow a fair margin of profit at the usual market rates. What remains to be done is to improve the means of transit so as to secure the utmost economy in time and money.

I have in my Memorandum pointed out in what manner the arrangements made by the Government Transit Officer failed, and it is not necessary that I should recur to this portion of the subject beyond expressing my belief that the labor of organizing and conducting the Transit Department of the Godavery should not be imposed upon Officers who are already overworked, but that encouragement should be held out by the Government to private individuals, and whose interests should be associated with the success of the transit.

I believe that I am better acquainted with the details connected with the carriage of produce from Nagpoor to the Coast than any other individual, and if entrusted by Government with the entire management of the traffic from the 1st January 1863 to 30th April 1864, the termination of the official year, I can undertake thoroughly to organize the transit so as to demonstrate by the end of next year the possibility of a rapid and safe conveyance of almost any amount of produce from Nagpoor to the Eastern Coast.

I should propose for the present to adhere to the existing scale of freight and fares, and to pay to Government three-fourths of all receipts, retaining one-fourth as a remuneration for myself. The actual Establishment of the Transit Department would of course be maintained by Government, with such changes and alterations proposed by me as should meet with the approval of His Excellency the Governor in Council.

In order to give this project a fair chance of producing immediate conviction upon the public mind of the practicability of the Godavery route from the Cotton Districts to the Coast, I feel it absolutely necessary that my recent experiment should be repeated next season on a more extensive scale and with the benefit of my improved measures in the Transit Department. For this purpose I should require a capital of at least a lakh of Rupees, to be devoted entirely to the thorough establishment of the transit.

The Government, for the operations of the past year, with ready liberality, advanced to me Rupees 20,000. This amount I will return into the Nagpoor Treasury immediately on my reaching Nagpoor, according to agreement, before the time fixed for payment, (30th April 1863.)

I would now respectfully solicit the exercise of further assistance with the view of carrying into practical effect the object for which the former advance was made.

I am prepared to pay into the Nagpoor Treasury a sum of Rs. 50,000 against an advance from the Government of a similar sum on the same conditions as those upon which the former advance was granted to me, with the understanding that the whole of the amount is to be devoted *bonâ fide* to the promotion of traffic on the Godavery River.

To secure the success of the undertaking I have fixed 1st January next as the latest date for the commencement of my operations, and I most respectfully request an early reply to this communication at Nagpoor.

Endorsed by Public Works Department,—(No. 5027, dated 25th December 1862.)

To Chief Commissioner, Central Provinces, with reference to letter from Commissioner of Nagpoor, No. 156, dated 31st October 1861.

From LIEUTENANT-COLONEL H. MAXWELL, Secretary to Chief Commissioner, Central Provinces, in the Public Works Department, to Secretary to Government of India, Public Works Department,—(No. 125, dated 31st January 1863.)

I AM directed to acknowledge your docket No. 5027 of the 25th December, enclosing a letter addressed to the Supreme Government by Mr. Stanbrough, together with certain other papers in original. From these it appears that Mr. Temple's opinion is required on two points, namely, the expediency or otherwise of entrusting the Transit Agency on the Godavery to Mr. Stanbrough, and the same question as regards making an advance of Rupees 50,000 to that gentleman for the purpose of conveying merchandise down the river during the next rainy season. I am now to state the Officiating Chief Commissioner's opinion on each point as follows, and I am to enclose copy of a letter from Mr. Stanbrough relating to both subjects, being answers to certain specific questions put to him by the Officiating Chief Commissioner.

2. Firstly, then, as regards the entrusting of the Transit Agency to Mr. Stanbrough, the Officiating Chief Commissioner regrets that he cannot recommend such a measure. I am to explain that there are now seven River Steamers at the disposal of the Public Works Department on the Godavery, plying between the several Barriers. Their names are marginally noted. They are, as the Officiating Chief Commissioner believes, essential to the carrying on of the navigation or irrigation works. Indeed, they form a primary and indispensable requisite. By them are the Officers and employés carried from one part of the river to another; by them are the tools, stores, and materials conveyed or towed; by them is communication between the engineering head quarters and the various outlying works maintained. In the present state of the river and its banks the above vitally necessary service could be performed by them alone. Nor are these vessels more than sufficient for the performance of this service. During this last season the majority of them were chiefly occupied in carrying either public works stores or other Government property. After many delays they carried Mr. Stanbrough's cotton, some 930 bales; besides this, they carried little, if any, private merchandise During the present and the ensuing seasons the works will proceed probably on a larger scale than heretofore, and the Steamers will be still more occupied. When it is said as above that the Steamer conveys anything, it is meant that she either takes it on board, or else tugs the boat on which it is laden. The fact is, then, that the existing establishment of Steamers is needed for Government work almost exclusively. If the establishment is to do (as it is done on some rivers) partly Government work, and partly private work, then it would have to be strengthened, as at present it suffices for the former only.

3. Besides the Steamers there are maintained at each Barrier certain Land Establishments for the same purposes. These have heretofore consisted of mere laborers under moderate European supervision. As the tramways are completed, the establishment will in future consist of trucks or wagons. These latter have not yet been constructed in any considerable number, and those that actually are, or are likely to be, completed, would be required for Government work.

4. Now Mr. Stanbrough's proposition amounts to this—that Government should lend him the Steamers, those vessels being maintained in respect of fuel, establishment, and the like not by him, but by Government itself; that the Barrier Establishment should be maintained by him; that the existing freight* and fares should be charged on Government property as well as other; that Mr. Stanbrough should re-pay to Government three-fourths of the proceeds, retaining one-fourth to remunerate himself and to cover the cost of the Barrier Establishment. Now, this arrangement would introduce a somewhat complicated state of relations. Government would pay freight on its own things conveyed by Steamers maintained by itself, and would then receive back three-fourths of the freight, in reality paying with one hand and receiving with another; the remainder (one-fourth) being given up virtually as contract money on consideration of the transit service on the Barriers being performed by the contractor. Whether this arrangement would be financially profitable to Government would depend on calculations which, perhaps, the Government Traffic Agent on the Godavery would be able to make. The precise question would apparently be, whether the one-fourth of the proceeds which Government would remit to Mr. Stanbrough would be more or less than equivalent to the saving to the State of certain Traffic Agents and certain Cooly Establishments on the Barrier.

* One anna per ton per mile.

5. There would no doubt be some saving of Establishment if the Transit Agency were made over to private hands. There are no data in this Office which would enable the Officiating Chief Commissioner to state precisely the amount of the present Establishments. But he is aware that there is a Traffic Manager (Major Stevens) at Doomagoodium, with a moderate Office; an Agent at Cocanada, Mr. Denison (who acts also, however, as a Labor Agent), and a subordinate European Official at the second Barrier. There was also an Agent at Chanda, but he has died and has not been re-placed. There are also Establishments of Coolies on the Barriers as yet irregularly maintained The General Transit Establishment cannot be considerable in respect to cost at the present time, though they will be more developed year by year. The Officiating Chief Commissioner does not believe that the possible saving would be such as to justify the adoption of a scheme which would certainly

involve some inconvenience, and of which the financial and general result would be doubtful.

6. But independently of financial considerations the Officiating Chief Commissioner believes that any such arrangement as that proposed would prove inconvenient and unsatisfactory to the Public Works Department, while, on the one hand, there might be no doubt that an individual of enterprise and experience like Mr. Stanbrough would manage a general commercial transit better than Government Officers, yet, on the other hand, it does not follow that he would do the special Government work better than the Government Officers. On the contrary, it is probable that the Government Officers would do their own departmental work, with their own vessels, better than any one else could it do for them.

7. The subject has been regarded by the Officiating Chief Commissioner from a Government point of view, for the greatest part of the freight would really consist of Government property. The proportion of private property will be insignificant; the present transit is really of a special and Governmental and not of a general or commercial character. Until the river shall be opened to navigation there will be but little chance for trade and but little scope or private enterprise. Nor will it, in the Officiating Chief Commissioner's opinion, be conveniently practicable for Government to establish any general Transit Agency until the first and second Barriers shall be opened. The present Steamers will have quite enough to do to convey the Government property. But while these vessels are devoted to their proper duty of performing the Government work the Government Officers should have the control of them and be responsible for the efficiency of their own transit service. On the other hand, the Officiating Chief Commissioner does not recommend their undertaking any commercial transit work which they would not perform satisfactorily, and which would only distract them from their regular duties.

8. A reference will be made to Captain Haig with a view to collate the statistics of the past season as bearing on the subject of this proposal of Mr. Stanbrough's. But the Officiating Chief Commissioner's own opinion is against the making over of the Steamers and the transit service to Mr. Stanbrough for the reasons given above. Should the reference to Captain Haig elicit any information of interest on the point it will be duly submitted hereafter. But under all the circumstances, the Officiating Chief Commissioner has thought it best to submit his own opinion without delay.

9. If, however, Mr. Stanbrough or any one else could, with private resources, place his own Steamers on the river, or establish any transit with boats partly, and with land conveyance partly, the Officiating Chief Commissioner would wish every success to such an enterprise, and would be glad to afford it every legitimate aid in his power.

10. I am now to advert to Mr. Stanbrough's second proposal, namely, an advance of Rupees 50,000 from Government for a further experiment in the conveyance of merchandise by the Godavery route during the ensuing season. A reference to the correspondence marginally noted will shew that an advance of Rupees 20,000 was made to Mr. Stanbrough last year for an experiment in the conveyance of cotton down the river. The accounts of the transaction have not been rendered as yet, but the Officiating Chief Commissioner knows that a quantity of cotton was conveyed down the river; the exact quantity cannot be given till the accounts come in; but the Officiating Chief Commissioner believes that it amounted to 700 or 800 bales. Upon that transaction Mr. Stanbrough will have to repay to the Government Treasury Rupees 20,000, which will fall due by the 30th April next. The Treasury holds as a security Government Promissory Notes to the amount of Rupees 20,000. The cotton was conveyed by the Government transit down the river at the rate of one anna per ton per mile in the manner described by Mr. Stanbrough's printed Memorandum, already submitted by him to Government. The transit was not altogether satisfactory, and the Officiating Chief Commissioner believes that there *was* considerable delay and disappointment; the greater part of the cotton was, however, brought down to Cocanada in good order. The Officiating Chief Commissioner was aware of these facts during his own visit to the Godavery at the time. The result was satisfactory on the whole, although, considering that neither were the Barriers navigable, nor were the tramways ready, also that the goods were conveyed by Government and not by private Establishments, the Officiating Chief Commissioner does not consider that such experiments prove anything in particular, no very practical conclusion could be drawn from it. Whether the rate of one anna per ton per mile was really remunerative to Government as a rate of freight can hardly be known with certainty. When the Officiating Chief Commissioner visited the river the Traffic Agents appeared to consider that the rate was a remunerative one. *If*, indeed, such experiments could prove that cotton or other produce could be conveyed down the Godavery at an anna per ton per mile, *that* would no doubt be an important practical conclusion. If produce can really be carried down at this rate now when the carriage is partly by land and partly by water, how much cheaper will the rate be when the carriage shall be wholly by water?

11. Although, then, these experiments cannot be conclusive, the Officiating Chief Commissioner considers that there is sufficient interest and importance attaching to them to warrant a repetition of the operation which Mr. Stanbrough conducted last year, and which he now wishes to conduct during this next season. Before, however, another transaction is entered into, the Officiating Chief Commissioner considers it a *sine qua non* that the former one should have been closed by the re-payment of the advance previously made. When Mr. Stanbrough shall have done this within the stipulated time, and the report shewing fulfilment of conditions shall have been received, the Officiating Chief Commissioner would see no objection to Mr. Stanbrough receiving a fresh advance on the same terms as before, of which the principal conditions would be that he should deposit in the Nagpoor Treasury Government Securities to the amount of the advance; that he should invest the amount of that advance, and an equal amount on his own behalf, in the purchase and conveyance of Nagpoor Province produce to be conveyed down the Godavery; that if after

disposal of the said produce there shall be loss, Government would bear one-half thereof, but that, if there be profit, Government would not claim any share; that if the advance shall have been made before the 1st of June 1863, it shall be repaid into the Nagpoor Treasury by the 30th April 1864; that the account be rendered by that date; and that the supervision of the affair be entrusted to the Chief Commissioner of the Central Provinces. If an advance be made at all, it could not, perhaps, be less than Rupees 20,000; but the amount now asked for, Rupees 50,000, appears rather large. Perhaps Rupees 30,000 would be sufficient The Officiating Chief Commissioner would not restrict Mr. Stanbrough to the purchase of cotton alone; he might purchase any produce of the Nagpoor Province. The Transit Agents and other Authorities on the Godavery would, of course, render every assistance to Mr. Stanbrough that they fairly could, but the Officiating Chief Commissioner does not recommend that the Government Transit Agency *undertake* or render itself responsible for the conveyance of the produce, as that might lead to disappointment or misunderstanding. Mr. Stanbrough, with his experience of the river, should know exactly what is to be expected, and should be able to make his own arrangements for boats.

From H. Stanbrough, Esq., to Officiating Secretary to Officiating Chief Commissioner, Central Provinces,—(dated 2nd January 1863.)

I have the honor of acknowledging the receipt of your letter No. 1708, dated 31st ultimo, with reference to a letter I addressed to the Secretary to the Government of India, dated 24th October 1862, and requiring answers to certain points therein for the information of the Officiating Chief Commissioner.

1. In reply to paragraph 1 of your letter I meant it to be understood that the Establishment of Steamers and Boats were only to be maintained by Government, and that of the Barriers by myself.

2. One-fourth of the rates charged to be kept by me on account of the river transit only, but mileage to be charged to Government for conveyance of their stores, &c., round the Barriers the same as to other parties.

3. I have taken into consideration that the greater part of the traffic up-river will be Government stores, but it is well known that it amounts almost to an impossibility to establish a regular communication up-river, unless I keep up a fleet of my own Boats and Steamers to tow them. Government should therefore abstain from the idea of a private party investing capital in an undertaking which is much too precarious to offer inducement for it, especially when the time sanctioned is only one season; at the same time I respectfully beg to bring to the notice of the Chief Commissioner that by Government being released from keeping up an expensive Traffic Establishment, more especially by doing away with European supervision round the Barriers, I am of opinion that Government will be a considerable gainer both in time and money.

4. If I had the entire management of the transit I would undertake to give Government stores prior conveyance.

I do not apprehend any large amount of private merchandize, which cannot be easily conveyed, independently of the Government stores and my own produce.

5. It depends so very much upon the home markets regarding cotton that I could not bind myself to purchase cotton alone, but all produce bought by me would be from the Central Provinces.

6. I shall be prepared this month to pay into the Nagpoor Treasury Rupees 20,000 due to Government to close the former transaction before entering upon a new one.

From Colonel W. I. Birdwood, R. E., Secretary to Government of Fort St. George, in the Public Works Department, to Secretary to Government of India, Public Works Department, with Governor General,—(No. 710, dated 21st March 1863.)

Dated 19th February 1863, No. 558.

I am directed by the Governor in Council to transmit, for information, copy of a letter from the Deputy Chief Engineer, Northern Circle, giving cover to the report of the District Engineer, Upper Godavery, on the transit operations of the past season.

2. As, under the orders of the Government of India, dated 29th December 1862, No. 5088, the control of the Local Government over the Upper Godavery Works is restricted to matters of a current nature, the Government have informed the Deputy Chief Engineer that the propositions submitted by Captain Haig, which have reference to future arrangements, should come under the consideration of the Commissioner of the Central Provinces.

From Lieutenant-Colonel S. O. E. Ludlow, R. E., Deputy Chief Engineer, Northern Circle, to Secretary to Government of Madras, in the Public Works Department,—(No. 558, dated 19th February 1863.)

One letter from the District Engineer, Upper Godavery, No. 379, dated 23rd January 1863.

I have the honor to forward a Report by Captain Haig upon the transit operations on the Upper Godavery during the past season.

2. Seven Steamers in all were employed, two on each of the three lower, and one on the upper reach.

3. Navigation appears to have begun on the different reaches at the latter end of June and beginning of July, and to have terminated in the middle of October on the upper reach, late in November on the two middle reaches, and to have been still open late in January on the lowest reach. The through navigation only lasted during three and a half months.

4. As regards the supply of water in the river the season appears to have been an average one. The navigable parts of the river (with trifling exceptions in the first reach) were wholly unimproved, and the portages were effected by common carts over the worst passable roads, the tramroads not being ready.

5. Nine hundred and eighty tons of goods were carried up-stream, an average distance of 128 miles, and 307 down-stream, an average distance of 212 miles; 1,281 passengers were conveyed up-stream, 118 miles, and 679 down-stream, 133 miles. Of the 1,280 tons of goods

837 or two-thirds were for the works in progress, and the passengers mostly belonged to the works.

6. The total working expenses incurred (and estimated), including Rupees 23,466 stock, are put down at Rupees 91,872.

7. The receipts were—

From Goods	...	... Rs.	14,325
„ Passengers	...	... „	4,421
„ hire of Steamers and carts supplied to Engineer Department		... „	2,430
Total		... „	21,176

8. But of this sum Rupees 7,181 only, or about ⅓rd, was for goods and passengers not carried on account of Government.

9. There is apparently some mistake in the calculations made in paragraph 14. The working expenses of the transit are put down at Rupees 68,106, from which, deducting receipts by hire of Steamers, &c., Rupees 2,430, the net amount of expenses chargeable to goods and passengers' traffic is Rupees 65,976, but in apportioning this sum to the two separate heads, Rupees 36,735 are debited to goods, and Rupees 10,495 to passengers, or Rupees 47,230 only in all; whereas the proper amounts should, as it appears to me, have been Rupees 51,315 and Rupees 14,661. The difference appears to arise from the District Engineer having deducted from the total working expenses the gross receipts under all heads, instead of only those from hire of Steamers.

10. If this correction be admitted, it will affect the cost of traffic in paragraph 16 of the report, and the cost of carrying goods will have been four annas 2·9 pice per ton per mile, instead of three annas, and that of passengers pies 11·6 per head, instead of eight pies.

11. It is not shewn what the item of Rupees 23,466 put down as stock consists of, and therefore I cannot say whether it is properly excluded, as it is altogether from the cost of operations in calculating the cost of traffic, if percentage should certainly have been charged for depreciation of plant.

12. In paragraph 19 Captain Haig states that "Government have lost nothing by the undertaking," and proceeds to prove it as follows:—Had there been no transit service five, out of the eight, Steamers must still have been employed for the use of the works at a cost of Rupees 47,891. But the working expenses of the transit operations were actually Rupees 65,976, from which, deducting Rupees 7,181 received from private sources, we have Rupees 58,795 as the actual outlay by Government, between which and Rupees 47,891 there is a difference of Rupees 10,904, representing the extra expenditure on account of the transit service, against which, however, is to be set off the value of the experience gained as to the proper mode of working the river, which Captain Haig "considers to be well worth that sum, and many times that sum." It would therefore appear that the statement that "Government have lost nothing by the undertaking" is not to be accepted in its literal sense, for, by Captain Haig's own shewing, there has been an actual loss of Rupees 10,904, but that he considers this loss to be more than made up for by the value of the experience gained.

13. It is necessary, moreover, to observe that the Rupees 47,891 credited to the transit operations must be debited to the works, and if this be not done, Captain Haig's statement as to the cost of the transit operations must be considered as fallacious. As no estimate of the cost of the works has yet been furnished, I am unable to state whether any allowance has been made by him on this account or not.

14. In paragraph 21 Captain Haig dilates further on the value of "experience," and urges it as a reason why Government should maintain the transit service in full efficiency.

15. He next shews that the work actually done by the Steamers was much less than it would have been had they had full employment. They *did* carry 1,592 tons, but they could have carried 9,340, or, making certain allowances, they could have conveyed four times as much as they did, with very little additional expense. Further, he states that, owing to defects of construction in the present Steamers, there is a large unnecessary waste of power, and that, at a cost of Rupees 30,000, they might be improved so as to increase their efficiency by, at least, 25 per cent. or more. The present flotilla might, therefore, if improved and fully employed, convey five times as much traffic as it did during the year under review. But an increase of 2,000 tons down river from third Barrier, and 1,000 up to same point (such being a very moderate increase to expect) would quintuple the traffic, and the actual cost of carriage having been three annas per ton this year (but I have shewn it to be more) there is a good prospect of the line soon, not only paying its expenses, but yielding a return on the outlay. If, as above shewn, the Steamers actually carried only ⅕th the quantity of goods they were capable of doing, it appears to lead to the conclusion that the number of them maintained was larger than the circumstances of the case required.

16. In paragraph 25 Captain Haig states that the improvement of the river bed ameliorated service arrangements, the sub-titution of wood for coal as fuel, and the employment of local labor, would further tend to diminish the cost of carriage.

17. He next proceeds to notice the loss from injury of goods, which, in spite of the incomplete state of the line and most imperfect arrangements, only amounted to 32 bales, or 3½ per cent. of the whole number conveyed. When the line is completed, therefore, it may be reasonably expected that the loss on this account will be still less, and very trifling. It would also seem that the breaking of bulk at the Barriers, considered by some as an insuperable obstacle, will, in reality, prove a trifling disadvantage.

18. In paragraph 27 he favorably notices Major Stevens and his subordinates.

19. In paragraph 28 Captain Haig makes certain recommendations—

1*st*.—That the transit service should be continued and improved, for it entails no loss on Government. It assists the works, fosters the infant river trade, and forms a natural channel for traffic. He advocates no heavy expenditure, but simply the maintenance of the present flotilla, and its gradual increase as circumstances may require, with a view to its ultimate transfer to private agency. That the operations have been, during the past season, carried on without some loss to Government is not apparent, nor do I think they will be so for some time to come. Nevertheless I concur with Captain Haig in thinking that the transit service should be continued, though not, perhaps, to the extent, or in the manner he proposes. It is mainly on account of the utility of the Steamers to the works that I would recommend their maintenance. I would keep up only so many of them as were absolutely necessary for that purpose, and the whole expenses should be debited to the works and allowed for in the estimates.

If the Steamers, besides the conveyance of Government stores, are able to undertake the transit of goods on private account, and it would appear from paragraph 26 that they might do so to a considerable amount, the profits so made would of course be credited to the works.

2*nd*.—It being desirable that shippers should be able to insure their goods, he recommends that Government should assume the Office of Underwriter. About the inexpediency of such an arrangement there can hardly, I think, be two opinions.

3*rd*.—That the transit operations should not be limited to that part of the river below the third Barrier, or that the said Barrier should be excluded from the improvements contemplated to the other two. He says in support of this view that the cost of transporting goods from Chandah to foot of third Barrier, 62 miles, is 55 per cent. of the cost of transport from the foot of third Barrier to Cocanada, 300 miles, and that it costs as much to carry goods from Hingunghat to the third Barrier, 116 miles, as it does to convey them from that Barrier to Cocanada, and that by opening of only ¾ths of the line, leaving ¼th untouched, at least ¼ths of the value of the communication is sacrificed.

20. This is a matter of much importance as regards the success of the scheme, and if, as Captain Haig states, the river above the third Barrier is capable of improvement, at a small cost, as compared with the others, it seems a pity that the productiveness of the whole project should be so seriously diminished for the sake of a comparatively small saving of outlay. But this is a question which would have to be considered elsewhere.

21. For transit operations in the reach above the third Barrier he recommends the use of Steamers drawing not more than one foot of water. Some engines of 12-horse power are now being sent out from England, which, he thinks, might be used for the purpose. One Steamer of such power should be put on each of the lower reaches, and on the upper reaches such boats should certainly be placed. I quite concur with Captain Haig in thinking that Steamers drawing less water are better adapted to this navigation.

From Captain F. T. Haig, District Engineer, Upper Godavery, to Deputy Engineer, Northern Circle,—(No. 379, dated 23rd January 1863.)

I have the honor to submit the following report upon the transit operations for the current year.

2. The Steamers employed this year were as follows :—

	N. H. P.	Draught.		Speed without tow.
		Ft.	In.	
1*st Reach, viz., from Dowlaishwaram to 1st Barrier Doomagoodium.*

3. In 1st Reach	2nd July 1862 ...	Still practicable.
2nd „ ...	2nd „ ...	22nd November 1862.
3rd „ ...	20th June 1862 ...	„ „
4th „ ...	2nd July „ ...	15th October 1862.

4. In the first Reach the Prince ceased to run on the 26th November in consequence of the passage in a rocky part of the river becoming impracticable for a vessel of her size and draught of water. The Hope is still at work. In the second and third Reaches there was fair navigation for vessels drawing two feet for four months, though the Steamers actually run in the former for 4¾, and in the latter for five months. In the fourth Reach navigation was not practicable for such vessels for more than 3½ months, and even that with occasional interruptions.

5. As regards the supply of water in the river, and the available depths for navigation, the season would appear to have been an average one. It commenced for vessels of two feet draught on 2nd July and ended on 22nd November 1862. In the two preceding years the season commenced and ended as indicated by the Doomagoodium Water Register a fortnight earlier.

6. The navigable parts of the river are still in their natural state, wholly unimproved, with the exception of the first Reach, where a few rocks have been removed.

7. The portages at the three Barriers were effected by means of common country carts, and the existing roads, which were in the worst possible condition, especially at the second and third Barriers. Neither of the tramroads was fit for traffic.

8. The work done was as follows :—

982 tons of goods were carried up-stream, an average distance of 128 miles, and

307 tons down-stream, an average distance of 222 miles.

1,291 passengers up-stream 118 miles.

679 „ down-stream 133 miles.

9. The goods consisted of—

	Up-stream.	Down-stream.	Total.
	Tons.	Tons.	Tons.
Hardware, iron bar, rails, tools, &c. ...	378	10	388
Machinery ...	100	...	100

Salt ...	185	...	185
Sugar and provisions ...	99	...	99
Baggage ...	70	26	96
Total ...	982	307	1,289

10. Of the whole 1,289 tons 837 were carried on account of the works in progress in the river. The passengers also were mostly persons connected with the works.

11. The expenditure for the year will be as follows :—

	Rs.
Working expenses during working months	54 958
Estimated expenses during idle months .	13,448
Total of actual and estimated expenses ..	68,406
Stock	23,466
Total expenditure (in part estimated) for the year	91,872

12. The particulars of the foregoing are—

	During working months.	During idle months.	Total.
	Rs.	Rs.	Rs.
Working expenses of Steamers and Boats, including current repairs	39,830	3,686	43,516
Portages at Barriers.	5,309	3,890	10,199
Landing and shipping cargo ...	1,274	425	1,699
Sundries ...	789	327	1,116
Superintendence ...	7,756	4,120	11,876
Total ...	54,958	13,448	68,406

13. The receipts were—

	Rs.
From goods	14 325
„ passengers	4,421
„ hire of Steamers and Bandies supplied to Engr. Dept. ...	2,430
Total ...	21,176
Difference between working expenses and receipts	47,230

14. Deducting the receipts by hires of Steamers, &c., from the working expenses, we have Rupees 65,970 chargeable to the goods and passengers' traffic. The receipts from goods were to those from passengers as 7 to 2. If we debit the expenses in the same proportion we have—

	Rs.
Cost of goods traffic ...	36,735
„ of passenger traffic ...	10,495

15. The goods traffic as above given was equivalent to 193,534 tons carried one mile; the passenger traffic to 242,120 passengers carried one mile.

16. Hence the actual cost of the two classes of traffic was—

Goods... $\frac{\text{Rs. } 36,735}{1,93,534} = 0\ 3\ 0{\cdot}4$ per ton per mile.

Passengers $\frac{\text{Rs. } 10,495}{2,42,120} = 0\ 0\ 8{\cdot}3$ „ head „

17. The charges were for goods up-stream 1 anna 6 pie excepting salt, which was charged only pies 0 9 ; and for all goods down stream 1 anna. Passengers were divided into three classes, charged ½ anna, ½ anna, and 1 anna respectively. The great bulk of those carried were of the lowest class.

18. The up-stream tonnage being double that down the mean charge per ton per mile was, allowing for one and two tons of salt carried at 9 pies, about one anna and 3 pie. Hence the cost was to the charge as 12 to 5, or rather more than double. The proportion for passengers is about the same, though it would be tedious to demonstrate it.

19. Now, the first remark I have to make upon the above statement of the results of the first year's transit operation is that the Government has *lost* nothing by the undertaking, for, first had there been no transit service, we must have retained five out of the eight Steamers for the Government works alone. These would have been absolutely necessary to keep up communication between the different Barriers and the Coast, and, as we had 387 tons of stores to carry for the works, these Steamers, with a certain number of boats, would have done the work. The expense of the Establishment thus required would have been—

	Rs.
For Steamers	31,151
Boats	2,100
Bandies	5,000
Loading and unloading ...	900
Sundries	600
Superintendence	7,840
Total ...	47,891

This is an expense which must have been incurred in any case even had there been no transit service.

20. Now the working expenses of the year amount, as above shewn, to Rupees 65,976. The earnings from goods and passengers not carried on account of Government were—

	Rs.
From Goods	4,781
Passengers	2,400
Total ...	7,181

and if this amount be deducted from the total expense it leaves Rupees 58,795 as the expenditure incurred on the Government account, or rather that for which the only money returns that can be shewn are those derived from the carriage of Government stores. I have shewn that had there been no transit the necessities of the works in progress would have required an expenditure of Rupees 47,891 for the maintenance of a Steam Flotilla and a small land Transit Establishment. The difference between these two amounts, or Rupees 10,904,* is, therefore, all the extra expenditure that the transit service can be charged with entailing upon the Government; and assuredly the experience gained as to the proper mode of working the river, the description of Steamers and Boats best adapted to it, and the peculiarities of the river itself, especially above the third Barrier, was well worth that sum, and many times that sum. This year I was for the first time enabled to ascertain precisely the nature of the navigation above the third Barrier. Had the Mayflower not been there some other arrangement must have been made for me to navigate that part of the river and a special assignment made for the purpose.

21. It is a great mistake to suppose that all that has to be done upon this river is to remove the impediments to navigation caused by rock in different parts of the bed. When this has been done, or while it is being done, we have still to ascertain by experiment by what description of Steamers and Boats the river may best be worked. Every navigable river in the world has its own peculiarities, and the means of transport in use vary accordingly, and these are, in every case, the result of the experiments and observations of years, and differ widely from what they were when first navigation was commenced. Of course this experience has to be paid for, usually it has been paid for by private individuals or private Companies. Often it has been costly enough to ruin them. How many Companies, now navigating other rivers with success, were raised upon the wreck of others whose dear-bought experience they inherit gratis. And if, upon the Godavery, this invaluable experience may be obtained, under the peculiar circumstances of this case, at the trifling expense, when the Government takes the initiative and places a flotilla on the river, this is an additional reason why the transit service should be maintained in full efficiency. The river will certainly be much sooner brought into use by private Companies than if they had to experiment upon it for themselves, and the returns to Government upon the outlay will be the sooner received.

22. In the next place, I would point out how trifling the amount of traffic this year has been, compared even with that which our Steamers, small as they are, are capable of conveying. The following table shews the number of trips made by each Steamer between the termini of the Reach in which it worked, the number of tons carried, the average number per trip, and the number which it is capable of carrying :—

Names of Steamers.	Number of trips.	Number of tons carried.	Average number of tons per trip.	Number of tons which Steamers capable of carrying up-stream.
Prince	31	880	28	150
Shamrock	22	20	2	25
Arthur Cotton	35	443	12½	50
Rose	48	67	1½	25
Queen	24	182	7½	60

The great disproportion between the work done and that which the Steamers could have done had they had full employment is here evident at a glance. It is not so great in every case as the table shews. In one or two cases some of the trips made by the Steamers were made after the river have practically ceased to be navigable by vessels of their draught. But, on an average, we may certainly say that the Steamers could have conveyed four times the tonnage that they did. This would have required some addition to the number of boats, and also the means of land transport at the Barriers; but these would have added but little to the total expense.

23. Again, it is important to note that the most of our Steamers are capable of great improvement. There is scarcely one in which, owing to defects of original construction, there is not a very large and unnecessary waste of the power in actual operation I have no doubt that a moderate expenditure, not exceeding Rupees 30,000, would increase their efficiency at least 25 per cent., and in the case of some of them much more. In other words, the present flotilla might be made to convey not four, but five times the traffic of this year.

24 Now, an addition to this year's traffic of 2,000 tons down-river from the third Barrier and 1,000 up to the same point, would augment the traffic five-fold, and certainly that is a very moderate amount of increase to look for in the course of a year or two upon such a line. And, if this year the actual cost of carriage has been three annas per ton per mile, there is a fair prospect that in a very short time the line would not only pay its expenses but yield some returns upon the outlay.

25. This calculation does not take into account the improvements that would year by year be effected in the navigable channel, and which, by putting an end to interruptions during the working season, and by extending its duration, would certainly tend to reduce the cost of transport.

* I should observe that the actual amount will be only about two-thirds of this. In order to facilitate comparison of this year's working of the transit with future ones I have included in the expenses the pay of the Traffic Manager Rupees 600 per month, for the whole year, as that would, in future years, be the charge supposing a Traffic Manager permanently appointed. In point of fact however, the actual charge this year will be only for six months (= 3600), as Major Stevens, the Acting Traffic Manager, will be employed upon the engineering works during the latter half of the year.

There are other points also in which there is an abundant room for improvement in the mode in which the transit was conducted this year, but which I cannot do more than glance at, such as the expenses incurred in the fitting out of new Steamers as the Prince and Trevelyan, which would not occur again; such Steamers not being ready for work till part of the navigation season was over; the expense of the Steamer above the third Barrier for which next to no return has been received; the partial substitution of wood for coal in the furnaces of the Prince; the employment of the local boatmen in the upper river instead of those hitherto engaged from the coast at excessively high rates of pay; the addition of fully one-seventh to the working time of the Steamers by improved fuelling arrangements

26. The trifling loss from injury to goods in transit this year, notwithstanding the great imperfection of the means of transport at the Barriers, and the want of sufficient cover in some of the boats, warrants the most favorable expectations as to the working of the line in future. A batch of cotton, consisting of 926 bales, was carried partly from Chanda, partly from the third Barrier, to Cocanada. The bales were but half screwed, and most wretchedly packed. An accident occurred to a boat containing 90 of them when lying at anchor at the second Barrier, by which a large number were injured and several destroyed. Another boat-load was sent down from the third to the second Barrier by the Agent of the owner, Mr. Stanbrough, without any cover whatever, and exposed to heavy rains on the way. The carelessness of some newly engaged lascars in not baling out a boat, and the ignorance of the Overseer who loaded it in not putting in sufficient dunnage, led to the injury of some of the lower tier of its cargo. The portage at the Barriers was effected during rainy weather by means of common country carts, imperfectly covered, working on tracks in which the mud was often axle deep. Notwithstanding all this, the total loss, as determined by a Committee of Commercial men at Cocanada, amount to 32 bales, or 3½ per cent. of the whole number. Now, if this was the same total of the damage sustained, with such extremely imperfect arrangement as those of the present year, we may certainly expect that, when the line is completed, and properly furnished with all the requisites for the peculiar character of the transit, the transport of goods will be effected with safety and security, and that the breaking of bulk at the Barriers, which some would have us to believe to be such an insuperable obstacle to the general use of the line, will, in reality, prove to be but a trifling disadvantage.

27. Lastly, I cannot but observe how highly creditable it is to Major Stevens and his subordinates that they should have succeeded in conducting such extensive operations, with scarcely a single mishap, and with so little loss, in spite of the immense disadvantages under which they labored, the very imperfect state of the whole line, and the very short time allowed for preparations. The monsoon months are usually our resting time. At the close of the hot weather men in the Public Works Department look for a little relaxation This year there was no such respite for those employed upon the transit operations; their hardest work commenced with the rise of the river, and it was endured with a cheerfulness, zeal, and alacrity which does them honor.

28. There are a few recommendations which I ought to make with reference to future operations before closing this report.

1*st*.—I am decidedly of opinion that the transit service should by all means be kept up, and every effort made to place it in the most efficient possible condition. It entails no expense upon the Government. It will be of the greatest possible assistance to the works, as every thing must be which encourages intercourse between the stations where work is in progress, and the more populous parts of the coast and the interior. It fosters the infant trade upon the river, and it is the surest, speediest means of inducing private Companies to take advantage of the new river route now opening. It is not an attempt to force traffic into this channel in an unnatural way. It is the most natural and the simplest way of providing a channel for a traffic which is and always has been ready to flow into it.

I do not advocate a large and heavy expenditure for new Steamers and other means of transport. I propose that we shall go on as we have begun, improving upon our present flotilla, and adding to its strength as the exigencies of the trade or of the works require. There is no fear of launching into an unlimited expenditure with only a doubtful prospect of returns; we need simply go forward and increase our means of transport as we find it necessary to do so, ever keeping in view the ultimate transfer of the whole flotilla, or, at any rate, of the whole carrying business, to private agency.

2*nd*.—It is very desirable that shippers should be able to insure their goods. I think the Government might well bear the risk for a year or two when some private Company would probably take it up. This would tend more than any thing else to give confidence and to encourage merchants to use the transit. One per cent. against total loss and 5 per cent. against partial loss are rates which might, I think, be very safely offered.*

* The value of the goods carried this year was nearly 3½ lakhs.
The loss on the cotton abovementioned was about Rs. 2,500, or 1/11th per cent.
All other losses from damage were very trifling in amount.

3*rd*.—I am of opinion that it will be a great injury to the transit to limit its operations only to the river below the third Barrier, just as I am sure it will be found an immense mistake to exclude that Barrier from the improvements by means of canals which are to be made to the other two. At present we are shut up to this course in both cases; we have no alternative. In the one case, we have no Steamer fit to do the work required above that Barrier; in the other, the total annual allotments available will only be such as to render it advisable to devote them solely to the formation of the canals round the two lower Barriers. But the evil consequences will not be the less felt. In the case of the transit, they are already apparent, for the cost of carriage from the chief centres of production above the third Barrier down to that point enormously increase the expense of export by the river.

29. Even with our present rates of carriage by the river the cost of carting a ton of goods from Chanda to the head of navigation at foot of third Barrier, a distance of only 62 miles, is 55 per cent. of the charge for the river carriage from that point to Cocanada, 300 miles. From Ilingunghat to the third Barrier, 116 miles, the cost will be equal to the water charge to Cocanada.

Of course, this must tell immensely against the line of transit. By opening up only ¾ths of the whole length of the line, and leaving the other ¼th untouched, we sacrifice at least ¾ths of the value of the communication, and cut up by the roots the hope of remunerative returns upon the outlay.

30. The remedy is plain to improve the part of the river above the third Barrier, which is of all parts the most improvable, having the least fall and the smallest section; but of this there is of course no possibility, though a very few lakhs would do the work, so long as ten lakhs is likely to be the extreme limit of the annual appropriation for the river generally.

31. With regard, however, to the transit, I would recommend that lighter draught Steamers should be placed in the reach above the third Barrier as well as upon all the others. We can certainly build Steamers, which, with a draught of only one foot of water, will be thoroughly efficient for the purposes of transport, and with them *at least* a month would be added to the time during which the river is navigable. Some small engines are now being sent out from England. They are of only 12 I. H. P. each, but as the currents when the river is low are but slight small Steamer, even of this power, would do a fair amount of work. One such is required in each of the first two reaches for the works alone, and similar ones should certainly be placed upon the river above.

No. 709, dated 21st March 1863.

Order thereon.

Ordered to be recorded. As, under the orders of the Government of India, dated 29th December 1862, No. 5088, the control of the Local Government over the Upper Godavery Works is restricted to matters of a current nature, the propositions submitted by Captain Haig, having reference to future arrangements, should come under the consideration of the Commissioner of the Central Provinces.

Resolution by the Right Hon'ble the Governor General, Public Works Department,—(Nos. 1350-53, dated 10th July 1863.)

Read the following papers:—

Letter from Mr. Stanbrough, dated 4th October 1862.

Letter from Mr. Stanbrough, dated 24th October 1862.

Extract, Foreign Department, No. 2347, dated 5th December 1862.

Letter from Secretary to Chief Commissioner, Central Provinces, No. 125, dated 31st January 1863.

Letter from Secretary to Government, Fort St. George, No. 710, dated 21st March 1863.

Resolution.—His Excellency the Governor General observes that the question that calls for orders in connexion with the papers now under consideration may be dealt with under two heads:—

1*st*.—The proposals of Mr Stanbrough to undertake on certain terms a continuance of the experimental transport operations in which he was aided by the Government last year.

2*nd*.—The principles to be adopted in dealing with the future operations of the Transport Agency already established in connexion with the engineering works now in course of prosecution.

2. Mr. Stanbrough's proposal is that he should receive an advance of Rupees 50,000 from the Government, to which he would add a like sum, the whole to be applied to the purchase of produce in the Nagpoor Provinces to be sent down the Godavery for shipment at Cocanada. He suggests further that he should have the whole of the Government Steamers, &c., on the river placed at his command, the Government paying the actual expenses of the working, and he accounting for the freight of the goods carried at the rates already fixed, handing over to the Government three-fourths of the proceeds, and retaining one-fourth for his own remuneration.

3. Mr. Stanbrough seems to have made these proposals under the impression that the Government desired to have it known that cotton and other produce *could* be brought down the Godavery to the Coast from Nagpoor. But it is manifest that there could be no doubt that this is possible if enough money is paid for the operation. In the present condition of the river it may be possible to carry a few bales of cotton without inconvenience or difficulty; and, even with improved arrangements, a small supply may be got down without causing any important loss to Government by the transaction. Last year 150 tons were taken down, and Captain Haig talks of a possible increase of his freight four or five-fold with other addition to his boats, &c. What in truth is aimed at by the Government is obviously not to enter upon transactions of this sort, but to provide a means by which it shall be possible for dealers to bring produce down for export *profitably*.

4. Further, it is worthy of remark that it seems almost certain that Mr. Stanbrough's proposed operations would not in fact cause *one single* bale of cotton more to find its way to England, because the cost of transport from Nagpoor by way of Bombay or Mirzapoor is not so heavy as to close those routes excepting for a portion of the year. Mr. Stanbrough speaks of his not having entered the market for his last year's transactions till the commencement of the rains stopped the purchases of the dealers connected with Bombay and Mirzapoor. It is not argued by Mr. Stanbrough that what he proposed would bring any sensible additional quantity of produce into the export market, but only that it would send a certain small portion of the produce to the market one way instead of another. He states that he operated on cotton that would otherwise have remained in store till the roads to the west and north were again opened. It may be doubted whether any commercial advantage at all would be got by taking a few thousand bales of cotton to Cocanada instead of to Bombay or Calcutta.

5. His Excellency further remarks that it is plain that the vessels now existing on the Godavery are essentially wanted for the works in progress, and equally so that the prosecution of these works is the first thing to be attended to. Until the works are completed the Government must doubtless keep whatever vessels are wanted for its own transport business connected with the works quite irrespective of any commercial traffic. As, however, it is pretty clear that the freight of the Engineers will be mainly *upwards*, there will consequently be a prospect of the downward trips of the vessels being available for other freight, which might of course be economically accepted at a trifle above the rates that would pay the actual extra expenses.

6. But the funds at the disposal of the Engineers for carrying on the Godavery Works may

certainly be far better applied completly to the active prosecution of the necessary operations for opening out the navigation in a practical way than to any factitious development of a traffic on an insignificant scale, which can have no possible effect on the export market of India. It is quite certain that, until the obstacles at the Barriers on the Godavery are effectually got over, there can be no traffic in any useful sense; and further, that as soon as the river is really navigable, whatever goods can profitably go by it to Coconada will immediately proceed that way, whether the present attempt to send down a few bales of cotton experimentally are continued or not.

7. His Excellency therefore thinks it highly inexpedient to attempt to force a traffic upon the Godavery while the works are in course of construction; such freight as offers itself spontaneously, and as the boats necessarily employed on the work can convey, may be carried at a rate barely remunerative. But to do more than this is likely to damage the character of the route rather than to benefit it.

8. The proposals of Mr. Stanbrough, therefore, cannot be accepted.

9. With respect to the Government vessels on the Godavery, the proper course to follow will, in His Excellency's opinion, be strictly to limit, for the present, the Transport Fleet and Agency to the scale that shall suffice for the requirements of the Engineering Department. At the same time to accept all freight that is offered that can be carried without inconvenience to the prosecution of the works. The Transport Department may of course with advantage do all that is practicable to advertize its real powers of carrying goods so as to make the most of its position and means, but it should be very guarded in not entering into engagements it cannot fulfil. Captain Haig's proposal that the Government should become the insurers of goods entrusted to it seems quite inadmissible.

10. It will, at the same time, be very proper to look forward to the day when the canals and locks round the Barriers will be ready, and to consider what will be the proper way of dealing with the traffic when one or all of these works shall be completed. It will be a matter for consideration whether the Government should interfere at all in this matter, and whether it should not rather confine its action to giving all necessary information to the public as to the probable dates of opening various parts of the river, and leave it to private enterprise to do the rest. There may, however, possibly be a period of transition immediately following the opening of the portions of river in which the supply of boats on it may be too small, and to meet such conditions some special and exceptional Government action might be found expedient.

11. But the allusion to these points leads His Excellency to remark that at present nothing is known by the Government of India in a definite way as to any of the works begun or contemplated for the Godavery, and that a clear understanding of what has to be done, how much it will cost, and how long it will take to complete, are essential to enable the Government of India to deal properly with the many questions that must arise in connexion with this important undertaking.

12. In conclusion, His Excellency desires to record that these views are concurred in by the Hon'ble President and the Members of Council.

Shakespeare Memorial

From Messrs C Nicholson and R G MacDonnell, to the Hon'ble Cecil Beadon, Lieutenant Governor of Bengal,—(dated Committee Room, 120, Pall Mall, London, the —— August 1863)

Sir,—We do ourselves the honor of calling your Excellency's attention to the accompanying Resolution of the Shakespeare Committee,* inviting your co-operation in making known to Her Majesty's subjects within your Province the intention to celebrate next year the Three Hundredth Birthday of Shakespeare in a manner worthy of the Poet and of the Poet's countrymen

It is felt by the Noblemen and Gentlemen composing the Shakespeare Committee that all Her Majesty's subjects who speak the language of Shakespeare must regard with interest the proposal to commemorate his birth by the erection of a monument in a conspicuous part of London. It may not be possible for many of those who reside in distant parts of the British dominions to assist personally on the 23rd of April 1864 in laying the Foundation Stone of the proposed National Memorial. Nevertheless, as many thousands so circumstanced must desire to contribute towards such an undertaking, it is hoped they may be afforded a suitable opportunity of doing so.

The Committee have therefore instructed us to communicate with the Representatives of the Crown in the various British Colonies, and to request their good offices in making the object of this application widely known.

The people of England have had so many recent and gratifying proofs of the strong sympathy which unites them to their Colonial brethren in all matters of national interest, that we anticipate a hearty and early response to this invitation on the part of your Council and of the community, the administration of whose affairs has been entrusted to your Excellency.

We feel that it would be presumptuous in us to offer any special suggestions as to the most effective mode of bringing the subject before the people of the Colony. The proper Authorities there can alone fitly decide such local details. We may, however, state that it is confidently expected that this movement will ere long be honored by Her Majesty's immediate patronage and by the Presidency of His Royal Highness the Prince of Wales. When the list of distinguished Vice-Presidents, Officers, and Members of the Committee is completed we shall have much pleasure in transmitting it. We have further to request that your Excellency will allow your name to be added to the list of the National Shakespeare Committee.

In the meantime we may state that contributions towards the Shakespeare Memorial should be remitted to Messrs. Coutts & Co., Bankers, London.

We shall also be most happy to pay every attention to any communication with which your Excellency may favor us on the subject of this letter.

---

* "Proposed by Sir Richard MacDonnell, C. B., seconded by Thomas Wright, Esq., that the Governors of Her Majesty's Colonies and Indian Possessions be invited to make known the objects of this Committee within their respective Provinces, and to enlist the sympathy and support of Her Majesty's subjects throughout the British Empire in aid of the erection of the contemplated National Shakespearian Monument."

LEGISLATIVE.

The following Act of the Governor-General of India in Council, received the assent of His Excellency the Governor-General on the 10th December 1863, and is hereby promulgated for general information:—

Act No. XXX of 1863.

An Act to provide for the appointment of Commissioners to enquire into certain claims against the late Native Government of Oudh.

Preamble.

Whereas certain persons have made demands against the Government of India in respect of claims preferred by them, either in their own right or as the representatives of persons now deceased, against the late Native Government of Oudh: and whereas it is desirable that Commissioners should be appointed for the purpose of investigating the said claims; It is enacted as follows:—

Appointment of Commission of Enquiry.

I. It shall be lawful for the Governor-General of India in Council to issue a Commission to such persons as he shall think fit, for the purpose of enquiring into and reporting on such claims preferred against the late Native Government of Oudh, as shall be in the said Commission named and described. The said Commissioners shall fully enquire into the said claims respectively, and shall as soon as they conveniently can report to the Governor-General of India in Council the result of their enquiries, and shall in their report or reports make such suggestions, if any, as shall to them seem fit.

Governor-General in Council may appoint a sole Commissioner.

II. It shall be lawful for the Governor-General of India in Council to issue such Commission to one person only, if he shall so think proper: and if a Commission is issued to one person only, all the powers by this Act given to Commissioners shall and may be exercised by the sole Commissioner so appointed; and all the provisions of this Act as to appointing new Commissioners in the room of any of the Commissioners dying or resigning, or becoming unable or refusing to act, and as to the powers to be exercised by the new Commissioners so appointed, shall apply equally (so far as the same may be applicable) to the case of a sole Commissioner dying or resigning, or becoming unable or refusing to act, and of any new Commissioner appointed in his room.

Death or resignation of any of the Commissioners.

III. In case of the death or resignation of any of the said Commissioners, or of any of them becoming unable or refusing to act, it shall be lawful for the other Commissioners or Commissioner to act alone, and all the powers by this Act given to Commissioners shall and may be exercised by the continuing Commissioners or Commissioner alone. It shall be lawful for the Governor-General of India in Council from time to time, without issuing a new Commission, to appoint some other person or persons to act as a Commissioner or Commissioners jointly with the continuing Commissioners or Commissioner, and in such case all the powers conferred by this Act shall and may be exercised by the said newly-appointed Commissioner or Commissioners jointly with the continuing Commissioners or Commissioner.

Claimants may appear to support their claims at time and place fixed by Governor-General.

IV. The said Commissioners shall enter in public upon the enquiry into the said claims respectively, at such time and place as shall have been fixed by the Governor-General of India in Council, by notification published in the Calcutta Gazette at any time whether before or after the passing of this Act. It shall be lawful for any of the claimants preferring the claims in the said Commission mentioned, to appear at the time and place so appointed in support of their claims respectively, either in person or by Agent duly constituted. The Secretary of State for India in Council may also in like manner appear at such time and place in opposition to the said claims. No claimant who shall not appear at the time and place appointed shall be entitled to appear subsequently or to take any part in the proceedings unless the Commissioners shall in their discretion specially permit him so to do. It shall be

lawful for the Governor-General of India in Council by notification in the Calcutta Gazette to vary or cancel any notification previously given as aforesaid.

Mode in which public enquiry is to be conducted.

V. The public enquiry into the several claims aforesaid shall be conducted by the said Commissioners so far as regards adjournments, the examination of claimants and witnesses, the reception of documents and the rules of evidence, in like manner (so far as the same may in the opinion of the Commissioners be possible) as an ordinary Civil suit under the Code of Civil Procedure. The persons appearing in support of any claim shall be deemed for the purpose of the enquiry to be the plaintiffs in the cause, and the Secretary of State for India in Council shall be deemed to be the defendant, and may oppose the claimants in like manner as a defendant in a Civil suit may ordinarily oppose the plaintiff therein.

Attendance of witnesses.

VI. It shall be lawful for the Commissioners aforesaid, by a summons under the hand of any one of them, to require the attendance before them at a time and place to be mentioned in such summons, of any person or persons whomsoever, residing or being within British India, whose evidence shall in the judgment of the Commissioners aforesaid be material to any of the matters of the enquiry aforesaid; and to require the person or persons so summoned to bring and produce before them all such books, papers, deeds, and writings as to them the said Commissioners shall appear necessary for arriving at the truth of the matters directed to be enquired into by the said Commissioners; all which persons shall accordingly attend before the said Commissioners, and shall produce such books, papers, deeds, and writings as shall be required of them and shall be in their custody and control or in the custody and control of any one of them, according to the tenor of the summons.

Examination of witnesses on oath or affirmation.

VII. It shall be lawful for the Commissioners aforesaid, or one of them, to administer an oath or an affirmation in such form as to the said Commissioners shall seem fit, to all persons who shall be examined before them touching the matters to be enquired into: Provided that nothing herein contained shall render it necessary for the said Commissioners to take evidence upon oath or affirmation unless they shall think it fit or expedient so to do.

Proviso.

Witnesses neglecting to attend, &c.

VIII. If any person upon whom any such summons shall be served, by the delivery thereof to him or by the leaving thereof at his usual place of abode, shall without reasonable cause (to be allowed by the Commissioners aforesaid), fail to appear before them at the time and place mentioned in the summons, or shall refuse to be sworn or to make affirmation (as the case may be), or shall not make answer to such questions as shall be put to him touching the matters directed, or which may hereafter be directed to be enquired into by the Commissioners aforesaid, or shall refuse or fail without reasonable cause (to be allowed by the Commissioners aforesaid) to produce and shew to the said Commissioners any such paper, book, deed, or writing being in his possession or under his control as to the Commissioners aforesaid shall appear necessary for arriving at the truth of the matters to be enquired into by them, the Commissioners aforesaid shall have the same powers in all respects touching any such person so failing to appear, or refusing to be sworn or to make affirmation, or not answering such questions as shall be put to him, or refusing to produce and shew any such book, paper, deed, or writing as aforesaid, as the Principal Court of Original Civil Jurisdiction within the limits of which the said person shall be residing may by law exercise against any person for making default of appearance, or for refusing to be sworn or to give evidence on any issue joined in any action depending in such Court.

Expenses of witnesses.

IX. Whenever a summons is issued for the attendance of a witness under this Act, the Commissioners may if they think fit order such witness to receive from the Collector or Commissioner of the District or Division, such travelling and other expenses as he would have been entitled to receive had he been summoned to appear and give evidence in the Principal Court of Original Civil Jurisdiction in the District or Division.

Punishment for false evidence.

X. Every person who, upon examination upon oath or affirmation before the Commissioners aforesaid or any of them, shall wilfully give false evidence, shall be liable to the punishment provided in Section 193 of the Indian Penal Code for the offence of giving false evidence.

Preamble.

Preamble.

Offg. Depy. Secy. to the Govt. of India, Home Department.

THE following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 16th December 1863, and was referred to a Select Committee, with instructions to make their report thereon in three weeks :—

No. 23 OF 1863.

A Bill for regulating the importation and manufacture of alimentary Salt in the Territories administered by the Chief Commissioner of the Central Provinces.

Preamble.

WHEREAS it is expedient to provide for the levy of a Customs duty upon Salt in the Territories administered by the Chief Commissioner of the Central Provinces, and to extend to the said Territories certain provisions of Act XIV of 1843 *(for regulating the levy of Customs duties and the manufacture of Salt in the North-Western Provinces of the Presidency of Bengal)*, and of Act XXXVI of 1855 *(to empower Officers of Customs and Land Revenue to search houses and other enclosed places for contraband Salt in the North-Western Provinces)*, and of Act XIX of 1862 *(to extend to the Provinces of Oude certain provisions of Acts XIV of* 1843 *and XXXVI of* 1855 *relating to the manufacture of contraband Salt, and to amend the last named Act)*; It is enacted as follows :—

Section XIV of Act XIV of 1843 partially repealed.

I. So much of Section XIV, Act XIV of 1843 as declares that nothing in the said Act contained shall apply or be deemed to apply to the Saugor and Nerbudda Territories, is hereby repealed.

Customs duty on Salt imported into the Central Provinces.

II. It shall be lawful for the Governor-General in Council to order the levy of a Customs duty not exceeding three Rupees per maund on Salt imported into the Territories administered by the Chief Commissioner of the Central Provinces.

Certain provisions of Act XIV of 1843, of Act XXXVI of 1855, and of Act XIX of 1862, extended to the Central Provinces.

III. So much of Sections III, IV, V, VI, VII, VIII, IX, X, XI, XII and XIII of Act XIV of 1843 as relates to the manufacture and importation of alimentary Salt, and to the prevention and punishment of the illicit manufacture and importation of such Salt, and Sections I, II, III, V, VI, VII, VIII and IX of Act XXXVI of 1855 *(to empower Officers of Customs and Land Revenue to search houses and other enclosed places for contraband Salt in the North-Western Provinces)*, and Section II of Act XIX of 1862 *(to extend to the Province of Oude certain provisions of Acts XIV of* 1843 *and XXXVI of* 1855 *relating to the manufacture of contraband Salt, and to amend the last named Act)* are hereby extended to the Territories administered by the Chief Commissioner of the Central Provinces.

Indemnity to Collectors of Customs and others.

IV. Every Collector of Customs and other Officer in the Territories administered by the Chief Commissioner of the Central Provinces, however such Officer is designated, is hereby indemnified for any thing done before the passing of this Act, which might lawfully have been done if this Act had been in force, and no action or other proceeding shall be maintained against any such Collector or other Officer in respect of any thing so done.

STATEMENT OF OBJECTS AND REASONS.

A communication lately received from the Chief Commissioner of the Central Provinces brought to the notice of the Government of India the very unsatisfactory state of the law in those Provinces in respect to that branch of the public Revenue which was derived from the duty upon Salt. In the Province of Nagpore an order of the local Government, passed in the month of May 1861, to which the Indian Councils' Act of the same year has given the force of law, imposed a duty of one Rupee eight annas per maund on Salt imported into the Province ; but no orders were issued as to the manner in which the duty was to be levied, or as to the measures by which infringements of the order imposing the duty were to be prevented and punished. Practically the system in force in the North-Western Provinces under the provisions of Act XIV of 1843, for regulating in those Provinces the levy of Customs duties and the manufacture of Salt, is stated to have been, more or less, acted upon in the Central Provinces ; but it is suggested that this has been done without any legal warrant. Furthermore, it appears that as regards some parts of the Central Provinces orders have been issued at different times by the Government of the North-Western Provinces which would seem to be scarcely consistent with so much of Act XIV of 1843 as exempts the Saugor and

Nerbudda Territories from the operation of that Act. The present Bill is intended to remove the existing doubts as to the state of the law, and to place the Customs duty on Salt in the Central Provinces, and all matters connected with the levy of the same, on the same footing as in the Territories under the North-West Government. This is proposed to be done by extending to the Central Provinces the law of the North-Western Provinces so far as the same is considered suitable thereto.

A Section has been added to the Bill indemnifying the Collectors of Customs and other Officers for acts done before the passing of the Bill which might lawfully have been done had the Bill been in force at the time, and declaring that no action or proceeding shall be maintained against any such Collector or other Officer in respect of any thing so done.

Offg. Depy. Secy. to the Govt. of India,
Home Department.

THE following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 16th December 1863, and was referred to a Select Committee with instructions to make their report thereon in three weeks:—

No. 24 OF 1863.

A Bill to bring the Jagheers of Poorwah and Khuddee, in the District of Banda, under the operation of the General Regulations.

Preamble.

WHEREAS the Jagheers of Poorwah and Khuddee in the District of Banda are not subject to the General Regulations, and it is expedient that the said Jagheers should be administered on the same system as prevails in the rest of the District; It is enacted as follows:—

Laws and Regulations for internal administration of Banda to have full force in Poorwah and Khuddee.

I. The Laws and Regulations established for the internal administration of the District of Banda shall have full force and effect in the Jagheers of Poorwah and Khuddee, and the administration of Civil and Criminal Justice, and the superintendence of the settlement and realization of the public revenue, and of all matters relating to rent in the said Jagheers, are hereby vested in the Officers who are, or may hereafter be, appointed by the Lieutenant-Governor of the North-Western Provinces for the said District of Banda.

Saving as to suits pending at the time of passing of this Act.

II. All suits and proceedings, whether in appeal or otherwise, arising in the said Jagheers, and which, at the time of this Act coming into operation, shall be pending in any Court or before any Officer, shall be heard and determined in the same manner as if this Act had not been passed.

Suits remanded by any Appellate Court.

III. Any suit which, before the coming into operation of this Act, shall have been determined and which shall have been or shall be remanded by any Appellate Court, shall be tried before the Court which for the time being would be competent to try such a suit if instituted after the passing of this Act.

Execution of decrees.

IV. All applications for execution of decrees or orders which, but for the passing of this Act, would have been made to any Court or Officer existing at the time of the passing of this Act, shall be made to the Court or Officer who would have had jurisdiction in respect of the matter in dispute, had the suit or proceeding been instituted after the coming into operation of this Act.

Appeals from decrees or orders passed before passing of Act.

V. All appeals from decrees or orders passed before the coming into operation of this Act shall be received, heard and determined by the Court or Officer who would have had jurisdiction over such appeals, had the decrees or orders to which they relate been passed after the coming into operation of this Act.

Commencement of Act.

VI. This Act shall take effect from such date as the Lieutenant-Governor of the North-Western Provinces shall fix by an order to be published in the Official Gazette.

STATEMENT OF OBJECTS AND REASONS.

This Bill is introduced at the request of the Government of the North-Western Provinces.

The two Jagheers to which the Bill relates, were declared by Regulation XXII of 1812 to have always been, and to be still exempted from the operation of the General Regulations. The Jagheer of Poorwah was resumed in the year 1856, and the Jagheer of Khuddee in the year 1853. From the time of their resumption the two Jagheers have been administered by the Officers of the British Government according to what is known as the non-Regulation system; but being included in a District (Banda) which is subject to the General Regulations, it is considered desirable that they also should be brought under the operation of these Regulations in order that the entire District may be administered on one uniform system. This is the object of the present Bill.

3. The Sale shall commence at the hour of 11 A. M. of the day fixed by previous Notification, and shall not be continued after the hour of 5 P M., but if at that hour any of the lots advertised for sale shall remain unsold, the Sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a Public Holiday) at the hour of 11 A M., and so on, until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board may dispose of the lots which remain on hand at a future Sale.

4. Each lot shall contain five Chests.

5. A Promissory Note for a sum calculated according to the scale noted in the margin shall be taken as a deposit on each lot from the Purchaser in the Sale Room, and before the lot is registered in the Sale Book, and all such Promissory Notes shall be redeemed on the part of the Purchasers at this Office by Bank of Bengal Receipts, or by substitution of other Public Securities of the Bengal Government, on or before 4 o'clock in the afternoon of the fifth day after the Sale, or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts, or deposit of other Public Securities as aforesaid shall have been delivered in, shall be re-sold at such time or times, and under such conditions of re-sale, as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

8 The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order ; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained, and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 400 Rupees specified in the second of these Conditions.

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1862-63 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1864, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantitiy of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

1. There shall be two distinct Grades or Classes of Pleaders as heretofore.

2. The Senior Grade shall be allowed to plead at the Bar of all the Courts subordinate to the High Court, Civil, Criminal, and Revenue, and shall be further eligible for the office of Moonsiff.

3. The Junior Grade shall be restricted to practise in the Courts of the Sudder Ameen, the Moonsiff, the Magistrate, the Collector and their Subordinates.

4. The examination shall be partly written and partly *vivâ vôce*.

5. The *vivâ vôce* examination shall be such as to test the practical knowledge of the candidates on questions connected with the subjects of the test.

6. The written examination papers shall be prepared by Examinees, who shall act in conjunction with, and under the control of, the High Court.

7. The written examination shall form the subject of two papers, of which the former shall embrace questions relative to the Law of Property and its subordinate heads, and the second questions on Evidence, Civil and Criminal Procedure, and Criminal Law. The maximum number of marks for each of these papers shall be 100, and no candidate shall be held to have passed unless he shall have obtained 160 marks in the two papers.

8. Applications for admission to Examination shall in all cases be sent or submitted to the Zillah Judge of the District in which the candidate resides, or is employed, at least one month before the date fixed for Examination, and the candidate shall satisfy the Judge by Certificate or otherwise that he is a person of good moral character. Notice.

Under orders of the Government of Bengal, conveyed through the Chief Customs Authority, the following Rules observed on the Custom House Wharf are published for general information:—

Importers and others landing goods at the Custom House are to appoint Watchmen to take care of them, such Watchmen are to have in their possession the badge or written authority of the persons appointing them, and which is to be produced when required by an Officer of Customs.

Wharf Assistants are strictly cautioned from receiving packages containing matches, acids, crackers, gunpowder, gunceps, saltpetre, or other inflammable articles within their Sheds, and to bring to the notice of the Controller immediately they find from their boat notes or information otherwise received that such articles are about to be landed. Any person bringing such goods into the Sheds and Godowns of the Custom House will be liable to a fine of 500 Rupees, and to make good all damages arising therefrom.

No packages are allowed to be opened on the Wharf without the Collector's orders, or if for appraisement, under direction of one of the Appraisers.

No full casks or cases of wine, beer, or any other liquor is to be passed out until the empty ones covered by the same Perwannah are removed first. This rule is applicable in cases where parties are allowed to fill up beer, sprits, tar, &c., on the Wharf before passing.

As the Out-Sheds are only intended for the accommodation of goods landed before the opening and after the closing of the gates, unless under special permission of the Collector, and with certain exception, no goods are allowed to be placed therein between the hours of 10 A. M. and 5 P. M.

The following goods only are allowed to be landed outside at all hours:—Timbers and planks of all description, heavy anchors and chains, tar, rosin, pitch, and all heavy packages which require the use of the Crane.

All expenses incurred for advertising and removing packages are to be paid by the Owners or Consignees thereof at the time of passing.

An extra Officer and a Peon to be appointed to all private bond Godowns at the expense of the bonders. The former to receive and the latter to accompany the goods passing into private bond. An Officer is also appointed, at the expense of the bonders, to pass out goods from private bond on which duty has been paid.

A Peon (if one be available) will be appointed by the Officer at the Bonded Warehouse to accompany goods into public bond, otherwise a fee of 4 annas must be paid for an extra Peon.

The rate to be charged by the extra Officer has been fixed from 10 A. M. to 1 P. M. at 1 Rupee and 8 annas; and any further time beyond the above, up to 5 P. M., 3 Rupees. From 5 to 6 P. M. an extra charge of 12 annas will be made, and 1 Rupee from 5 to 6-30 P. M., after which time Officers are not expected to work. Fee for Peons, 4 annas each per day.

A conveyance fee of 1 Rupee to be paid to the extra Officer when required to attend at a Godown the distance of which from the Custom House exceeds ½ a mile.

Instances having occurred in which goods could not be received and duly secured in the Bonded Warehouse on account of passing out late from the Wharf, Assistants will not allow any goods intended for private bond to be carted after 4 P. M., and for public bond after 4-30 P. M.

No work will be allowed on Sundays and Christian holidays.

Work, before and after hours, and on general holidays, will be allowed only on payment of fees, and under sanction of the Collector.

The rate for working on those holidays, and before and after hours, *i. e.*, from 7 to 10 A. M. and from 5 P. M. to sunset, is fixed at 5 Rupees for each requisition for the Assistants, and 8 annas to the Peons; if after sunset, extra fees of 5 Rupees and 8 annas, respectively, will be charged.

All applications for working on holidays should be sent in to the Collector the day previous, and in time to allow the necessary arrangements to be made.

Goods lying under cover within the Custom House to be allowed four days rent-free, two days single rent, and for any number of days in excess of that period double rent up to fourteen days (exclusive of the rent-free and single rent terms), after that to treble rent for ten days more, and quadruple rent for any period in excess of that term. These rates to be calculated by the single rates fixed in Government Order No. 2796, dated 15th November 1859, published in the *Calcutta Gazette* on the 4th January 1860.

All empty Cargo Boats lying for more than twenty-four hours on the River bank within the limits of the Custom House, *i. e.*, from Coilah Ghaut to Clive Street Ghaut, will be charged a rent of 5 Rupees per day.

Country timber landed within the above limits will be charged, from the date of landing, a rent of 1 Rupee per log per day.

THIRD APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, DECEMBER 23, 1863.

STATEMENT shewing roughly defined Lots of Waste Land available in the Chittagong District. Each Lot cannot of itself be purchased or otherwise taken free of encumbrance as exceeding the limit allowed by Government, but they contain some valuable blocks of hill and other land which could be so purchased, and which would be available for Tea, Coffee, and Cotton cultivation. The Lots can be identified by reference to the Map of the District surveyed by Lieutenant Siddons, which is obtainable in the Surveyor-General's Office.

Forwarded to Commissioner of Chittagong with reference to his letter No. 204, dated 30th October 1863.

CHITTAGONG COLLECTORATE,
The 7th November 1863.

F. G. MILLETT,
Officiating Collector.

THE areas above given have been very roughly estimated by the Collector from the Maps. Their extent has been, I think, in most cases overestimated, but this is perhaps of no great importance, as in the event of grants being applied for they will be surveyed in detail.

This Statement does not, of course, include any fact of what is termed the Hill Tracts beyond the limits to Zillah Chittagong.

W. GORDON YOUNG,
Commissioner.

Government of India, Central Provinces.

Flight of Locusts.

From LIEUTENANT-COLONEL H. D. TAYLOR, Inspector General of Police, Central Provinces, to CAPTAIN HECTOR MACKENZIE, Secretary to the Chief Commissioner, Central Provinces,—(dated Nagpore, the 27th November 1863.)

I HAVE the honor to submit a brief account, compiled from Police Reports, of the flights of locusts, which visited the Central Provinces in September and October of this year.

2. During the months mentioned above they appeared at different times in the Districts mentioned in the margin, but with the exception of Dumoh, which they first entered on the 9th September and finally quitted on the 14th October. Their stay in any one District was comparatively but limited.

Saugor.
Dumoh.
Jubbulpore.
Nursingpore.
Baitool.
Seonee.
Chindwara.
Bhundara.
Chanda.
Raepore.
Beraspore.
Sumbulpore.

3. Their general course appears to have been from north-west to south-east. Entering the Saugor District from the west, about the 7th of September, one large flight reached the Station of Saugor on the 9th; and on the same date another dense column travelling from Myhere through the Koomharee Pergunnahs arrived at Dumoh.

4. On the 12th September great numbers passed over the Station of Jubbulpore, going towards Mundlah; and in the Districts of Nursingpore, Seonee, Chindwara, and Bhundara, detached bodies hovered about until the latter end of September, when they appear to have taken flight eastward, and probably amalgamated with the great body which visited Sumbulpore on the 26th September.

5. The main portion of this body reached the Chutteesgurh Division about the 15th September, and off-shoots of it visited various parts of the Belaspore and Raepore Districts.

6. At noon on the 26th the main flight passed over the Station of Sumbulpore. The vastness of its size may be imagined from the fact, that what may be termed the column is said to have been fourteen miles broad, and to have occupied two full hours in passing. Captain Stuart writes, that "at one time the noise of their passing along was distinctly audible, and that in the distance they resembled the wreaths of dust, which in this country so often precedes a thunder-storm."

7. This flight was moving in a north-easterly direction, and it is supposed that they made for the dense jungles beyond Sassan.

8. So late as the 5th October a large flight was seen at the Station of Baitool; and on the 28th September great numbers visited the Tullode and Mhool Pergunnahs, in the Chanda District. It is not unlikely that these were off-shoots of some other large body, which, skirting the western boundary of the Central Provinces, had entered Berar.

9. In paragraph 2 I have mentioned that small flights were seen in the Dumoh District up to the middle of October. These all came from the west: and the last, which traversed the Hutta and Murriadeh Pergunnahs on the 14th of that month, was travelling towards Bundlecund.

10. It is believed that in the Central Provinces the locusts have done but little damage. In the Districts of Baitool, Chindwara, Bhundara, and Sumbulpore, indeed they can hardly be said to have even alighted.

11. The District Superintendent of Dumoh reports that in his District only 89 villages suffered. Those in the Puteera and Tejgurh Pergunnahs suffered most. Every kind of crop but rice was attacked; and in some parts of the country the insects alighted for a short time on trees, in preference to taking to the fields.

12. Except in the Chutteesgurh Division, the inhabitants of the Districts where they appeared made some efforts to protect their fields by driving them away. Beating drums and making loud noises were the means generally resorted to, and in most instances they seem to have been successful. In the Chutteesgurh Division it was different. As indicative of the apathy of the people, the District Superintendent of Belaspore mentions that on one occasion, when passing through a village in the fields around which large numbers of locusts had alighted, he endeavoured, by example, to induce the people to drive them off, and taking a brass pot in hand himself led the way, but that no one followed him. He states that superstition prevails to such an extent in some parts of the District, that the villagers actually paid worship to the insects, believing that great evil would happen if they attempted to destroy them. The same apathy was noticed by Captain Stuart at Sumbulpore, when portions of the great flight, which was seen there on the 26th September, alighted for a short time in and around the Station.

13. Both Captain Stuart and Captain Baker agree in stating that the locusts which they saw were the full-grown insects.

Government of Bengal.

Agricultural Exhibition.

From A. H. Blechynden, Esq., Secretary to the Agricultural and Horticultural Society, to F. R. Cockerell, Esq., Officiating Secretary to the Government of Bengal,—(dated the 11th December 1863.)

Referring to the Show of the Agricultural and Horticultural Society which is to take place on the last day of the Agricultural Exhibition, *viz.*, the 23rd January 1864, I am desired by the Council to request that you will obtain the sanction of His Honor the Lieutenant-Governor to the offer, by the District Committees, of local Prizes to be awarded for Horticultural produce on the above occasion.

2. The Society have hitherto been in the habit of disbursing annually at the first ordinary Show of the season rather more than Rupees 500 for such specimens of vegetables, fruits and flowers as were deemed deserving of encouragement, the growth of Gardens in Calcutta and its immediate vicinity. But considering the interest evinced in all quarters at the approaching Agricultural Exhibition, the Council think it probable that Residents of neighbouring Districts, European and Native, may wish to send Horticultural products by Rail and otherwise.

In the event of His Honor acceding to this request, the Council will be glad to offer their services for the award and distribution of these Extra Prizes, and they would beg to suggest that no time be lost in notifying though the Secretaries of Local Committees that such Prizes will be given. To save time, I annex to this letter copy of the Society's Prize List at the first Horticultural and Floricultural Exhibition of last year. It should be in the discretion of the Local Committees to make such additions and alterations in the fruits, vegetables, flowers, &c., therein entered as they may deem advisable.

Punjab Railway.

Note on the Progress Report of the Punjab Railway for Half-year ending 30th June 1863.

There has been marked progress. Lahore Station will be complete by the end of the cold season, with the exception of the roof over the rails. It has been decided to make this roof and similar ones of iron, instead of wood as first sanctioned, and as the Roorkee Shops could not supply the quantity, they have been indented for on England. The Local Government has sanctioned their adoption.

The Carriage Building Shed is complete; the Smithy and Saw Mill Sheds will be finished this season. The Fuel shed has also been built. There are 6 Passenger and 4 Goods Engines at work, and 270 carriages of sorts; also 1 Passenger and 1 Goods Engine at Mooltan not yet put together.

The Lahore and Umritsur Section was opened before completion. But the Traffic has been maintained without interruption; the Section is, however, all but completed, with the exception of the Passenger Station at Umritsur.

Lahore and Mooltan line has made much greater progress in this last six months than in the previous half-year. All the earth-work, the intermediate Stations, the Plate-layers' Bungalows, the Iron Girder Bridges, and the Wells are all completed, and of the total number of culverts 90 per cent. is done, leaving only 22 small ones to be made. Ballast 39 per cent. done, Sleepers 56½, and Permanent Way 48 per cent. The Line can be opened with ¾ supply of ballast. During the half-year 47 miles of Permanent Way was laid; 7¼ miles with Greave's Patent pot sleepers, which *are answering most admirably*. Up to 30th June, then, out of the 219½ miles from Lahore to Shere Shah 72 miles were fit for traffic, and it is confidently expected and calculated that the Line will be open by the end of 1864. Sections will be opened before this; at the end of 1863, from Lahore down 50 miles, from Mooltan up 40 miles, and from Chuckwattee up 40 miles, and a hope is expressed that His Excellency may be able to open the Lahore Section in February or March.

It is hoped that before the rains Lahore and Chuckwattee, 129 miles, will be continuous, and the Railway Company are willing to undertake the transit of the Dâk across the uncompleted portion between Chuckwattee and Mooltan. The Telegraph is completed, except a break of 79 miles. The extension from Mooltan to Shere Shah, 11½ miles, has been formally opened; the local traffic on this is little, and the Indus Flotilla still goes up to Mooltan and does not stop at Shere Shah, as it was expected it would do.

LEGISLATIVE.

THE following Act of the Governor-General of India in Council, received the assent of His Excellency the Governor-General on the 16th December 1863, and is hereby promulgated for general information :—

ACT No. XXX OF 1863.

An Act to provide for the appointment of Commissioners to enquire into certain claims against the late Native Government of Oudh.

Preamble.

WHEREAS certain persons have made demands against the Government of India in respect of claims preferred by them, either in their own right or as the representatives of persons now deceased, against the late Native Government of Oudh : and whereas it is desirable that Commissioners should be appointed for the purpose of investigating the said claims ; It is enacted as follows :—

Appointment of Commission of Enquiry.

I. It shall be lawful for the Governor-General of India in Council to issue a Commission to such persons as he shall think fit, for the purpose of enquiring into and reporting on such claims preferred against the late Native Government of Oudh, as shall be in the said Commission named and described. The said Commissioners shall fully enquire into the said claims respectively, and shall as soon as they conveniently can report to the Governor-General of India in Council the result of their enquiries, and shall in their report or reports make such suggestions, if any, as shall to them seem fit.

Governor-General in Council may appoint a sole Commissioner.

II. It shall be lawful for the Governor-General of India in Council to issue such Commission to one person only, if he shall so think proper : and if a Commission is issued to one person only, all the powers by this Act given to Commissioners shall and may be exercised by the sole Commissioner so appointed ; and all the provisions of this Act as to appointing new Commissioners in the room of any of the Commissioners dying or resigning, or becoming unable or refusing to act, and as to the powers to be exercised by the new Commissioners so appointed, shall apply equally (so far as the same may be applicable) to the case of a sole Commissioner dying or resigning, or becoming unable or refusing to act, and of any new Commissioner appointed in his room.

Death or resignation of any of the Commissioners.

III. In case of the death or resignation of any of the said Commissioners, or of any of them becoming unable or refusing to act, it shall be lawful for the other Commissioners or Commissioner to act alone, and all the powers by this Act given to Commissioners shall and may be exercised by the continuing Commissioners or Commissioner alone. It shall be lawful for the Governor-General of India in Council from time to time, without issuing a new Commission, to appoint some other person or persons to act as a Commissioner or Commissioners jointly with the continuing Commissioners or Commissioner, and in such case all the powers conferred by this Act shall and may be exercised by the said newly-appointed Commissioner or Commissioners jointly with the continuing Commissioners or Commissioner.

Claimants may appear to support their claims at time and place fixed by Governor-General.

IV. The said Commissioners shall enter in public upon the enquiry into the said claims respectively, at such time and place as shall have been fixed by the Governor-General of India in Council, by notification published in the Calcutta Gazette at

any time whether before or after the passing of this Act. It shall be lawful for any of the claimants preferring the claims in the said Commission mentioned, to appear at the time and place so appointed in support of their claims respectively, either in person or by Agent duly constituted. The Secretary of State for India in Council may also in like manner appear at such time and place in opposition to the said claims. No claimant who shall not appear at the time and place appointed shall be entitled to appear subsequently or to take any part in the proceedings unless the Commissioners shall in their discretion specially permit him so to do. It shall be lawful for the Governor-General of India in Council by notification in the Calcutta Gazette to vary or cancel any notification previously given as aforesaid.

Mode in which public enquiry is to be conducted.

V. The public enquiry into the several claims aforesaid shall be conducted by the said Commissioners so far as regards adjournments, the examination of claimants and witnesses, the reception of documents and the rules of evidence, in like manner (so far as the same may in the opinion of the Commissioners be possible) as an ordinary Civil suit under the Code of Civil Procedure. The persons appearing in support of any claim shall be deemed for the purpose of the enquiry to be the plaintiffs in the cause, and the Secretary of State for India in Council shall be deemed to be the defendant, and may oppose the claimants in like manner as a defendant in a Civil suit may ordinarily oppose the plaintiff therein.

Attendance of witnesses.

VI. It shall be lawful for the Commissioners aforesaid, by a summons under the hand of any one of them, to require the attendance before them at a time and place to be mentioned in such summons, of any person or persons whomsoever, residing or being within British India, whose evidence shall in the judgment of the Commissioners aforesaid be material to any of the matters of the enquiry aforesaid; and to require the person or persons so summoned to bring and produce before them all such books, papers, deeds, and writings as to them the said Commissioners shall appear necessary for arriving at the truth of the matters directed to be enquired into by the said Commissioners; all which persons shall accordingly attend before the said Commissioners, and shall produce such books, papers, deeds, and writings as shall be required of them and shall be in their custody and control or in the custody and control of any one of them, according to the tenor of the summons.

Examination of witnesses on oath or affirmation.

VII. It shall be lawful for the Commissioners aforesaid, or one of them, to administer an oath or an affirmation in such form as to the said Commissioners shall seem fit, to all persons who shall be examined before them touching the matters to be enquired into: Provided that nothing herein contained shall render it necessary for the said Commissioners to take evidence upon oath or affirmation unless they shall think it fit or expedient so to do.

Proviso.

Witnesses neglecting to attend, &c.

VIII. If any person upon whom any such summons shall be served, by the delivery thereof to him or by the leaving thereof at his usual place of abode, shall without reasonable cause (to be allowed by the Commissioners aforesaid), fail to appear before them at the time and place mentioned in the summons, or shall refuse to be sworn or to make affirmation (as the case may be), or shall not make answer to such questions as shall be put to him touching the matters directed, or which may hereafter be directed to be enquired into by the Commissioners aforesaid, or shall refuse or fail without reasonable cause (to be allowed by the Commissioners aforesaid) to produce and shew to the said Commissioners any such paper, book, deed, or writing being in his possession or under his control as to the Commissioners aforesaid shall appear necessary for arriving at the truth of the matters to be enquired into by them, the Commissioners aforesaid shall have the same powers in all respects touching any such person so failing to appear, or refusing to be sworn or to make affirmation, or not answering such questions as shall be put to him, or refusing to produce and shew any such book, paper, deed, or writing as aforesaid, as the Principal Court of Original Civil Jurisdiction within the limits of which the said person shall be residing may by law exercise against any person for making default of appearance, or for refusing to be sworn or to give evidence on any issue joined in any action depending in such Court.

Expenses of witnesses.

IX. Whenever a summons is issued for the attendance of a witness under this Act, the Commissioners may if they think fit order such witness to receive from the Collector or Commissioner of the District or Division, such travelling and other expenses as he would have been entitled to receive had he been summoned to appear and give evidence in the Principal Court of Original Civil Jurisdiction in the District or Division.

HYDROGRAPHIC NOTICE.

CHINA SEA.

Shoals and Dangers in the Route from Singapore to the Palawan Passage by the N. W. Coast of Borneo.

Ottawa and Rogers Breakers in the Fairway of the Palawan.

Shoals off Labuan and the Mantanani Islands. Beacons at Labuan—Sarawak River, &c., &c.

(*All bearings are Magnetic*)

The following observations are the result of the *Rifleman's* recent cruise in the China Sea between the 26th of June and the 28th of September 1863:—

The object before us upon leaving Singapore was to clear the Chart of doubtful dangers and to fix such real dangers as we should find to exist in the route to China by the Coast of Borneo, Labuan, and the Palawan passage, and this object was persevered in so far as circumstances permitted.

The first danger in the above route which appears upon the Admiralty Chart is,—

Breakers off St. Pierre.—This is a doubtful danger from Horsburgh shewn on the Admiralty Chart of Lieutenant Gordon. It is placed about five miles south of the Island. We anchored near the position and sounded over and about it, but discovered no sign of danger. It should be removed from the Charts.

Logan Reef.—The following is an extract from the Admiralty Hydrographic Notice of this danger, dated 24th September 1859:—"Captain Logan, "of the *Rob Roy*, bound from Labuan to Singa- "pore, reports having seen off Api point, on the "north-west coast of Borneo, the wreck of a ves- "sel ashore on a reef with Marundun Island "bearing N. E. ½ N., Haycock Island N. by W. ½ "W., and St. Pierre Island W. ½ S. This reef, "if it exists, is very dangerous, being immediately "in the track of vessels making the passage "between Singapore and Sarawak and Labuan."

Several of H. M. Gunboats (by order of Captain Corbett, of H. M. S. *Scout*) have passed over the position assigned to this reef without discovering the least trace of danger. It has also been repeatedly looked for by the regular traders between Singapore and Sarawak and Labuan with the same result, nor were we more successful in the *Rifleman*.

There is, in fact, good reason to conclude that Captain Logan was mistaken in supposing the wreck to be on a reef. The wreck was fallen in with afterwards by other vessels, drifting about, and ultimately went on shore a short distance to the southward of Tanjong Api, where she was visited by the Authorities of Sarawak. I shall, therefore, recommend that this danger be removed from the Admiralty Charts.

Niger Bank off Cape Datoo—Was discovered in 1858 by H. M. S. of that name. It is a bank of hard clay with from 5 to 9 fathoms on it, four and a half miles long east and west, and one and a half broad. The outer edge of the centre part of the bank is about north of the Cape, distant five miles from it. The five fathom spots are towards the east and S. E. ends.

Acis Patches.—Are thus referred to in the Admiralty Hydrographic Notice of the 10th October 1860:—"Two coral shoals have been "discovered off the north-west coast of Borneo by "the brigantine *Acis*. The position of the east- "ern shoal is given as Lat. 3° 45′ N., Long. "112° 42′ E. The other shoal lies on the same "parallel, and a short distance to the westward."

We anchored near to these patches and searched for them without success. It is possible they may exist somewhere in that locality, but as 9 and 10 fathoms are shewn on the spots in the Admiralty Chart, they were not of sufficient importance to detain us.

Scout and Victoria Patches—Are two coral shoals situated to the south-westward of the Bruni patches, the channel between which and the coast of Borneo, heretofore considered quite safe, being thereby rendered very dangerous. They each extend nearly a mile in a north and south, and about half a mile in an east and west direction.

H. M. S. *Scout* passed over the edge of the former shoal in 4 fathoms. We afterwards found the least water to be but 2 fathoms. It bears S. W. b. S., 4¼ miles from the west Bruni patch, and W. b. S., 12 miles from Keti islet.

H. M. I. N. Steam-vessel *Victoria* discovered the shoal of that name, the least water obtained upon which was reported to be 47 feet. It bears S. S. W. ½ W., 7 miles, from the west Bruni patch, S. b. W. ½ W., 2 miles from the Scout patch, and W. S. W., 12¼ miles from Keti islet.

The only mark to clear these dangers is a bearing of Keti islet, which is just visible at a distance of 12 miles. For vessels passing inside the Bruni patches the safest course will be to keep along the edge of the bank in five fathoms. But I think it wiser for Ships—large Ships particularly—to pass outside the Bruni patches where there is nothing in the way. The Islands of Great Rusukan and Kuraman, with the high land of Labuan, can be seen in plenty of time and run boldly for, except in very thick bad weather, which seldom occurs on this coast.

Luconia Shoals.—Upon Sheet 2 of the Admiralty Chart of the China Sea a number of dangers are shewn from 90 to 120 miles to the north-westward of Barram point on the Coast of Borneo, and situated between the parallels of 4° 55′, and 6° 2′ north, and the meridians of 112° 16′ and 112° 42′ east.

They are named Luconia Bank, dry; Luconia Shoal; Luconia Breakers; George and Abercrombie Shoal, and the Friendship Shoal. We found the whole to comprise a mass of dangerous coral reefs and shoals, amongst which no vessel should venture. Whilst preserving the names of the original discoverers for particular or more conspicuous portions of these dangers, we have adopted

the general name of the "Luconia Shoals" as referring to the entire group.

We sounded over the position ascribed to the 'dry bank' without discovering it; but five miles north of its reputed position we found a reef upon which the sea was breaking in fine weather, and which is no doubt the 'dry bank' of the Charts. We named this danger the Luconia Breakers.

LUCONIA BREAKERS—Are in Lat. 5° 3' 24" N, Long. 112° 38' 36" E. From this position dangerous shoals, with rocks nearly awash on them, extend 12 miles west, 5 miles south, 2 miles east, and 3 miles north.

This may not be the entire extent of the shoals in this vicinity, but bad weather prevented us extending our search further.

SEAHORSE BREAKERS—The most conspicuous danger of the Luconia Shoals is in Lat 5° 31' N., Long. 112° 33' 17" E, about a mile long in a N. by E., and opposite direction and one-third of a mile broad. From these breakers shoals extend as far as we have yet been able to sound, *viz.*, 18 miles north, 5 miles south, 5 miles east, and 13 miles west.

It is probable that our soundings have nearly reached the limits of these shoals, excepting to the northward, in which direction we only got as far as the latitude of the southern part of the Friendship. Captain Bate, in H. M. S. *Royalist*, passed over the position ascribed to the George and Abercrombie without finding it. He supposed that it and the Friendship were the same shoal. But the error was in the longitude of the George and Abercrombie, which placed it too far to the westward. It exists and forms part of the mass of shoals which extend continuously from the Seahorse Breakers to the Friendship.

When we have completed our survey of these dangers a more detailed account will be published, if necessary. But I hardly think that any directions can be given which will enable vessels to pass safely through these reefs and shoals. Although we have not found less than 3 fathoms upon those to the northward of the Seahorse Breakers yet they should be avoided, as it is quite possible there may be knolls with less water upon them which have escaped the lead.

KIRTON SHOAL AND EUPHRATES REEF—Are two doubtful dangers which appear in the fairway of vessels proceeding to the Palawan between the Luconia Shoals and Barram point. We passed over their reported positions and sounded about the locality without finding anything like danger, but it will be necessary to make a much closer search before removing them from the Chart

ISLANDS AND DANGERS OFF BRUNI CLIFFS—The Five Comades and Three Islands; and also two large patches (with an island on one of them) near the latter, which have been taken from the old Charts of Horsburgh and shewn in faint dotted lines on some of the Admiralty Charts, have been long known to those accustomed to the navigation of these Seas to have no existence. This has been proved to be true by the *Rifleman* carrying lines of regular soundings right across the whole of the positions.

OTTAWA SHOAL—This is a danger reported by Captain Gribble, of the P. & O Steamer *Ottawa*, and supposed by him to be the Viper Rock. The following is an extract from the Log Book of that vessel, dated 6th December 1860:—"Sighted "from the masthead broken water on the port "bow, having every appearance of being a shoal "about half a cable in extent from east to west, "with no indication of shoal water near it. "When abeam it was about 2 or 3 miles distance "from the Ship, and was then visible from "the deck. Position of the shoal Lat. 7° 16' N., "Long. 115° 5' E."

The *Rifleman* was employed searching for this danger for three days, but could find no indication of it; nor could bottom be got with 1,000 fathoms of line.

The area sounded over is comprised within the following limits:—8 miles east, 15 miles west, 5 miles north, and 5 miles south of the position given above. It is much to be regretted that the broken water seen from the *Ottawa* was not examined from a boat, and the fact of the existence of a shoal or otherwise placed beyond a doubt.

ROGERS BREAKERS—The following is an extract from the Log of the P & O. Steamer *Formosa*, Captain Rogers, dated 4th of January 1858:—"Heavy breakers were seen every three or four "minutes bearing east two or three miles from the "Steamer. There was a swell from the N. E and the "broken water, about 10 yards in extent north "and south, was apparently caused by a rock a "few feet under water. The vessel proceeded "slowly and soundings were occasionally tried for "with 100 fathoms, no bottom The weather "was thick and rainy. The position of the "breakers is Lat. 8° 21' N., Long. 116° 25'E"

This is another instance in which it was most desirable that a boat should have been lowered to examine the breakers and to find out if there was really any rock there or not It was of the greatest importance to avoid placing a doubtful danger at the very entrance and in the centre of the fairway of the Palawan Channel. We searched over and about its position for a day without finding anything of the sort, and I think that the appearances must have been deceptive in this case. It is well known how frequently they are so to all accustomed to navigate the China Sea. Captain Curling, of the P & O Steamer *China*, who has made many voyages by this route, assures me that the appearance of breakers where no real danger exists is very common in the Palawan.

I think, after much consideration, that this very doubtful danger should be removed from the Charts. It is a great pity to encumber an important channel like the Palawan, where so many real dangers exist, with doubtful ones. Ships not unfrequently, I believe, get too near real dangers whilst keeping clear of imaginary ones, and I am of opinion that in much frequented channels it is wiser not to insert doubtful dangers unless there be very strong reasons for believing them to exist.

If we are ever to have a complete Chart of the China Sea, Captains of vessels should assist in the work by endeavoring to ascertain when passing near what appear to be dangers—in such

cases as the *Ottawa* and Roger Breakers for instance—whether they be such or not. An hour or so would have decided the point beyond all doubt in either of the above cases, whereas several valuable days of our time were occupied in searching about the spots without enabling us after all to decide the matter positively.

North Furious Shoal—Was discovered in August 1839 by H. M. S. *Furious*. From the Ship's position at anchor in 11 fathoms in Lat. 7° 3′ 19″ N., Long. 116° 17′ 15″ E., the middle Mantanani Island* bore S. 7° E′, and Banquey peak N. 70½ E. The shoal is of coral and extends N. W. by N.′ and S. E. by S., nearly two miles. The least water upon it is 7 fathoms.

South Furious Shoal—Is a small coral bank barely half a mile in extent N. N. W. ½ W., nearly 7 miles from the west extreme of the Mantanani Islands. It is in Lat. 6° 48½′ N., Long. 116° 10½′ E. The least water upon it is 7 fathoms.

Other Shoals of the Mantanani Islands.—N. N. W., about 5 miles from the west extreme of the Mantanani Islands is a small patch of 7 fathoms; and N. by W. ½ W., 3½ miles, is another spot of 10 fathoms.

About 2 miles S. S. W. of the south Furious patch is a bank of coral of 7 fathoms, about a mile in extent; westward and south-westward of which again are other and more extensive banks, the limits of which we have not yet been able to determine. Seven fathoms was the least water we found upon any of them, and the soundings were very irregular.

In bringing a line of soundings from these shoals towards Labuan the *Rifleman* came on another bank at night. It lies S. 36½ W., 17 miles from the Middle Island of the Matanani group. Possibly this may be a dangerous bank, for passing over it slowly very irregular soundings and as little as 4 fathoms water were obtained.

Barton Rock—Appears on the Admiralty Charts as a rock awash in Lat 6° 52′ N., Long. 116° 16½′ E., 9½ miles north of the Mantanani Islands. The *Rifleman* passed over the position of this danger without finding it; twenty-eight fathoms were obtained on the spot. Circumstances did not allow us to make further search for it.

Shoals between Labuan and Mangaloon.—The two patches from Horsburgh, shewn in dotted lines on the Admiralty Charts close to the eastward of the track of H. M. S. *Saracen*, were passed over. On the spots we had 21 and 23 fathoms, but 2 or 3 miles south of the northern one in about Lat. 6° 1′ N, Long. 114° 25′ E., we passed over a coral bank of 6 fathoms only; two miles south of which we crossed another of 12 fathoms.

Vernon Shoal.—In going to the Ottawa Breakers sounded upon this shoal and found only 2¼ fathoms where 6¼ are marked in the Charts In some places the water appeared to be much shoaler. This might have been caused by the sun shining on the water. There is but little doubt, however, that it stretches a long way to the westward, and probably connects by a series of shoal patches with the shoals passed over by H. M. S. *Fury* in 1858.

General Remarks.—It is apparent from the above observations that the whole of that part of the China Sea extending from the Fury patches N. W. of Labuan, in a line passing over the Saracen bank and Mangaloon Island to the Furious shoals, should be navigated with the greatest possible caution. To render this navigation safe it will be necessary to make a close survey of the whole similar to Captain Bate's survey of the Palawan, and to bring down the hundred fathom line from where he left off along the whole coast of Borneo as far as the Luconia Shoals.

Caution.—Commanders of vessels proceeding to China by the Palawan Channel are therefore cautioned not to venture amongst the shoals near Labuan and Mangaloon Island, but to keep to the northward of them, and closer to the track recommended by Horsburgh. It will be seen that that line passes very close to the Ottawa. This is why it was so necessary to determine whether that shoal existed or not, and occasions so much regret that Captain Gribble did not settle the question definitely and thereby render a most important service to the Hydrography of these Seas.

Route from Labuan to the Palawan.—Sheet 8 of the Admiralty Chart of the N. W. Coast of Borneo (from Nosong point to Ambong bay) will enable vessels to proceed safely as far as the De-lua reefs, which may be passed on either side. The safest course then appears to be inside the Mantanani Islands along the Coast of Borneo until abreast of Sampanmangy point. Sheet 9 of the Admiralty Chart (Ambong bay to Sampanmangy point) exhibits no danger by this route, and the *Rifleman* on a S. E. by S. course from the north Furious shoal for 18 miles carried regular soundings the whole way.

Beacons at Labuan.—The following is a list of the Beacons on the dangers in the channel leading to Victoria Harbour from the southward, and from thence to Port Raffles:—

One without a ball on the S. W. end of the reef extending from Pappan Island.

One with a black ball on the east end of the ¼ fathom patch between Pappan and Enoe Islands.

One without a ball in 4 fathoms on the N. E. end of the shoal of Enoe Island.

One with a white ball on the east end of the one fathom patch in the Harbour.

One without a ball on the edge of the reef extending from Ramsay point to Colnet head, bearing E. by S, distant half a mile from the Flagstaff on Ramsay point.

* A small, but high, island, between the two large ones of the

One without a ball to the southward of the Columbine rock on the same reef, bearing E. ¼ N., distant one mile from the Flagstaff on Ramsay point.

Two Beacons with a white ball on each on the western edge of the reef extending from Daat Island to Loobedan Island. The southern one about E. N. E., a little more than two miles from Collier head. The northern one is N. E. ¼ N., 3¼ miles from the same place, and N. ¾ E., nearly 2 miles from the south Beacon.

There was formerly a Beacon on the 1½ fathom patch off the Gangara River, which we have recommended to be re-placed.

Labuan Coal Mines—Are now in full working, and vessels calling there may depend upon getting supplied without any delay, lighters being kept in constant readiness for that purpose. Upwards of six thousand tons were stored ready for shipment, and the yield was increasing every day.—Vessels proceeding to Port Raffles for Coals should anchor in 3 or 4 fathoms, with the two buoys moored off the Jetty in line.

Sarawak River, Moratabas Entrance.—Mr. Moss, Master of H. M. S. *Scout*, recently surveyed this entrance and found that the bank between Po and Moratabas points has altered, and that it does not extend so far out as is shewn on the Admiralty Charts; and that as knoll of sand with only 14 feet upon it lies with Po point N. W. by N., and Moratabas point S. W. The channel is between this knoll and the bank above mentioned.

The following directions are taken from a tracing of Mr. Moss' survey, guided by which the Rifleman twice entered the river and found the soundings to agree :—

After passing the low flat rocks to the northward of Po point at about a cables distance, steer to the southward so as to bring the left extreme of the rocks on with, or a little open of, Po point. Keep that mark on until Santubon peak is seen in the centre of a remarkable hollow in the range of Hills between Moratabas and Po points, when you will be abreast of the tail of the bank (now marked by a white pole Beacon); then steer S. S. W. ¼ W. for a clump of trees on the low land left on the Mangrove point opposite Moratabas point, until Moratabas point bears W. by S. ¾ S.; when steer for the entrance of the river keeping in mid-channel.

Caution.—To guard against the effects of the tide frequent bearings of Po and Moratabas points should be taken, which will readily shew the vessel's position on the Chart.

Several large fishing stakes being moored in mid-channel renders it dangerous for vessels to enter at night.

Santubong Entrance.—The *Rifleman* in coming out of the river by this channel at the top of high water got no more than 2¾ fathoms on the bar, which gives only 1¾ fathoms at low water instead of 2¼, as shewn on the Admiralty Chart.

From Moratabas Point to Sarawak.—Mr. Russell, Master of H. M. S. *Reynard*, has made a track survey of this river, which is sufficient to enable vessels to proceed up safely.

Upon Tree Point, where the Quop joins the Sarawak River, a board has been placed pointing out the direction of Sarawak. A board is also nailed on a tree on the right hand side of the river, going up, below the Bintawak Rocks, marked 'Rocks—keep mid-channel.' Other boards are also placed on the opposite side of the river abreast of the Dido and the Samarang Rocks, marked 'Rocks—hug this shore.' If these directions be attended to and proper caution observed, steam vessels drawing 13 or 14 feet of water may go up the river safely on a rising tide.

It has been the custom for H. M.'s Steamers to anchor in the reach above Crookshank Point, and the *Rifleman* has twice anchored there; but the last time she grounded at low water on a knoll of shingle. The best anchorage is a little below the Sago Factory in the reach between the Samarang Rocks and the new Fort. Only very small vessels should go higher up.

Caution.—The greatest caution should be used in navigating and selecting a berth in the upper part of this river. Almost every man-of-war that has gone up has met with some accident. It is extremely dangerous to get on any of the beds of rocks near high water, with a fall of 14 or 15 feet. No vessel should attempt to lie at single anchor. It is indispensable to moor, and many serious accidents have been occasioned by neglecting this precaution. Vessels drawing more than 10 feet, or of greater length than two hundred feet, cannot go above the Quop without incurring considerable risk.

Weather.—The weather during the months of July and August was very fine, with light south-westly winds during the day and frequent calms at night. About the beginning of September the weather became unsettled. Strong south-westly winds and frequent heavy squalls with much rain prevailed. The *Rifleman* had to strike lower yards and topmasts to enable her to steam to Singapore against it. The wind was generally much stronger during the day than at night, when it usually veered more to the southward and enabled us to carry fore and aft sails. We observed that the weather was most unsettled just after the full moon in each of the three months.

Currents.—We found the current near the Luconia Shoals, as a rule, set to windward, and often at the rate of 1½ to 2 knots an hour. In the Palawan, at the Ottawa Shoal and Rogers Breakers, it set to the north westward.

The following Tables exhibit the Geographical positions obtained, and the data upon which they are based:—

Singapore, the 12*th November* 1863.

* In Sheet 2 of the Admiralty Chart of the China Sea Barram point is placed in Long. 114° 3′ E. Belcher made in 113° 58½′ E. Its position by us depends upon the Longitude of Labuan, the Meridian Distance between which and Barram Point agrees precisely with Belcher's.

N B.—The Hydrographic Notice of the *Rifleman's* survey of the "Islands between Singapore and Borneo," published at Singapore and dated 6th March 1863, has been re-printed at Hong-Kong, and a copy has reached me, in which I observe that the longitude of Fort Fullerton, Singapore—the datum point to which all our meridian distances are referred—is wrongly given as 103° 54′ 18″ instead of 103 51′ 18″.M. as appears in the original.

Circular Order of the Board of Revenue, Lower Provinces.

No. 83.

To all Commissioners and District Revenue Officers.

Land Revenue.
(Waste Lands.)
W. J. Allen, A. Grote, and E. T. Trevor, Esqrs.

The following corrections are to be carefully made in the Tables published in the Appendix K. to the Waste Land Rules :—

In the Table headed "Soonderbun Grants."

Erase all the figures and entries as far as, and inclusive of, the sixteenth year, and enter as follows :—

Column 2.	Column 3.	Rs. As. P.	Column 4.	Rs. As. P.
For the first sixteen years ..	8 8	8 14 2	1·1	1 1 10

In the Table headed "Assam and Cachar Grants."

Erase all the figures as far as, and inclusive of, the third year, and enter as follows :—

Column 2.	Column 3.	Rs. As. P.	Column 4.	Rs. As. P.
For the first three years .	8 8	8 14 2	3·3	3 5 4

The Errata thus corrected arose from it having been overlooked that the Tables apply only to the assessed area, *i. e.*, to three-fourths of the Grants, while the minimum price at which, under Rule 19, the revenue payable on such lands may be redeemed is to be calculated on the *whole* area.

3. The Junior Grade shall be restricted to practise in the Courts of the Sudder Ameen, the Moonsiff, the Magistrate, the Collector and their Subordinates.

4. The examination shall be partly written and partly *viva vôce*.

5. The *viva vôce* examination shall be such as to test the practical knowledge of the candidates on questions connected with the subjects of the test.

6. The written examination papers shall be prepared by Examinees, who shall act in conjunction with, and under the control of, the High Court.

7. The written examination shall form the subject of two papers, of which the former shall embrace questions relative to the Law of Property and its subordinate heads, and the second questions on Evidence, Civil and Criminal Procedure, and Criminal Law. Archæological Researches in India.

From MAJOR-GENERAL A. CUNNINGHAM, Archæological Surveyor to Government of India, to Secretary to Government of India, Public Works Department, with Governor-General,—(dated the 2nd September 1863.)

* * * * *

2. In the following lists, which have been drawn up after a long and careful consideration of the subject, I have included all the buildings that I consider worthy of being photographed. The main object in making a collection of photographs is to preserve the details as well as the forms of the finest existing specimens of ancient architecture and sculpture. To attain this end satisfactorily the photographer must repress his natural wish to produce an artistic picture, and should make it altogether subordinate to the imperative duty of presenting as *complete* a view of the object as circumstances will admit of. A single picture of any highly decorated building may be sufficient to shew the form and general appearance of the structure, but the details can only be adequately given in separate pictures on a larger scale. In illustration of this opinion I may cite the case of the Kutb Minar at Delhi, of which all the best photographs that I have seen utterly fail to give any idea of the extreme richness and beauty of the honeycomb fretwork of its four projecting balconies. But every minute detail of this work may be seen in the large photograph of the lower balcony taken by Mullitte from the cloister roof of the Great Mosque.

3. The architectural remains of India are naturally divided into the two great classes of Hindu and Muhammadan, which are widely distinct from each other. The Hindu architecture may be sub-divided into three classes according to the nature and style of the buildings required by the different religious ceremonies of the *Buddhists*, the *Brahmans*, and the *Jains*. The Muhammadan architecture is divisible by style alone, but the difference between Pathan and Mogul architecture is almost as broadly marked as that between the Hindu and Musulman. The majestic beauty of the Kutb Minar and the stern grandeur of Tughlakabad are widely different from the chaste elegance of the tomb of Taj Mahal, and the graceful lightness of Aurangzib's Mosque. But as the Muhammadan architecture in so varied in character that the broad divisions of Pathan and Mogul are not sufficient to mark the diverse styles which prevailed at particular periods, I have divided into five classes as follows:—

1st.	*Early Pathan*, of the Ghori and Khilji Dynasties ...	1193 to 1321
2nd.	*Late Pathan*, of the Thuglak and Sayid Dynasties ...	1321 „ 1451
3rd.	*Afghán*, of the Lodi and Suri Dynasties ...	1451 „ 1554
4th.	*Early Mogul*, from Humayun's restoration to Shah Jahan's death ...	1554 „ 1658
5th.	*Late Mogul*, from Shah Jahan's death to the accession of Alam Shah ...	1658 „ 1759

4. The existing BUDDHIST buildings are so few, and the interest attached to them as the earliest specimens of Hindu architecture is so great, that all remains of this class should certainly be photographed. The Buddhist bas reliefs are specially valuable as illustrating the dress and occupations of the people, as well as their buildings and religious ceremonies. Many of the sculptures also are highly important from their unconstrained style and superior finish, which are in all probability due to the influence

of Greek art. I may note more particularly the four splendid specimens I have seen myself, *viz.*,—

1*st.*—Pillar capital of four lions at Sânchi near Bhilsa.

2*nd.*—Pillar capital of one elephant at Sankissa near Futtehgurh.

3*rd.*—Pillar capital of four human figures at Firuzpur.

4*th.*—Colossal group of Mâyâ Devi and the infant Buddha lying on a couch at Pathari to north of Bhilsa.

As the first three of these are the only remains now existing of the lofty columns to which they once belonged, I would strongly recommend that they should be removed to the Calcutta Museum as specimens of the earliest and best period of Indian art. The grand colossal statue of *Mâyâ Devi* is described in Colonel Sleeman's "Rambles of our Indian Official."

5. The early BRAHMANICAL buildings are also very few; but those of later date are so numerous that it is absolutely necessary to make a selection of the more important works of each particular period or style. Unfortunately the dates of the temples cannot always be ascertained; but there are usually such special differences and varieties of style, peculiar to different periods, that the age of most of them can be approximately determined.

6. The same remarks apply also to the JAIN buildings, which, although not so numerous as those of the Brahmans, are still fully as important from their extreme richness and variety. The Jain statues are limited to the representation of their twenty-four hierarchs; but, like those of the Buddhists, many of them are of colossal size, while those of the Brahmans very rarely exceed the natural height.

7. The list of Hindu buildings marked A. is necessarily incomplete, as I am not personally acquainted with the architectural and sculptural remains of Rajputâna, which probably contains more fine monuments of Hindu art than all the rest of Northern India. During the next cold season of 1863-64 I propose visiting the Punjab, but I intend that the following season of 1864-65 shall be dedicated to an examination of the archæological treasures of Rajputâna. In the meantime the lists of Hindu buildings gives the names of all such objects of interest as I have personally visited during my tours of the past two seasons.

8. In the Muhammadan list marked B. I have classified the buildings according to their style and age; but the number of existing buildings is so great that I have found it necessary to make a selection from them of the finest specimens only or of such as are typical of the prevailing styles of different periods. This selection includes buildings of all descriptions from the time of the Muhammadan conquest in 1193 down to the battle of Plassey in 1757 and the accession of Shah Alam in 1759, when the empire of the Great Mogul was limited to the Gangetic Doab by the conquests of the English and Afghans in Bengal and Punjab, and by the cessation of Nawâbs of Oudh and the Carnatic.

The series begins with the Masjid Kutb ul Islam, or Great Mosque of the Kutb, commenced in A. H. 589 or A. D. 1193, and closes with the tomb of Safdar Jang, who died in A. D. 1750.

9. The sculpture of India is of course almost entirely confined to the Hindus, as the Muhammadan religion forbids the representation of anything living. But there are a few notable exceptions which belong exclusively to the reigns of the free-thinking Akbar and the indifferent Jahangir. The Hindu sculptures, like their architecture, belong to the three different religions of the BUDDHISTS, the BRAHMANS, and the JAINS.

10. The early *Buddhist* sculptures are so extremely rare, and at the same time so highly interesting and important from their frequent excellence and their infinite variety of subjects, that it is very desirable that copies of all should be preserved by photography. But the later Buddhist sculptures are much more numerous, and as they are, I believe, chiefly confined to religious subjects, such as representations of Buddha and of the Buddhisatwas and the various acts of their lives, it will be for the photographer to make a selection of one or two of the finest specimens of each different kind as the subjects of his pictures.

The list marked C. will be a useful guide to the photographer in making his selection, as it contains the names of the Buddhists Triad of the five *Dhyâni Buddhas* and their five *Dhyâni Buddhisatwas*, together with their *Saktis* or female energies. Any other subjects that may be discovered should of course be copied.

11. The number of *Brahmanical* sculptures is almost countless; but a selection may be made of one or two of the finest specimens of each kind as noted in the list marked D. so as to form a very complete collection of the representations of the Brahmanical divinities. Many other subjects will of course be met with, and more especially the figures of the larger animals, as the Lion, Elephant, Bull, Horse, and Boar, all of which should be photographed to shew what amount of knowledge the Hindu sculptors had attained in the treatment of animals.

12. The *Jain* sculptures are almost restricted to the representation of their twenty-four hierarchs, whose names and distinctive symbols will be found in list E.

There are Jain goddesses also, as *Târâ* and others, of whose names I have no list.

The Board, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so.

The following are the Conditions of Sale :—

1. The Opium will be sold for exportation by Sea only, and no Certificate will be granted except to cover such export.

2. The Opium will be ordinarily offered for sale at an upset price of Rupees 400 per Chest, and sold to the highest bidder above that price, except under the circumstances for which provision is made by Clause 12 of these Conditions of Sale.

3. The Sale shall commence at the hour of 11 A. M. of the day fixed by previous Notification, and shall not be continued after the hour of 5 P. M., but if at that hour any of the lots advertised for sale shall remain unsold, the Sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a Public Holiday) at the hour of 11 A. M., and so on, until the whole of the remaining lots are disposed of, or, if the whole quantity advertised shall not be sold on the day appointed, the Board may dispose of the lots which remain on hand at a future Sale.

4. Each lot shall contain five Chests.

5. A Promissory Note for a sum calculated according to the scale noted in the margin shall be taken as a deposit on each lot from the Purchaser in the Sale Room, and before the lot is registered in the Sale Book, and all such Promissory Notes shall be redeemed on the part of the Purchasers at this Office by Bank of Bengal Receipts, or by substitution of other Public Securities of the Bengal Government, on or before 4 o'clock in the afternoon of the fifth day after the Sale, or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal Receipts, or deposit of other Public Securities as aforesaid shall have been delivered in, shall be re-sold at such time or times, and under such conditions of re-sale, as the Board of Revenue shall see fit, and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

On bids of „ 1,600, but less than „ 2,000	„ 400 „
And so on, Rs. 100 being added to the Deposit for every additional Rs. 400 bid.	

6. The Promissory Notes taken on the day of sale under the last mentioned condition, if remaining unredeemed at 4 o'clock of the fifth day following the day of Sale, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

7. No tender of Money, Bank of Bengal Receipts, or Public Securities, on account of Opium, upon which the prescribed Deposit may not have been made before 4 o'clock of the fifth day following the day of Sale, will be afterwards accepted.

8 The Opium now advertised for sale shall be paid for within fifteen clear days from the day of Sale, and in case any lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit made under the fifth Condition, or any Public Securities that may have been deposited on account of such lots or Chests, shall be forfeited, and the Opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit, and the first Purchaser shall further be required to make good any loss or difference of price between that obtained at the re-sale and the amount at which the Opium was first purchased, forfeiting all advantages that may arise from such re-sale.

9. Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each Certificate or Order ; and it is to be clearly understood that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single lots or of a different number of lots or Chests, whether more or less than the number of lots or Chests originally required to be included in each Certificate or Order.

10. No deposit of Public Securities under the fifth of the present Conditions will be received in this Office, except from the party recorded as the Purchaser in the Sale Book, or his authorized Agent. The Receipt for deposit of Public Securities will be granted only in the name of such Purchaser, and the Securities so deposited will be returned when payment in full has been made by the said Purchaser or his Order.

11. The Officer superintending the Sale on the part of the Board of Revenue is empowered to reject, at his discretion, the bid of any individual, unless such individual shall, on demand, tender at the time a Deposit either in Government of India Notes, Bank of Bengal Receipts, or Government Securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these Conditions.

12. With a view to prevent fictitious biddings designed to obstruct the Sale, it is hereby notified that the Officer of Government superintending the Sale shall be competent at any time

during the Sale to withdraw any unsold lot and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually until a bid is obtained, and the first *bonâ fide* bidder for a lot, after it has been offered for sale in mode here described, shall be held and declared to be the Purchaser of the said lot, and the Officer of Government superintending the Sale shall also be competent to dispose in the same manner of as many of the subsequent lots as he may think proper; provided always, that no lot shall be sold below the minimum price of 400 Rupees specified in the second of these Conditions.

13. The Purchaser of any lot shall have the option of naming and purchasing in immediate succession at the same price and under the same Conditions any number of lots of the same Agency Opium not exceeding altogether twenty-five lots; provided always, that there remain a sufficient number of lots of the Opium to complete the said twenty-five.

14. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

15. The following papers, together with samples of the Opium for sale, will be exhibited for inspection on the day of sale, or may be seen previously to that date by application at the Office of the Junior Secretary to the Board of Revenue:—

No. 1.—Certificate of the Opium advertized for sale.

No. 2.—Report of the examination of such Opium.

16. The Public are hereby informed that in providing the investment of the Behar and Benares Opium for the year 1862-63 the same precautions have been taken as those which have been observed during past years, to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the drug when packed at Behar and Benares, and a statement of the average weight of the Chests indiscriminately taken for the purpose of comparison from the dispatches on arrival at Calcutta, may be seen on application at the Office of the Junior Secretary to the Board of Revenue. Four Chests of Behar and Benares Opium, *viz.* two of the Season's provision under sale, and two of the previous Season, will be also shown to the Purchasers in the Sale Rooms on the day of Sale, to enable them to judge of the state of preservation of the drug in the Chests offered for sale.

17. Any further information respecting weight or quality of the Opium advertized for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on application at the Office of the Board of Revenue, but, in accordance with established usage, under no circumstances will the Board entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of Opium, or adulteration of the drug, which may be preferred on reference to Chests after the sale and delivery of the Opium for shipment.

18. It is hereby further notified, that, under the 6th Article of the Convention between Great Britain and France, dated the 7th March 1815, quoted below, the Agents in India of the French Government, or persons duly appointed by them, are entitled to demand, that out of the quantities of Behar and Benares Opium declared as above for sale at the twelve Sales of the year 1864, there shall be delivered to them at the average of the particular Sale or Sales to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisitions specifying the quantity of Opium required by them at any particular Sale within thirty days from the advertisement of such intended Sale; provided, however, that the Agents of the French Government may make such requisition for the whole quantity within thirty days from the publication of this Notification. If the Agents of the French Government shall not make the requisition for Opium within the time above mentioned, the entire quantity of about 49,776 Chests of Behar and Benares as above estimated will be brought to sale in the usual manner, and if they shall make application for a quantitiy of Opium to be delivered to them out of the quantity advertised for sale at each or any of the twelve Sales above mentioned, but shall not pay for it within the prescribed period of payment, the Government of Bengal reserves to itself the right of disposing of the Opium which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the sale next ensuing the date of payment, or by selling it at a sale to be held expressly for the purpose.

6. The written examination papers shall be prepared by Examinees, who shall act in conjunction with, and under the control of, the High Court.

7. The written examination shall form the subject of two papers, of which the former shall embrace questions relative to the Law of Property and its subordinate heads, and the second questions on Evidence, Civil and Criminal Procedure, and Criminal Law. Notice.

UNDER orders of the Government of Bengal, conveyed through the Chief Customs Authority, the following Rules observed on the Custom House Wharf are published for general information:—

Importers and others landing goods at the Custom House are to appoint Watchmen to take care of them, such Watchmen are to have in their possession the badge or written authority of the persons appointing them, and which is to be produced when required by an Officer of Customs.

Wharf Assistants are strictly cautioned from receiving packages containing matches, acids, crackers, gunpowder, gunceps, saltpetre, or other inflammable articles within their Sheds, and to bring to the notice of the Controller immediately they find from their boat notes or information otherwise received that such articles are about to be landed. Any person bringing such goods into the Sheds and Godowns of the Custom House will be liable to a fine of 500 Rupees, and to make good all damages arising therefrom.

No packages are allowed to be opened on the Wharf without the Collector's orders, or if for appraisement, under direction of one of the Appraisers.

No full casks or cases of wine, beer, or any other liquor is to be passed out until the empty ones covered by the same Perwannah are removed first. This rule is applicable in cases where parties are allowed to fill up beer, sprits, tar, &c., on the Wharf before passing.

As the Out-Sheds are only intended for the accommodation of goods landed before the opening and after the closing of the gates, unless under special permission of the Collector, and with certain exception, no goods are allowed to be placed therein between the hours of 10 A. M. and 5 P. M.

The following goods only are allowed to be landed outside at all hours:—Timbers and planks of all description, heavy anchors and chains, tar, rosin, pitch, and all heavy packages which require the use of the Crane.

All expenses incurred for advertising and removing packages are to be paid by the Owners or Consignees thereof at the time of passing.

An extra Officer and a Peon to be appointed to all private bond Godowns at the expense of the bonders. The former to receive and the latter to accompany the goods passing into private bond. An Officer is also appointed, at the expense of the bonders, to pass out goods from private bond on which duty has been paid.

A Peon (if one be available) will be appointed by the Officer at the Bonded Warehouse to accompany goods into public bond, otherwise a fee of 4 annas must be paid for an extra Peon.

The rate to be charged by the extra Officer has been fixed from 10 A. M. to 1 P. M. at 1 Rupee and 8 annas; and any further time beyond the above, up to 5 P. M., 3 Rupees. From 5 to 6 P. M. an extra charge of 12 annas will be made, and 1 Rupee from 5 to 6-30 P. M., after which time Officers are not expected to work. Fee for Peons, 4 annas each per day.

A conveyance fee of 1 Rupee to be paid to the extra Officer when required to attend at a Godown the distance of which from the Custom House exceeds ½ a mile.

Instances having occurred in which goods could not be received and duly secured in the Bonded Warehouse on account of passing out late from the Wharf, Assistants will not allow any goods intended for private bond to be carted after 4 P. M., and for public bond after 4-30 P. M.

No work will be allowed on Sundays and Christian holidays.

Work, before and after hours, and on general holidays, will be allowed only on payment of fees, and under sanction of the Collector.

The rate for working on those holidays, and before and after hours, *i. e.*, from 7 to 10 A. M. and from 5 P. M. to sunset, is fixed at 5 Rupees for each requisition for the Assistants, and 8 annas to the Peons; if after sunset, extra fees of 5 Rupees and 8 annas, respectively, will be charged.

All applications for working on holidays should be sent in to the Collector the day previous, and in time to allow the necessary arrangements to be made.

Goods lying under cover within the Custom House to be allowed four days rent-free, two days single rent, and for any number of days in excess of that period double rent up to fourteen days (exclusive of the rent-free and single rent terms), after that to treble rent for ten days more, and quadruple rent for any period in excess of that term. These rates to be calculated by the single rates fixed in Government Order No. 2796, dated 15th November 1859, published in the *Calcutta Gazette* on the 4th January 1860.

All empty Cargo Boats lying for more than twenty-four hours on the River bank within the limits of the Custom House, *i. e.*, from Coilah Ghaut to Clive Street Ghaut, will be charged a rent of 5 Rupees per day.

Country timber landed within the above limits will be charged, from the date of landing, a rent of 1 Rupee per log per day.
